**Capacitor Less Direct Headphone Driver /  
Line driver With Charge Pump & LDO  
Advanced Design Specification**

## General Description

The SY6040 is a stereo headphone drivers designed to allow the removal of the output DC blocking capacitors for reduced component count and cost. And it is composed to charge pump and LDO. The SY6040 is an ideal for small portable electronics where size and cost are critical design parameters. The SY6040 is capable of driving 18mW into a  $32\Omega$  load at 3.3V. The gain of the SY6040 is set by the Gain Control Pin. Charge pump & headphone's power is supplied by output of LDO.
