

# 2878 AND 2879

## QUAD HIGH-CURRENT DARLINGTON SWITCHES

Dwg. No. A-11,974

### ABSOLUTE MAXIMUM RATINGS at +25°C Free-Air Temperature for any driver (unless otherwise noted)

Output Voltage, $V_{CEX}$	
(UDN2878W) .....	50 V
(UDN2879W & UDN2879W-2) .....	80 V
Output Current, $I_C$	
(UDN2878W & UDN2879W) .....	5.0 A
(UDN2879W-2) .....	4.0 A
Input Voltage, $V_{IN}$ .....	15 V
Input Current, $I_{IN}$ .....	25 mA
Supply Voltage, $V_S$ .....	10 V
Total Package Power Dissipation, $P_D$ .....	See Graph
Operating Ambient Temperature Range, $T_A$ .....	-20°C to +85°C
Storage Temperature Range, $T_S$ .....	-55°C to +150°C

These quad Darlington arrays are designed to serve as interface between low-level logic and peripheral power devices such as solenoids, motors, incandescent displays, heaters, and similar loads of up to 320 W per channel. Both integrated circuits include transient-suppression diodes that enable use with inductive loads. The input logic is compatible with most TTL, DTL, LSTTL, and 5 V CMOS logic.

Type UDN2878W and UDN2879W 4 A arrays are identical except for output-voltage ratings. The former is rated for operation to 50 V (35 V sustaining), while the latter has a minimum output breakdown rating of 80 V (50 V sustaining). The lower-cost UDN2879W-2 is recommended for applications requiring load currents of 3 A or less. These less expensive devices are identical to the basic parts except for the maximum allowable load-current rating.

For maximum power-handling capability, all drivers are supplied in a 12-pin single in-line power-tab package. The tab needs no insulation. External heat sinks are usually required for proper operation of these devices.

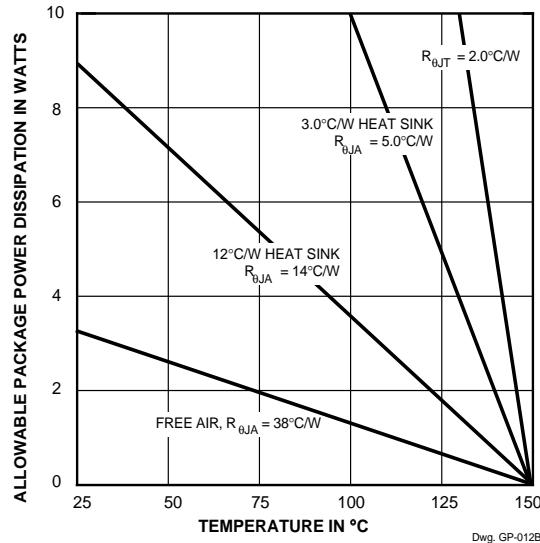

### FEATURES

- Output Currents to 4 A
- Output Voltages to 80 V
- Loads to 1280 W
- TTL, DTL, or CMOS Compatible Inputs
- Internal Clamp Diodes
- Plastic Single In-Line Package
- Heat-Sink Tab

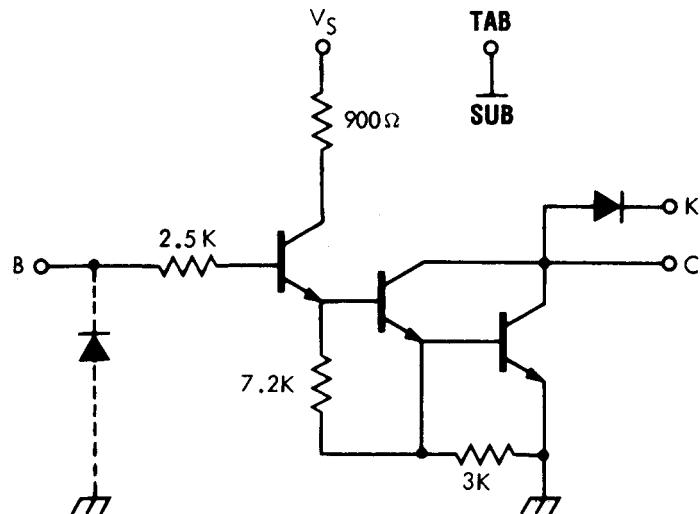

Always order by complete part number:

Part Number	Max. $I_C$	Max. $V_{CEX}$	Min. $V_{CE}(\text{sus})$
UDN2878W	5.0 A	50 V	35 V
UDN2879W	5.0 A	80 V	50 V
UDN2879W-2	4.0 A	80 V	50 V

NOTES:

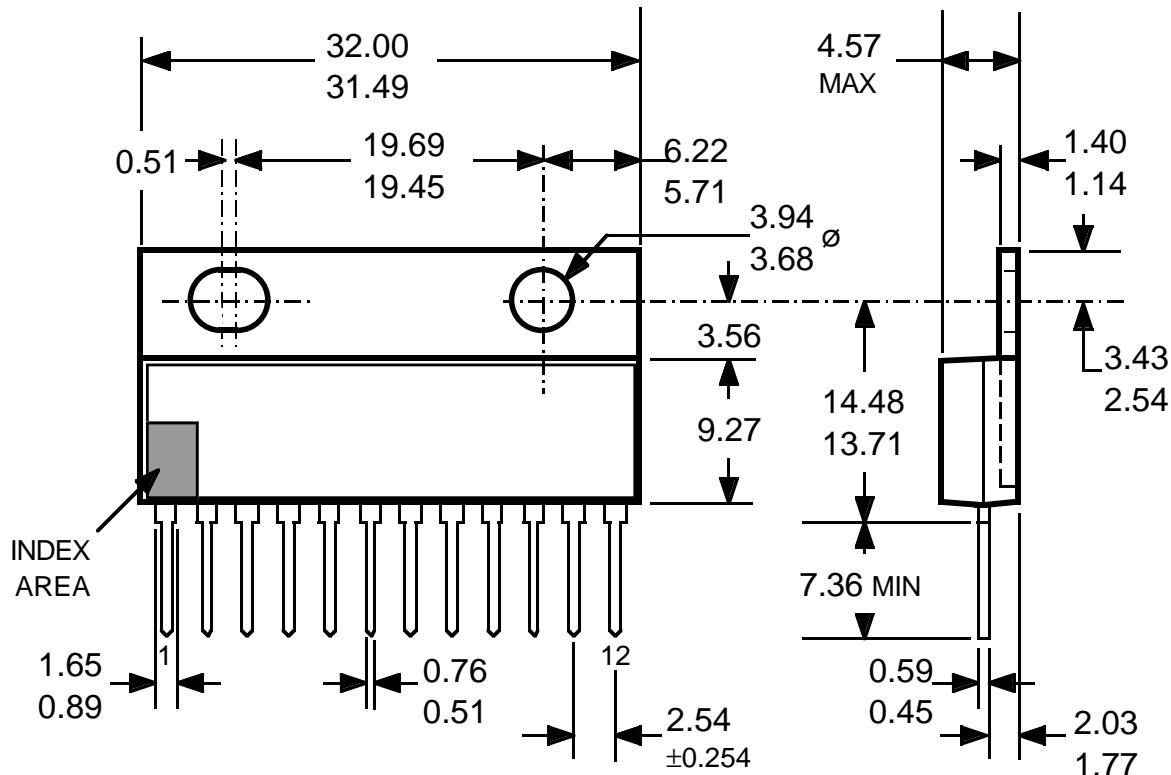

- 1. Lead thickness is measured at seating plane or below.
- 2. Lead spacing tolerance is non-cumulative.
- 3. Exact body and lead configuration at vendor's option within limits shown.
- 4. Lead gauge plane is 0.030" below seating plane.
- 5. Supplied in standard sticks/tubes of 15 devices.
