Aluminum electrolytic capacitor Specification Sheet

35 ZLH 220 M TTI 8X11.5

Drawing No. : RER-211705

: 1

Issue No.

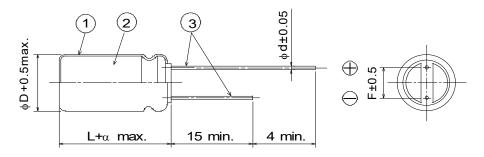

1.Scope

This specification covers polarized aluminum electrolytic capacitors with non-solid electrolyte for use in electronic equipments. Style: CE 04 (Radial Leaded)

2. Numbering System

Rated Voltage	Series	Capacitance	Capacitance Tolerance	Option	Lead Forming	Size
<u>35</u>	<u>ZLH</u>	<u>220</u>	<u>M</u>	<u>TTI</u>		<u>8X11.5</u>

3.Diagram of dimensions Unit: mm

Dimensions					
φD	L F		φd	α	
8	11.5	3.5	0.6	1.5	

1	Sleeve	P.E.T.		
2	Case	Aluminum		
3	Lead Wire	Copper clad steel wire	Tin plated	

A safety vent shall be provided.

4.Marking

Unless otherwise specified, capacitor shall be clearly marked the following items on its body. Sleeve color: Black, Lettering color: White

(1)Trade mark **Rubycon**

(2)Rated Voltage 35V (3)Nominal Capacitance 220µF

(4)Polarity (Negative Polarity)

(5)Series ZLH

(6)Lot Number

(7)Maximum Operating
Temperature
(8)PET sleeve mark

105°C

PET

5. Electrical Performance

Table-1

Operating Temperature Range		-40 ~105	(°C)
Nominal Capacitance	20°C, 120Hz	220	(µF)
Capacitance Tolerance		-20 ~ 20	(%)
Rated Voltage		35	(V.DC)
Surge Voltage		44	(V.DC)
Leakage Current	20°C, 2min.	77	(µA max.)
Dissipation Factor (tanδ)	20°C, 120Hz	0.12	(max.)
Rated Ripple Current	105°C, 100kHz	945	(mAr.m.s.)
Impedance Ratio 120Hz	Z-25°C/Z20°C	2	(max.)
	Z-40°C/Z20°C	3	(max.)
Impedance	20°C, 100kHz	0.056	(Ωmax.)
	-10°C, 100kHz	0.19	(Ωmax.)

Drawing No. : RER-211705

Aluminum electrolytic capacitor Specification Sheet

ZLH series Issue No. : 1

Notes on use of aluminum electrolytic capacitors

(1) Charge and discharge

Do not use for the circuit that repeats quick charge or discharge.

(2) External stress

Do not apply excessive force of pushing, pulling bending, and/or twisting to the main body, lead wire and terminals.

(3) Heat resistance at soldering process

In the soldering process of PC board with Capacitors mounted, secondary shrinkage or crack of sleeve may be observed when soldering temperature is too high and /or soldering time is too long.

If lead wire of other components or pattern of double sided PC board touches the capacitor, the similar failure may be also originated at pre-heating, heating at hardening process of adhesive and soldering process.

(4) Insulation and PC board mounting

Sleeve is for marking purpose only.

It is not recognized as insulation materials.

When double sided PC board is employed, note that it could cause a short circuit if lead wire of other components or pattern of double sided PC board touches capacitor. Please avoid circuit pattern runs underneath capacitor.

In addition, case and cathode terminal are not insulated.

(5) Adhesives and coating materials

Do not use the adhesives and coating materials that contain halogenated organic solvents or chloroprene as polymer.

(6) Storage

Keep at a normal temperature and humidity. During a long storage time, leakage current will be increased. To prevent heat rise or any trouble that high leakage current possibly causes, voltage treatment is recommended for the capacitors that have been stored for a long time.

(Storage Condition)

- *Aluminum electrolytic capacitors should not be stored in high temperatures or where there is a high level of humidity. The suitable storage condition is 5°C-35°C and less than 75% in relative humidity.
- *Aluminum electrolytic capacitors should not be stored in damp conditions such as water, saltwater spray or oil spray.
- *Do not store aluminum electrolytic capacitors in an environment full of hazardous gas (hydrogen sulfide, sulfurous acid gas, nitrous acid, chlorine gas, ammonia or bromine gas).
- *Aluminum electrolytic capacitors should not be stored under exposure to ozone, ultraviolet rays or radiation.

(7) Fumigation and halogenated flame retardant

It may cause corrosion of internal electrodes, aluminum cases and terminal surface when the following conditions exist.

- *Fumigation of wooden pallets before shipment to disinfect vermin.
- *Existence of components or parts that contain halogenated flame retardant agent (bromine etc.) together with capacitors.
- *When halogenated detergents of antiseptics for preventing infection of epidemic diseases contact directly to capacitors.

(8) PC board cleaning after soldering

Please consult us when cleaning is subjected.

*Guide to application except the above are described in our catalog and JEITA RCR-2367D (including any amendments).

JEITA RCR-2367D: "Safety application guide for fixed aluminum electrolytic capacitors for use in electronic equipment."
