

## CJH1311

### General Description

CJH1311 is a micropower, ultra sensitive, uni-polar hall effect switch. It is mainly designed for battery-powered, hand held equipment. CJH1311 includes hall sensor, a small-signal amplifier, dynamic offset cancellation and CMOS output. Superior high-temperature performance is made possible through Dynamic Offset Cancellation, which reduces the residual offset voltage normally caused by device package over molding, temperature dependencies, and thermal stresses.

North pole of sufficient strength will turn the output on.

CJH1311 is available in SOT-23-3L packages. The operating temperature is  $-40^{\circ}\text{C}$  to  $150^{\circ}\text{C}$ .

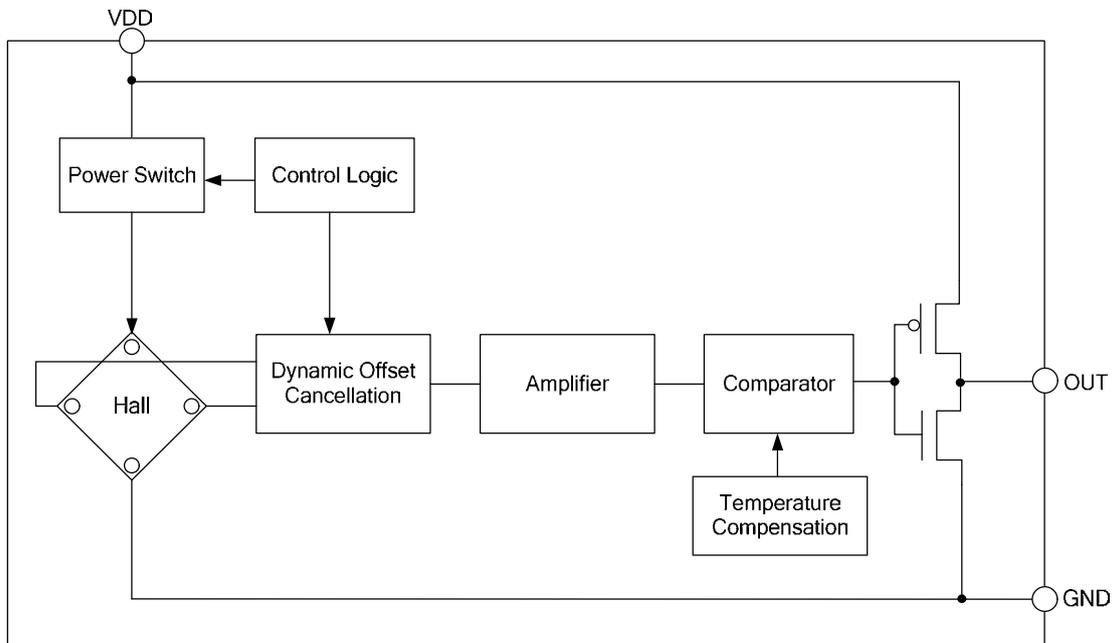

### Features
