

## 8CH Darlington Sink Driver

The HT2803A&HT2804A are high-voltage, high-current darlington drivers comprised of eight NPN darlington pairs.

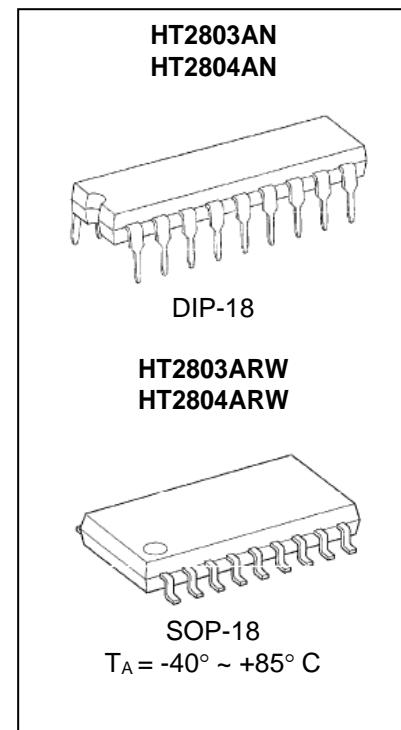

All units feature integral clamp diodes for switching indicative loads.

Application include relay, hammer, lamp and display (LED) drivers.

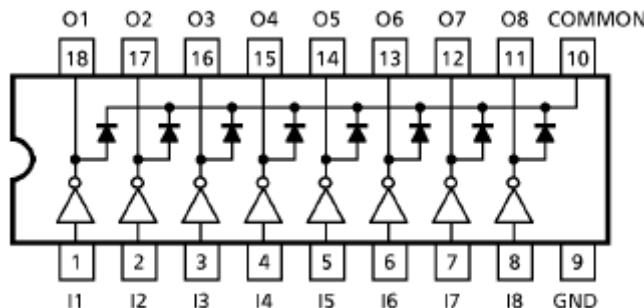

### Features

- Output current (single output)  
500mA (Max)
- Output clamp diodes
- Inputs compatible with various types of logic

| TYPE         | INPUT BASE RESISTOR | DESIGNATION      |
|--------------|---------------------|------------------|
| HT2803AN/ARW | 2.7kΩ               | TTL, 5V CMOS     |
| HT2804AN/ARW | 10.5kΩ              | 6~15V PMOS, CMOS |

\* Stresses beyond those listed under "absolute maximum ratings" may cause permanent damage to the device. These are stress ratings only and functional operation of the device at these or any other conditions beyond those indicated under "recommended operating conditions" is not implied. Exposure to absolute-maximum-rated conditions for extended periods may affect device reliability.

### Precautions for Using

Utmost care is necessary in the design of output line, COMMON and GND line since IC may be destroyed due to short-circuit between outputs, air contaminaton fault, or fault by improper grounding.
