Notes:

a. For design aid only; not subject to production testing.

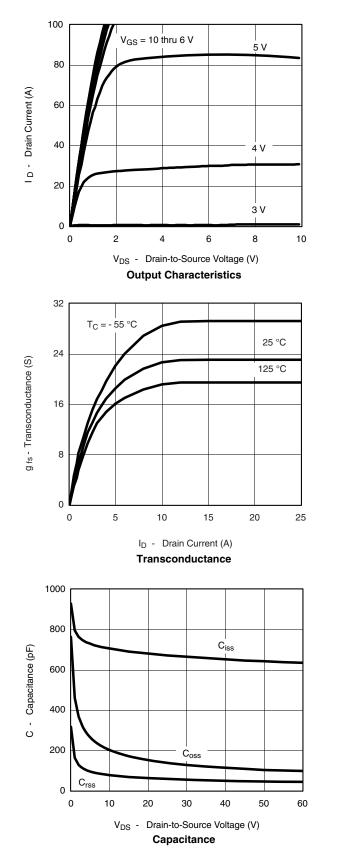

b. Pulse test; pulse width  $\leq$  300 µs, duty cycle  $\leq$  2 %.

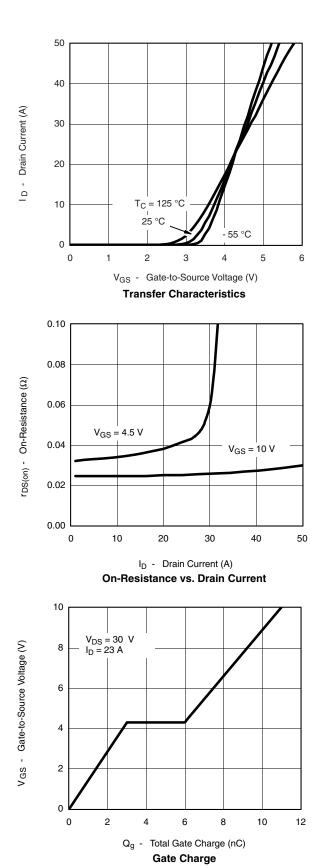

c. Independent of operating temperature.

Stresses beyond those listed under "Absolute Maximum Ratings" may cause permanent damage to the device. These are stress ratings only, and functional operation of the device at these or any other conditions beyond those indicated in the operational sections of the specifications is not implied. Exposure to absolute maximum rating conditions for extended periods may affect device reliability.
