This specification applies to Aluminum electrolytic capacitor (foil type) used in electronic equipment.  
Designed capacitor's quality meets IEC 60384.

## 5、Construction

| Material name | Composition                         | Supplier name        |
|---------------|-------------------------------------|----------------------|
| Lead          | Al and (Fe+Cu+Sn)                   | NM、JX                |
| Rubber        | EPT / IIR                           | LHX、LA、TH、LM2        |
| Case          | Aluminum                            | OX、YJ、HL、LY2         |
| Paper         | Wood / Fibrous plant materials      | KE、DF                |
| Anode foil    | Al + Al <sub>2</sub> O <sub>3</sub> | HY1、HY2、HF、HY3、LD、FQ |
| Cathode foil  | Aluminum                            | GY、LY1               |
| Electrolyte   | Glycol + Water + Ammonium salt      | XZB、LM1、JZ2、FS       |
| Sleeve        | PET                                 | YL、CY                |

## 6、Product Marking

### Marking Sample:

### Marking Details:

Capacitor shall be marked the following items:

- 1) Trademark (BERYL)
- 2) working voltage(400V)
- 3) Nominal capacitance(33uF)
- 4) Cathode marked
- 5) Series symbol & Nominal capacitance tolerance (M: -20% ~ +20%)
- 6) Sleeve material(E: PET)  
Maximum operating temperature(105°C)
- 7) Date code (2150)

21: Manufactured year 2021

| Code | 19   | 20   | 21   | 22   | 23   | 24   | 25   | 26   | ..... |
|------|------|------|------|------|------|------|------|------|-------|
| Year | 2019 | 2020 | 2021 | 2022 | 2023 | 2024 | 2025 | 2026 | ..... |

34: Manufactured week (01、02、03、04.....52)

## 7、Characteristics

### Standard atmospheric conditions

Unless other specified, the standard range of atmospheric conditions for making measurements and tests is as follows:

Ambient temperature : 15°C to 35°C

Relative humidity : 45% to 85%

Air pressure : 86kPa to 106kPa

If there is any doubt about the results, measurement shall be made within the following conditions:

Ambient temperature : 20°C ± 2°C

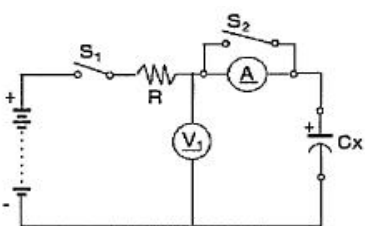

Relative humidity : 60% to 70%

Air pressure : 86kPa to 106kPa

### Operating temperature range

The ambient temperature range at which the capacitor can be operated continuously at rated voltage is (6.3~450WV) -40°C to +105°C .

**Table**

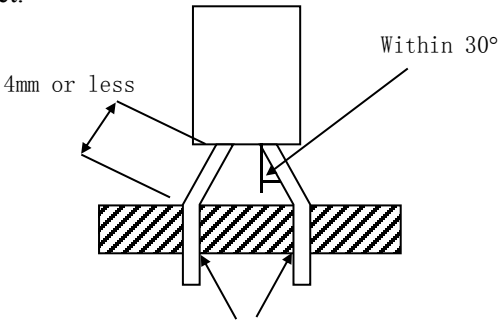

| ITEM |                                 | PERFORMANCE  |
|------|---------------------------------|--|
| 1    | Nominal capacitance (Tolerance) | <p>&lt;Condition&gt;<br/>           Measuring Frequency: 120Hz±12Hz<br/>           Measuring Voltage: Not more than 0.5Vrms +1.5~2.0V.DC<br/>           Measuring Temperature: 20±2°C</p> <p>&lt;Criteria&gt;<br/>           Shall be within the specified capacitance tolerance.</p>  |
| 2    | Leakage current                 | <p>&lt;Condition&gt;<br/>           Connecting the capacitor with a protective resistor (1kΩ±10Ω) in series for 2 minutes, and then, measure leakage current.</p> <p>&lt;Criteria&gt;<br/>           I: Leakage current (μA)<br/> <math>I (\mu A) \leq 0.02CV + 10 (\mu A)</math>,<br/>           measurement circuit refer to right drawing.<br/>           C: Capacitance (μF)<br/>           V: Rated DC working voltage (V)</p>  |
| 3    | Dissipation factor              | <p>&lt;Condition&gt;<br/>           Nominal capacitance, for measuring frequency, voltage and temperature.</p> <p>&lt;Criteria&gt;<br/>           Must be within the parameters (See page 3)</p>   |

| ITEM                   |   | PERFORMANCE  |                        |  |                    |                               |                    |   |            |   |      |      |                 |    |    |    |     |        |      |      |      |      |
|------------------------|---|--|------------------------|--|--------------------|-------------------------------|--------------------|---|------------|---|------|------|-----------------|----|----|----|-----|--------|------|------|------|------|
| 4                      | Impedance   | <p>&lt;Condition&gt;<br/>Measuring frequency:100kHz; Measuring temperature:20±2℃<br/>Measuring point: 2mm max. from the surface of a sealing rubber on the lead wire.</p> <p>&lt;Criteria&gt;<br/>(20℃) Must be within the parameters (See page 3)</p>   |                        |  |                    |                               |                    |   |            |   |      |      |                 |    |    |    |     |        |      |      |      |      |
| 5                      | Load life test  | <p>&lt;Condition&gt;<br/>According to IEC60384-4No. 4.13 methods, the capacitor is stored at a temperature of Maximum operating temperature ±2℃ with DC bias voltage plus the rated ripple current for Rated life +48/0hours. (The sum of DC and ripple peak voltage shall not exceed the rated working voltage) Then the product should be tested after 16 hours recovering time at atmospheric conditions. The result should meet the following table:</p> <p>&lt;Criteria&gt;<br/>The characteristic shall meet the following requirements.</p> <table><tr><td>Leakage current</td><td>Not more than the specified value.</td></tr><tr><td>Capacitance Change</td><td>Within ±20% of initial value.</td></tr><tr><td>Dissipation Factor</td><td>Not more than 200%of the specified value.</td></tr><tr><td>Appearance</td><td>There shall be no leakage of electrolyte.</td></tr></table> | Leakage current        | Not more than the specified value.       | Capacitance Change | Within ±20% of initial value. | Dissipation Factor | Not more than 200%of the specified value. | Appearance | There shall be no leakage of electrolyte. |      |      |                 |    |    |    |     |        |      |      |      |      |
| Leakage current        | Not more than the specified value.                            |  |                        |  |                    |                               |                    |   |            |   |      |      |                 |    |    |    |     |        |      |      |      |      |
| Capacitance Change     | Within ±20% of initial value.                                 |  |                        |  |                    |                               |                    |   |            |   |      |      |                 |    |    |    |     |        |      |      |      |      |
| Dissipation Factor     | Not more than 200%of the specified value.                     |  |                        |  |                    |                               |                    |   |            |   |      |      |                 |    |    |    |     |        |      |      |      |      |
| Appearance             | There shall be no leakage of electrolyte.                     |  |                        |  |                    |                               |                    |   |            |   |      |      |                 |    |    |    |     |        |      |      |      |      |
| 6                      | Shelf life test   | <p>&lt;Condition&gt;<br/>The capacitors are then stored with no voltage applied at a temperature of Maximum operating temperature±2℃ for1000+48/0 hours. Following this period, the capacitors shall be removed from the test chamber and be allowed to stabilized at room temperature for16 hours. measure leakage current</p> <p>&lt;Criteria&gt;<br/>The characteristic shall meet the following requirements.</p> <table><tr><td>Leakage current</td><td>Not more than 200%of the specified value</td></tr><tr><td>Capacitance Change</td><td>Within ±20% of initial value.</td></tr><tr><td>Dissipation Factor</td><td>Not more than 200%of the specified value.</td></tr><tr><td>Appearance</td><td>There shall be no leakage of electrolyte.</td></tr></table>  | Leakage current        | Not more than 200%of the specified value | Capacitance Change | Within ±20% of initial value. | Dissipation Factor | Not more than 200%of the specified value. | Appearance | There shall be no leakage of electrolyte. |      |      |                 |    |    |    |     |        |      |      |      |      |

## 8、 Packing Information

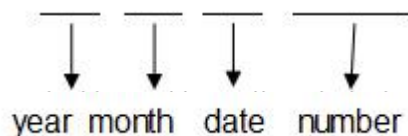

Packing Label Marked (the following items shall be marked on the label)

(Inside box or bag)

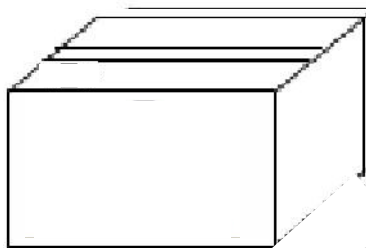

(1) Clint order number (2) Client part number (3) Beryl part number (4) Capacitance (5) Voltage (6) Dimension (7) Packaging quantity (8) Capacitance tolerance (9) QC Marking (10) Lot number (11) Series

LOT Number :

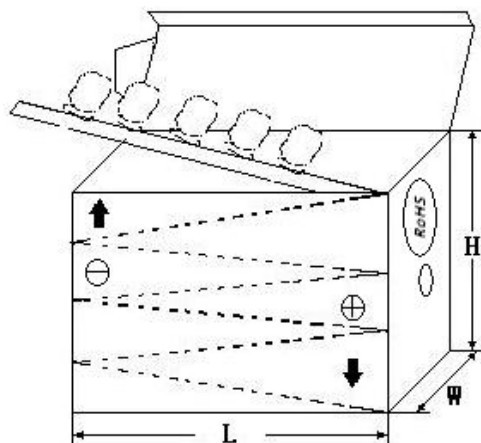

12 34 56 7 8 9 10

  
 year month date number

### 1) Bulk Packing:

### 2) Taped Packing:

### 3) Outer box

外箱

### 4) Outer box label:
