NSSHNBO

RP200x SERIES

3-MODE 300mA LDO REGULATOR

NO.EA-182-230419

OUTLINE

The RP200x Series consist of CMOS-based voltage regulator ICs with high output voltage accuracy, low dropout voltage and low supply current. These ICs perform with the chip enable function and realize a standby mode with ultra low supply current. To prevent the destruction by over current, the current limit circuit is included. The RP200x Series have 3-mode. One is standby mode with CE pin. Other two modes are realized with ECO Function. Fast Response Mode (Fast Mode) and Fast and Low Power auto-change Mode (Auto ECO Mode) are alternative with Auto Eco pin (AE pin). Supply current of IC itself at light load is automatically reduced at Auto ECO Mode compared with Fast Mode. The output voltage is maintained between Fast Mode and Auto ECO Mode.

Without AE pin type is also available. It is an LDO regulator with Auto ECO mode. (RP200Z in WLCSP.) Since the packages for these ICs are SOT-23-5, SC-88A, thin DFN(PL)1212-6, and WLCSP-4-P5, high density mounting of the ICs on boards is possible. RP200Q (SC-88A), RP200K (DFN(PL)1212-6) and RP200N (SOT-23-5) has AE pin, then if the AE pin is "H", Fast Mode is available. If the AE pin is set at "L" level, Auto ECO Mode operation is available.

FEATURES

- Supply Current (Low power Mode)Typ. 1.0 μ A (Vout \leq 1.85V)
- Supply Current (Fast Mode)......Typ. 55µA
- Supply Current (Standby Mode)Typ. 0.1 μA
- Ripple Rejection......Typ. 70dB (f=1kHz)
- Input Voltage Range
 1.4V to 5.25V
- Output Voltage Range......0.8V to 4.0V (0.1V steps)
 - (For other voltages, please refer to MARK INFORMATIONS.)
- Output Voltage Accuracy......±1.0% (Vout > 2.0V, Topt=25°C)

- Ceramic capacitors are recommended......1.0µF

APPLICATIONS

- Power source for portable communication equipment.
- Power source for electrical appliances such as cameras, VCRs and camcorders.
- Power source for battery-powered equipment.

SELECTION GUIDE

The output voltage, auto discharge function, and package, etc. for the ICs can be selected at the user's request.

Product Name	Package	Quantity per Reel	Pb Free	Halogen Free			
RP200Zxx1*-TR-F	WLCSP-4-P5	5,000 pcs	Yes	Yes			
RP200Kxx1*-TR	DFN(PL)1212-6	5,000 pcs	Yes	Yes			
RP200Qxx2*-TR-FE	SC-88A	3,000 pcs	Yes	Yes			
RP200Nxx1*-TR-FE	SOT-23-5	3,000 pcs	Yes	Yes			
xx: The output voltage can be designated in the range from 0.8V(08) to 4.0V(40) in 0.1V steps. (For other voltages, please refer to MARK INFORMATIONS.) * : The auto discharge function at off state are options as follows. (B) without auto discharge function at off state							

(D) with auto discharge function at off state

PIN CONFIGURATIONS

NO.EA-182-230419

• WLCSP-4-P5

Pin No	Symbol	Pin Description
A1	Vdd	Input Pin
A2	Vout	Output Pin
B1	CE	Chip Enable Pin ("H" Active)
B2	GND	Ground Pin

• DFN(PL)1212-6

Pin No	Symbol	Pin Description	
1	AE	Auto ECO Pin	
2	GND	Ground Pin	
3	CE	Chip Enable Pin ("H" Active)	
4	Vdd	Input Pin	
5	NC	No Connection	
6	Vout	Output Pin	

• SC-88A

Pin No	Symbol	Pin Description
1	AE	Auto ECO Pin

ABSOLUTE MAXIMUM RATINGS

Symbol	Item	Rating	Unit
VIN	Input Voltage	6.0	V
VCE	Input Voltage (CE Pin)	-0.3 to 6.0	V
VAE	Input Voltage (AE Pin)	-0.3 to 6.0	V
Vout	Output Voltage	-0.3 to VIN+0.3	V
Ιουτ	Output Current	400	mA
	Power Dissipation (WLCSP-4-P5) *	278	
5	Power Dissipation (DFN(PL)1212-6) *	400	m\\/
PD	Power Dissipation (SC-88A) *	380	mW
	Power Dissipation (SOT-23-5) *	420	
Topt	Operating Temperature Range	-40 to 85	°C
Tstg	Storage Temperature Range	-55 to 125	°C

*) For Power Dissipation, please refer to PACKAGE INFORMATION.

ABSOLUTE MAXIMUM RATINGS

Electronic and mechanical stress momentarily exceeded absolute maximum ratings may cause the permanent damages and may degrade the life time and safety for both device and system using the device in the field. The functional operation at or over these absolute maximum ratings is not assured.

ELECTRICAL CHARACTERISTICS

 $V_{\text{IN}} = \text{Set V}_{\text{OUT}} + 1V, \text{ I}_{\text{OUT}} = 1\text{mA}, \text{ C}_{\text{IN}} = \text{C}_{\text{OUT}} = 1\mu\text{F}, \text{ unless otherwise noted}.$ The specification in ______ is checked and guaranteed by design engineering at $-40^{\circ}\text{C} \leq T_{\text{opt}} \leq 85^{\circ}\text{C}.$

ICEPD	CE Pull-down Constant Current					0.1		μA
VCEH	CE Input Voltage "H"				1.0			V

NO.EA-182-230419

Symbol	Item	Conditions	Min.	Тур.	Max.	Unit
VCEL	CE Input Voltage "L"				0.4	V
IAEPD	AE Pull-down Constant Current ^{*3}			0.1		μA
Vaeh	AE Input Voltage "H"*3		1.0			V
VAEL	AE Input Voltage "L"*3				0.4	V
RLOW	Low Output Nch Tr. ON Resistance (of D version)	VIN=4.0V, VCE=0V		50		Ω

All of units are tested and specified under load conditions such that Tj≈Topt=25°C except for Ripple Rejection, Output Voltage Temperature Coefficient.

- *1) The value of supply current is excluding the Pull-down constant current of CE Pin and AE Pin.
- *2) The maximum Input Voltage of the ELECTRICAL CHARACTERISTICS is 5.25V. In case of exceeding this specification, the IC must be operated on condition that the Input Voltage is up to 5.5V and the total operating time is within 500hrs.
- *3) Applied to RP200K/N/Q

RECOMMENDED OPERATING CONDITIONS (ELECTRICAL CHARACTERISTICS)

All of electronic equipment should be designed that the mounted semiconductor devices operate within the recommended operating conditions. The semiconductor devices cannot operate normally over the recommended operating conditions, even if when they are used over such conditions by momentary electronic noise or surge. And the semiconductor devices may receive serious damage when they continue to operate over the recommended operating conditions.

TYPICAL APPLICATION

(External Components) C1, C2 : Ceramic Capacitor 1.0μF

MURATA: GRM155B31A105KE15

TECHNICAL NOTES

When using these ICs, consider the following points:

Phase Compensation

In these ICs, phase compensation is made for securing stable operation even if the load current is varied. For this purpose, use a capacitor C2 with 1.0μ F or more and good ESR (Equivalent Series Resistance).

(Note: If additional ceramic capacitors are connected with parallel to the output pin with an output capacitor for phase compensation, the operation might be unstable. Because of this, test these ICs with as same external components as ones to be used on the PCB.)

PCB Layout

Make V_{DD} and GND lines sufficient. If their impedance is high, noise pickup or unstable operation may result. Connect a capacitor C1 with a capacitance value as much as 1.0μ F or more between V_{DD} and GND pin, and as close as possible to the pins.

Set external components, especially the output capacitor C2, as close as possible to the ICs, and make wiring as short as possible.

Impedance of Input Pin (CE Pin and AE Pin)

In those ICs, there is a pull-down constant current in the CE Pin and the AE Pin.

However, if those pins are floating and wired long that produce the noise environment, it might miss-operation of ICs. For this purpose, please make sure enough evaluation of ICs.

ESR vs. Output Current

Ceramic type output capacitor is recommended for this series; however, the other output capacitors with low ESR also can be used. The relations between I_{OUT} (Output Current) and ESR of an output capacitor are shown below. The conditions when the white noise level is under $40\mu V$ (Avg.) are marked as the hatched area in the graph.

- 1. The products and the product specifications described in this document are subject to change or discontinuation of production without notice for reasons such as improvement. Therefore, before deciding to use the products, please refer to our sales representatives for the latest information thereon.
- 2. The materials in this document may not be copied or otherwise reproduced in whole or in part without the prior written consent of us.
- 3. This product and any technical information relating thereto are subject to complementary export controls (so-called KNOW controls) under the Foreign Exchange and Foreign Trade Law, and related politics ministerial ordinance of the law. (Note that the complementary export controls are inapplicable to any application-specific products, except rockets and pilotless aircraft, that are insusceptible to design or program changes.) Accordingly, when exporting or carrying abroad this product, follow the Foreign Exchange and Foreign Trade Control Law and its related regulations with respect to the complementary export controls.
- 4. The technical information described in this document shows typical characteristics and example application circuits for the products. The release of such information is not to be construed as a warranty of or a grant of license under our or any third party's intellectual property rights or any other rights.
- 5. The products listed in this document are intended and designed for use as general electronic components in standard applications (office equipment, telecommunication equipment, measuring instruments, consumer electronic products, amusement equipment etc.). Those customers intending to use a product in an application requiring extreme quality and reliability, for example, in a highly specific application where the failure or misoperation of the product could result in human injury or death should first contact us.
 - Aerospace Equipment
 - Equipment Used in the Deep Sea
 - Power Generator Control Equipment (nuclear, steam, hydraulic, etc.)
 - Life Maintenance Medical Equipment
 - Fire Alarms / Intruder Detectors
 - Vehicle Control Equipment (automotive, airplane, railroad, ship, etc.)
 - Various Safety Devices
 - Traffic control system
 - Combustion equipment

In case your company desires to use this product for any applications other than general electronic equipment mentioned above, make sure to contact our company in advance. Note that the important requirements mentioned in this section are not applicable to cases where operation requirements such as application conditions are confirmed by our company in writing after consultation with your company.

- 6. We are making our continuous effort to improve the quality and reliability of our products, but semiconductor products are likely to fail with certain probability. In order to prevent any injury to persons or damages to property resulting from such failure, customers should be careful enough to incorporate safety measures in their design, such as redundancy feature, fire containment feature and fail-safe feature. We do not assume any liability or responsibility for any loss or damage arising from misuse or inappropriate use of the products.
- 7. The products have been designed and tested to function within controlled environmental conditions. Do not use products under conditions that deviate from methods or applications specified in this datasheet. Failure to employ the products in the proper applications can lead to deterioration, destruction or failure of the products. We shall not be responsible for any bodily injury, fires or accident, property damage or any consequential damages resulting from misuse or misapplication of the products.
- 8. Quality Warranty
 - 8-1. Quality Warranty Period

In the case of a product purchased through an authorized distributor or directly from us, the warranty period for this product shall be one (1) year after delivery to your company. For defective products that occurred during this period, we will take the quality warranty measures described in section 8-2. However, if there is an agreement on the warranty period in the basic transaction agreement, quality assurance agreement, delivery specifications, etc., it shall be followed.

8-2. Quality Warranty Remedies

When it has been proved defective due to manufacturing factors as a result of defect analysis by us, we will either deliver a substitute for the defective product or refund the purchase price of the defective product.

- Note that such delivery or refund is sole and exclusive remedies to your company for the defective product.
- 8-3. Remedies after Quality Warranty Period

With respect to any defect of this product found after the quality warranty period, the defect will be analyzed by us. On the basis of the defect analysis results, the scope and amounts of damage shall be determined by mutual agreement of both parties. Then we will deal with upper limit in Section 8-2. This provision is not intended to limit any legal rights of your company.

- 9. Anti-radiation design is not implemented in the products described in this document.
- 10. The X-ray exposure can influence functions and characteristics of the products. Confirm the product functions and characteristics in the evaluation stage.
- 11. WLCSP products should be used in light shielded environments. The light exposure can influence functions and characteristics of the products under operation or storage.
- 12. Warning for handling Gallium and Arsenic (GaAs) products (Applying to GaAs MMIC, Photo Reflector). These products use Gallium (Ga) and Arsenic (As) which are specified as poisonous chemicals by law. For the prevention of a hazard, do not burn, destroy, or process chemically to make them as gas or power. When the product is disposed of, please follow the related regulation and do not mix this with general industrial waste or household waste.
- 13. Please contact our sales representatives should you have any questions or comments concerning the products or the technical information.
