■ Reflow soldering instructions

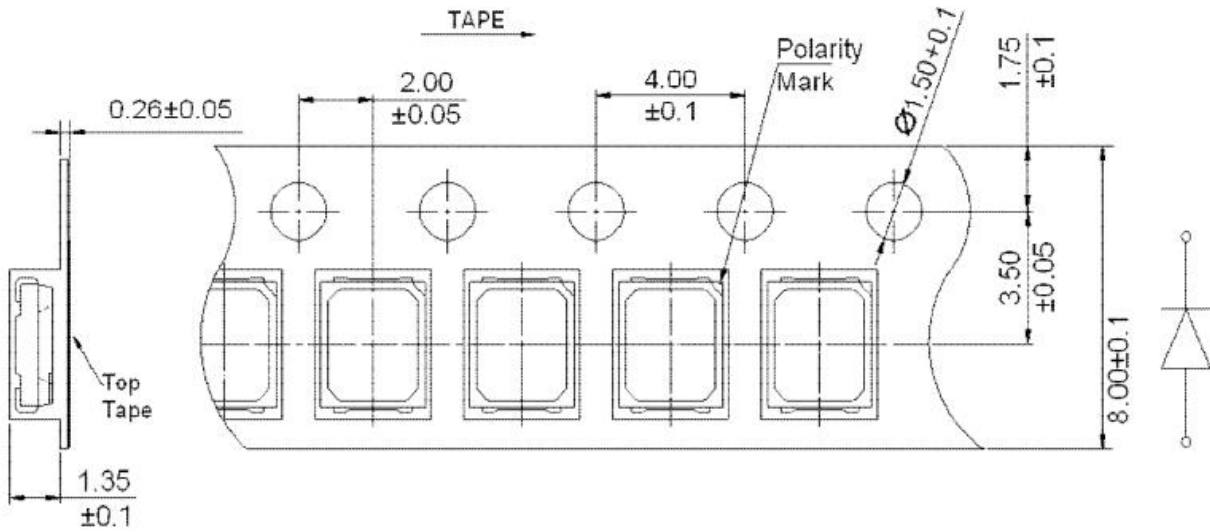

- 1、Reflow soldering is recommended to the use of clean free flux, and in accordance to the reflow curve. Maximum number of soldering is limited
- 2、When soldering, do not exert pressure during heating process.

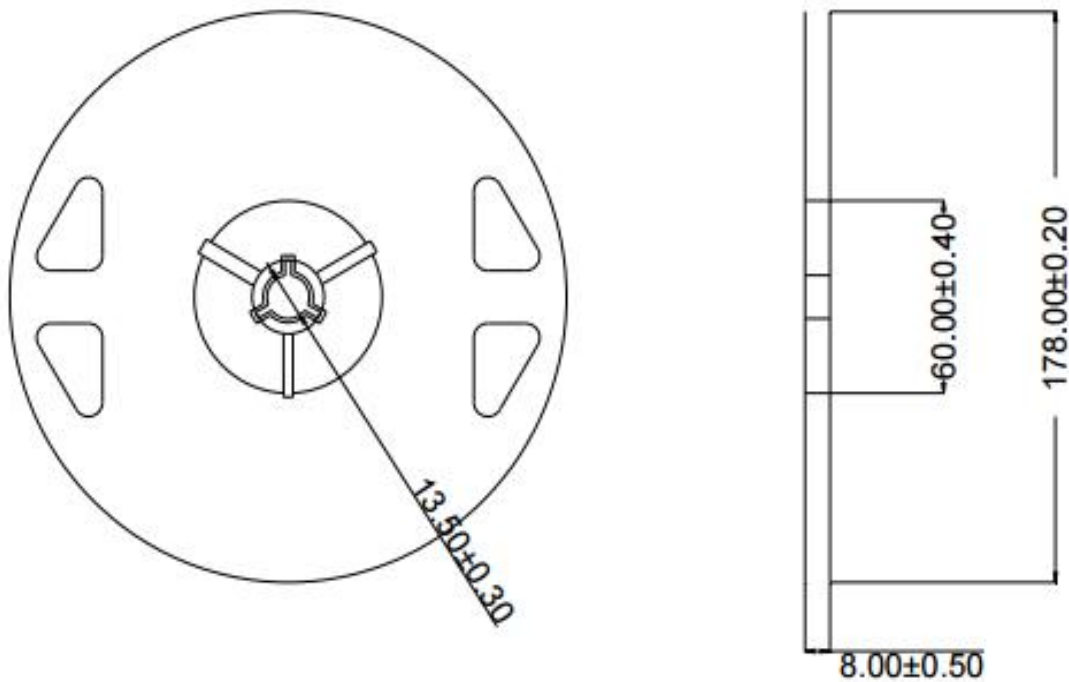

■ Soldering

- 1、When manual soldering iron is used, it is recommended to use 20W anti-electro static soldering iron, soldering temperature must be kept below 360°C / 3 seconds, 1Time soldering only
- 2、Do not mix different BIN materials on the same board, otherwise it will cause LED color Variation

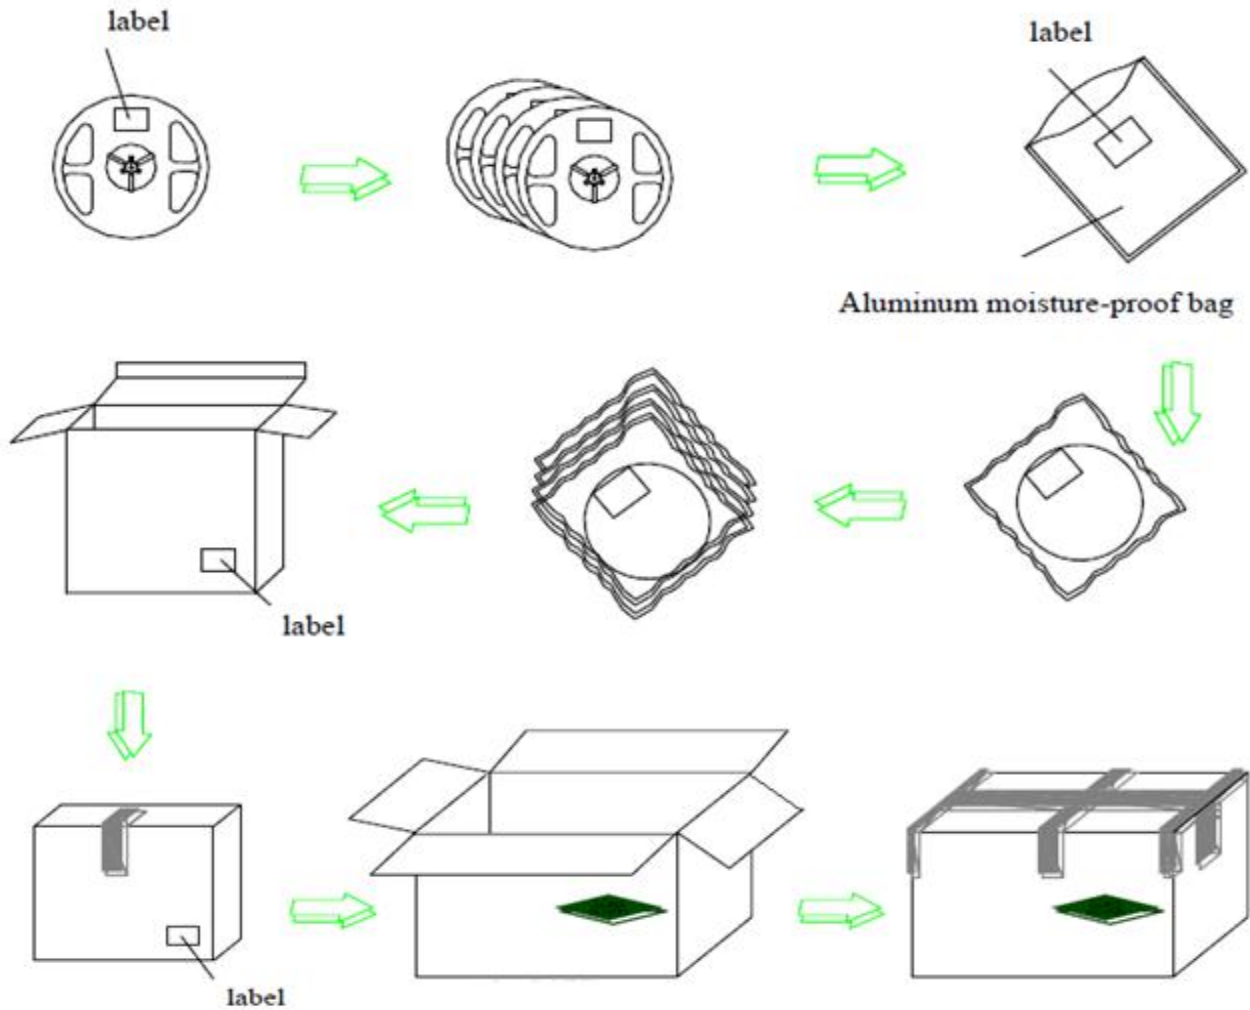

■ Taping Specifications (Unit: mm)

■ Reel Size (Unit: mm)

■ Humidity Proof packaging

Note:

Pressure affects the reliability of light emitting diodes. In such circumstances, the assembly of organic silicon encapsulated LED products must comply with the appropriate measures to deal with. Avoid any pressure applied to any part of the LED and use pneumatic nozzle. Otherwise it may lead to reduction in reliability, and impact of its life to the LED
