## 备注 Notes:

## 1. 超声波清洗 Ultrasonic cleaning

一般的清洁液或超声波清洗方法可以用来清洗我们的产品。但是，在某些情况下，超声波清洗机在我们产品的振荡频率上会产生共振，从而使器件的电气特性恶化，甚至损坏器件的整体结构。因此，建议超声波清洗前进行验证测试。General cleaning solutions or ultrasonic cleaning method may be used to clean our products. However, under certain circumstances, ultrasonic cleaning machine could generate resonance at the oscillation frequency of our products and thus deteriorate the electrical characteristics in devices, and even damage the overall structure of devices. Therefore, verification test is recommended before cleaning.

## 2. 超声波焊接 Ultrasonic welding

避免使用超声波焊接进行安装和加工，这种方法有可能使晶体产品内部产生过大的振动扩散，成为特性退化而不振动的的原因。Avoid mounting and processing by Ultrasonic welding this method has a possibility of an excessive vibration spreading inside the crystal products and becoming the cause of characteristic deterioration and not oscillating.

## 3. 储存温度说明 Storage temperature description

储存温度仅适用于产品，而包装材料储存温度  $5^{\circ}\text{C}\sim 40^{\circ}\text{C}$ 。Storage Temperature is only for the product itself, the temperature for the packing material is  $5^{\circ}\text{C}\sim 40^{\circ}\text{C}$ .

## 4. 手工焊建议条件 Recommended conditions for manual welding

温度： $350\pm 10^{\circ}\text{C}$ ，时间：3秒 Max，次数：2次 Max。Temperature:  $350\pm 10^{\circ}\text{C}$ , Time: 3 sec max, Re-solder times: twice max.
