

ESDU5V0ADF

Transient Voltage Suppressor

Descriptions

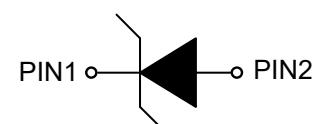

Designed to protect voltage sensitive electronic components that may be subjected to ESD (Electrostatic Discharge), EFT (Electrical Fast Transients) and Lightning. Excellent clamping capability, low leakage, low capacitance, and fast response time provide best in class protection on designs that are exposed to ESD.

It is particularly well-suited for cellular phones, portable device, digital cameras, power supplies and many other portable applications because of its small package and low weight.

The ESDU5V0ADF is available in DFN1x0.6-2L package. Standard products are Pb-free and Halogen-free.
