

SOTiny[™] Low Voltage Dual SPDT Analog Switch 2:1 Mux/DeMux Bus Switch

Features

- → CMOS Technology for Bus and Analog Applications
- \rightarrow Low On-Resistance: 8 Ω at 3.0V
- → Wide V_{DD} Range: 1.65V to 5.5V
- → Rail-to-Rail Signal Range
- → Control Input Overvoltage Tolerance: 5.5V min.
- → Fast Transition Speed: 5.2ns max. at 5V
- → High Off Isolation: 57dB at 10MHz
- → 54dB (10MHz) Crosstalk Rejection Reduces Signal Distortion
- → Break-Before-Make Switching
- → High Bandwidth: 250 MHz
- → Extended Industrial Temperature Range: -40°C to 85°C
- → Improved Direct Replacement for NC7SB3157
- → Totally Lead-Free & Fully RoHS Compliant (Notes 1 & 2)
- → Halogen and Antimony Free. "Green" Device (Note 3)
- → Packaging (Pb-free & Green available):
 - 6-pin SC70 (C)

Pin Description

Pin Number	Name	Description
1	B1	Data port
2	GND	Ground
3	B ₀	Data port (Normally Closed)
4	А	Common Output/Data port
5	V _{CC}	Positive Power Supple
6	S	Logic Controll

Logic Function Table

Logic Input(s)	Function
0	B ₀ Connection to A
1	B ₁ Connected to A

Description

The PI5A3157 is a high-bandwidth, fast single-pole double-throw (SPDT) CMOS switch. It can be used as an analog switch or as a low-delay bus switch. Specified over a wide operating power supply voltage range, 1.65V to 5.5V, the PI5A3157 has a maximum ON resistance of 12-ohms at 1.65V, 9-ohms at 2.3V & 6-ohms at 4.5V.

Break-before-make switching prevents both switches being enabled simultaneously. This eliminates signal disruption during switching.

The control input, S, tolerates input drive signals up to 5.5V, independent of supply voltage.

PI5A3157 is an improved direct replacement for the NC7SB3157.

Applications

- \rightarrow Cell Phones
- → PDAs
- → Portable Instrumentation
- → Battery Powered Communications
- → Computer Peripherals

Connection Diagram

Notes:

2. See https://www.diodes.com/quality/lead-free/ for more information about Diodes Incorporated's definitions of Halogen- and Antimony-free, "Green" and Lead-free. 3. Halogen- and Antimony-free "Green" products are defined as those which contain <900ppm bromine, <900ppm chlorine (<1500ppm total Br + Cl) and <1000ppm antimony compounds.

^{1.} No purposely added lead. Fully EU Directive 2002/95/EC (RoHS), 2011/65/EU (RoHS 2) & 2015/863/EU (RoHS 3) compliant.

Notes:

1. Absolute Maximum Ratings" may cause permanent damage to the device. This is a stress only rating and operation of the device at these or any other conditions beyond those indicated in the operational sections of this specification is not implied.

2. The input and output negative voltage ratings may be exceeded if the inut and output diode current ratings are observed.

3. Control input must be held HIGH or LOW; it must not float.

DC Electrical Characteristics Cont. (Over the Operating temperature range, $T_A = -40^{\circ}$ C to 85°C)

Notes:

4. Measured by voltage drop between A and B pins at the indicated current through the device. On-Resistance is determined by the lower of the voltages on two ports (A or B).

Parameter is characterized but not tested in production. 5.

6. $\Delta R_{ON} = R_{ON} \max - R_{ON} \min$. measured at identical V_{DD}, temperature and voltage levels.

Flatness is defined as difference between maximum and minimum value of On-Resistance over the specified range of conditions. 7.

8. Guaranteed by design.

Notes:

9. Guaranteed by design.

11. Off Isolation = 20 Log_{10} [V_A / V_{Bn}] and is measured in dB.

12. $T_A = 25^{\circ}C$, f = 1MHz. Capacitance is characterized but not tested in production.

^{10.} Guaranteed by design but not production tested. The device contributes no other propagation delay other than the RC delay of the switch On-Resistance and the 50pF load capacitance, whne driven by an ideal voltage source with zero output impedance.

antimony compounds. 4. E = Pb-free and Green

5. X suffix = Tape/Reel

IMPORTANT NOTICE

DIODES INCORPORATED MAKES NO WARRANTY OF ANY KIND, EXPRESS OR IMPLIED, WITH REGARDS TO THIS DOCUMENT, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE (AND THEIR EQUIVALENTS UNDER THE LAWS OF ANY JURISDICTION).

Diodes Incorporated and its subsidiaries reserve the right to make modifications, enhancements, improvements, corrections or other changes without further notice to this document and any product described herein. Diodes Incorporated does not assume any liability arising out of the application or use of this document or any product described herein; neither does Diodes Incorporated convey any license under its patent or trademark rights, nor the rights of others. Any Customer or user of this document or products described herein in such applications shall assume all risks of such use and will agree to hold Diodes Incorporated and all the companies whose products are represented on Diodes Incorporated website, harmless against all damages.

Diodes Incorporated does not warrant or accept any liability whatsoever in respect of any products purchased through unauthorized sales channel.

Should Customers purchase or use Diodes Incorporated products for any unintended or unauthorized application, Customers shall indemnify and hold Diodes Incorporated and its representatives harmless against all claims, damages, expenses, and attorney fees arising out of, directly or indirectly, any claim of personal injury or death associated with such unintended or unauthorized application.

Products described herein may be covered by one or more United States, international or foreign patents pending. Product names and markings noted herein may also be covered by one or more United States, international or foreign trademarks.

This document is written in English but may be translated into multiple languages for reference. Only the English version of this document is the final and determinative format released by Diodes Incorporated.

LIFE SUPPORT

Diodes Incorporated products are specifically not authorized for use as critical components in life support devices or systems without the express written approval of the Chief Executive Officer of Diodes Incorporated. As used herein:

A. Life support devices or systems are devices or systems which:

1. are intended to implant into the body, or

2. support or sustain life and whose failure to perform when properly used in accordance with instructions for use provided in the labeling can be reasonably expected to result in significant injury to the user.

- B. A critical component is any component in a life support device or system whose failure to perform can be reasonably expected to cause the
- failure of the life support device or to affect its safety or effectiveness.

Customers represent that they have all necessary expertise in the safety and regulatory ramifications of their life support devices or systems, and acknowledge and agree that they are solely responsible for all legal, regulatory and safety-related requirements concerning their products and any use of Diodes Incorporated products in such safety-critical, life support devices or systems, notwithstanding any devices- or systems-related information or support that may be provided by Diodes Incorporated. Further, Customers must fully indemnify Diodes Incorporated and its representatives against any damages arising out of the use of Diodes Incorporated products in such safety-critical, life support devices or systems.
