Features

Heavy-Duty Extension Cable Connects Devices That Require a Heavy-Gauge ConnectionThis heavy-duty extension cord with breaker features 10 AWG wire suitable for high power connections, making it a reliable solution for large server applications that require a higher-rated, heavier-gauge cable. It comes with a built-in metal 20-amp breaker box, which allows you to transform a NEMA L5-30R wall outlet into a NEMA L5-20R outlet. It is also a recommended replacement or upgrade of a standard power cord provided by the device's manufacturer. The 2-ft. (0.61 m) length helps reduce cable clutter and minimize the risk of tripping.

Locking Connectors Help Prevent Accidental Disconnection and Expensive Downtime Having a cable come loose accidentally can mean the loss of power and costly downtime. Locking connectors on each end help you avoid such danger, protecting critical equipment by maintaining a secure link without failure. The locking cable is also invaluable when moving equipment in a rack or removing equipment from tight areas, ensuring the power cord always stays connected.
