Description

L-com's LCCA30364-FT6 is a SMA male right angle to BNC male cable assembly using RG223 coax, 6 FT and ships same-day. The RG223 coax of this SMA cable uses the PE dielectric with a VoP of 66%. These flexible RF cable assemblies are ideal for applications where flexure is required. Our L-com SMA to BNC cable assembly has a male to male gender configuration with flexible RG223 series coax and operates to 4 GHz. The double shield of this SMA cable is layered by silver plated copper braid over silver plated copper braid. This right angle SMA cable interface on the RG223 coax allows for easier connections in tight spaces.

Custom versions of this SMA male to SMA male cable, along with the rest of L-com's other RF assemblies, can also be built and shipped same day. Other available RF cable assembly value added services from L-com include connector orientation or clocking, heat shrink booting and custom labeling. RF testing can also be performed to document the electrical performance of your cable assembly. Contact a sales representative for testing or custom RF cable quotes.
