General Description

The LTA8151, LTA8152 and LTA8154 (LTA815x) are a family of zero-drift, micro-power, rail-to-rail output operational amplifiers capable of operating on wide supplies ranging from +4.5 V (±2.25 V) to +48 V (±24 V). The LTA815x op-amps use Linearin's proprietary auto-zeroing techniques to offer outstanding dc precision and ac performance, including low offset voltage (30 µV maximum), near zero-drift over time and temperature, 1 MHz bandwidth, and 0.41 μV_{PP} input voltage noise at 0.1 Hz to 10 Hz. These high-precision, low-quiescent-current op-amps offer high input impedance and rail-to-rail output swing within 10 mV of the rails. The input common-mode range includes the negative rail.

The single version LTA8151 device is available in micro-size MSOP-8L, SOT-23-5L, and SOIC-8L packages. The dual version LTA8152 device is offered in MSOP-8L and SOIC-8L packages. The quad version LTA8154 device is offered in SOIC-14L and TSSOP-14L packages. All versions are specified for operation from –40°C to +125°C.
