

PRECISION 3.3VOLT LOW KNEE CURRENT VOLTAGE REFERENCE

Description

The ZRC330 uses a bandgap circuit design to achieve a precision micropower voltage reference of 3.3 volts. The device is available in a small outline surface mount package, ideal for applications where space saving is important.

The ZRC330 design provides a stable voltage without an external capacitor and is stable with capacitive loads. The ZRC330 is recommended for operation between 20µA and 5mA and so is ideally suited to low power and battery powered applications.

Excellent performance is maintained to an absolute maximum of 25mA, however the rugged design and 20 volt processing allows the reference to withstand transient effects and currents up to 200mA. Superior switching capability allows the device to reach stable operating conditions in only a few microseconds.

Features

- Small outline SOT23 package
- No stabilizing capacitor required
- Low knee current, 15µA typical
- Typical slope resistance 0.6Ω
- ± 3%, ± 2% and 1% tolerance
- Industrial temperature range
- Operating current 20µA to 5mA
- Green molding compound (No Br, Sb)

Applications

- Battery powered and portable equipment.
- Metering and measurement systems
- Instrumentation
- Test equipment
- Data acquisition systems
- Precision power supplies
- Crystal oscillators

PRECISION 3.3VOLT LOW KNEE CURRENT VOLTAGE REFERENCE

Absolute Maximum Ratings

Parameter	Rating	Unit
Reverse Current	25	mA
Forward Current	25	mA
Operating Temperature	-40 to 85	°C
Storage Temperature	-55 to 125	°C
Power Dissipation (T _{AMB} = 25°C) SOT23	330	mW

Electrical Characteristics (Test conditions: T_{AMB} = 25°C, unless otherwise specified.)

Symbol	Parameter	Condition	Min.	Typ.	Max.	Tol. (%)	Unit
V _R	Reverse breakdown voltage	I _R = 150µA	3.27 3.234 3.201	3.3 3.3 3.3	3.33 3.366 3.399	1 2 3	V
I _{MIN}	Minimum operating current			15	20		µA
I _R	Recommended operating current		0.02		5		mA
T _C ^(*)	Average reverse breakdown voltage temperature coefficient	I _{R(MIN)} to I _{R(MAX)}		15	50		ppm/°C
R _S ^(†)	Slope resistance			0.6	2		Ω
Z _R	Reverse dynamic impedance	I _R = 1mA f = 100Hz I _{AC} = 0.1I _R		0.5	1.2		Ω
E _N	Wideband noise voltage	I _R = 150µA f = 10Hz to 10kHz		75			µV(rms)

Note:

$$(*) T_C = \frac{(V_{R(MAX)} - V_{R(MIN)}) \times 1000000}{V_R \times (T_{(MAX)} - T_{(MIN)})}$$

Note: V_{R(MAX)} - V_{R(MIN)} is the maximum deviation in reference voltage measured over the full operating temperature range

$$(†) R_S = \frac{V_R \text{ Change}(I_{R(MIN)} \text{ to } I_{R(MAX)})}{I_{R(MAX)} - I_{R(MIN)}}$$

Diodes Incorporated does not warrant or accept any liability whatsoever in respect of any products purchased through unauthorized sales channel.

Should Customers purchase or use Diodes Incorporated products for any unintended or unauthorized application, Customers shall indemnify and hold Diodes Incorporated and its representatives harmless against all claims, damages, expenses, and attorney fees arising out of, directly or indirectly, any claim of personal injury or death associated with such unintended or unauthorized application.

Products described herein may be covered by one or more United States, international or foreign patents pending. Product names and markings noted herein may also be covered by one or more United States, international or foreign trademarks.

LIFE SUPPORT

Diodes Incorporated products are specifically not authorized for use as critical components in life support devices or systems without the express written approval of the Chief Executive Officer of Diodes Incorporated. As used herein:

A. Life support devices or systems are devices or systems which:

1. are intended to implant into the body, or
2. support or sustain life and whose failure to perform when properly used in accordance with instructions for use provided in the labeling can be reasonably expected to result in significant injury to the user.

B. A critical component is any component in a life support device or system whose failure to perform can be reasonably expected to cause the failure of the life support device or to affect its safety or effectiveness.

Customers represent that they have all necessary expertise in the safety and regulatory ramifications of their life support devices or systems, and acknowledge and agree that they are solely responsible for all legal, regulatory and safety-related requirements concerning their products and any use of Diodes Incorporated products in such safety-critical, life support devices or systems, notwithstanding any devices- or systems-related information or support that may be provided by Diodes Incorporated. Further, Customers must fully indemnify Diodes Incorporated and its representatives against any damages arising out of the use of Diodes Incorporated products in such safety-critical, life support devices or systems.
