### Temperature De-rating Curve

### Storage / Environment Conditions

Products should be stored under the following environmental conditions.

<b>Temperature:</b>	+5 to +35 °C
<b>Humidity:</b>	45 to 85% relative humidity
<b>Moisture Sensitivity Level:</b>	1, J-STD-020

Do not keep products in environments where they may be subject to particulate contamination or harmful gases such as sulfuric acid or hydrogen chloride as it may cause oxidization on electrodes, resulting poor solderability.

Products should be stored in a space that does not expose to high temperatures, vibration, or direct sunlight.

Products should be stored in the original airtight packaging until use.
