

## 78M00 SERIES 500mA 3-TERMINAL POSITIVE LINEAR REGULATOR

### General Description

The 78M00 series are monolithic integrated circuits designed as fixed-voltage regulators for a wide variety of applications including local, on-card regulation.

This series of regulators are complete with internal current limiting, thermal shutdown protection, and safe-area compensation which make them virtually immune from output overload. If adequate heat sinking are provided, these regulators can deliver output currents up to 0.5A.

The 78M00 series are available in two standard plastic packages: TO-220-3 and TO-252-2 (1).

### Features

- Output Current up to 0.5A
- Fixed Output Voltages of 5V, 6V, 8V, 9V and 12V
- Output Voltage Tolerances of  $\pm 5\%$  over the Full Temperature Range
- Internal Short Circuit Current-limiting
- Internal Thermal Overload Protection

### Applications

- Consumer Electronics
- Microprocessor Power Supply
- Mother Board I/O Power Supply
