	· · · · · · · · · · · · · · · · · · ·	RECOMMENDATION	FOR SOLDER PROCES	SING		
har-flex straight female con	nector RoHS compliant			OINO		
compliant			Solder paste recommendation			
OCNEDAL INCODMATION		The har-flex connector	The har-flex connectors are solderable with established lead-free SAC / SnNi solder but also leaded solder e.g. SnPb40			
GENERAL INFORMATION		PCB pad plating				
	stacking height 6,25mm, 9,05mm from 6 to 100poles, all even numbers	The har-flex connector	ors are solderable on lead	-free pad surfaces like HAL, NiAu,	Immersion Sn.	
No. of contacts	stacking height 13,65mm from 6 to 80poles, all even numbers	Stencil recommendat	ion			
Contact spacing	1,27mm x 1,27mm [0,050"x0,050"]	The solder deposition has to be placed on the pad area of the contact solder tines.				
Test Voltage 500V  Contact resistance < 25 mOhm		Ideally, the solder deposition has the same length-to-width ratio and center point like the PCB pads.  The size of the solder stencil apertures is depending on the thickness of the stencil.  In general, the thinner stencils will need larger apertures to result in the required volume of solder paste.				
Contact resistance						
Insulation resistance	≥ 10x10^9Ω	The minimum required solder paste volume for the signal pins is 0,094mm³, for the hold down it is 0,33mm³.				
Working current acc. to IEC 60512, at 70°C, 80% derating	see derating diagram	For example, this can be achieved with the following stencil data :				
Working temperature range	-55°C +125°C			Signal pins		
Termination technology	SMT	Stencil thickn	<u>'</u>	proposal stencil aperture size	calculated solder paste volume	
Reflow processing temperature (acc. to ECA/IPC/JEDEC J-STD-075 Level PSL R0)	min. 150s > 217°C	120 µm		1,05 x 0,75 mm	0,095 mm <sup>3</sup>	
	min. 30s > 240°C	150 µm	1,1 x 0,8 mm	0,99 x 0,72 mm	0,107 mm³	
Clearance & creepage distance	0,4mm min.			Hold-downs	T .	
Insertion force (depending on mating connector)	approximately 0,5N/contact	Stencil thickr	'	proposal stencil aperture size	calculated solder paste volume	
Withdrawal force (depending on mating connector)	approximately 0,5N/contact	120 µm		2,45 x 1,15 mm	0,338 mm <sup>3</sup>	
Mating cycles	PL1 : 500 mating cycles	150 µm		2,25 x 1,08 mm	0,365 mm <sup>3</sup>	
	PL2 : 250 mating cycles				d solder paste volume by enlarging	
RoHS - compliant	Yes	stencil aperture. Depending on the PCB design, the solder depostion may protrude the PCB pads. But to achieve a general sealing during solder paste printing and to reduce the cleaning interval of the stencil, the aperture should be smaller than the PCB pad about 10% or 25µm encircliing.				
Leadfree	Yes					
Working voltage acc. to to IEC 60664-1	100V / 150V (depending on installation category)  Coplanarity of contacts					
UL file acc. UL 1977	ECBT2.E102079	All connectors are tested for coplanarity of contacts and are in the range of 6 pin to 50 pin: ≤ 0,1mm
