Description

L-com's LCCA30386-FT6 is a low loss MMCX plug to SMA male right angle cable assembly using 100 series coax, 6 FT and ships same-day. The CA-100 coax of this MMCX cable uses the PE dielectric with a VoP of 66%, resulting in very low insertion loss compared to solid dielectrics. These flexible RF cable assemblies are ideal for applications where flexure is required. Our L-com MMCX to SMA cable assembly has a plug to male gender configuration with flexible CA-100 series coax and operates to 5.8 GHz. The double shield of this MMCX cable is layered by tinned copper braid over aluminum tape providing shielding effectiveness greater than 90dB. This right angle SMA cable interface on the CA-100 coax allows for easier connections in tight spaces.

Custom versions of this MMCX plug to MMCX male cable, along with the rest of L-com's other RF assemblies, can also be built and shipped same day. Other available RF cable assembly value added services from L-com include connector orientation or clocking, heat shrink booting and custom labeling. RF testing can also be performed to document the electrical performance of your cable assembly. Contact a sales representative for testing or custom RF cable quotes.
