## Automotive high voltage rectifier for bridge applications

Datasheet - production data

## Features

- AEC-Q101 qualified

- Ultra-low conduction losses
- Ultra-low reverse losses

## Description

The high quality design of this diode results in a device with consistently reproducible characteristics and intrinsic ruggedness. These characteristics make it ideal for heavy duty applications that demand long term reliability like automotive applications.

Thanks to its ultra-low conduction losses, this diode is especially suitable for use as input bridge diode in battery chargers.

To evaluate the conduction losses, use the following equation:
$\left.\mathrm{P}=0.96 \times \mathrm{IF}_{\mathrm{F}} \mathrm{AV}\right)+0.008 \times \mathrm{IF}^{2}(\mathrm{RMS})$
