

Quectel L26-T

Ultra-compact Multi-constellation GNSS Module

L26-T is an ultra-compact, single-band multi-constellation module featuring high precision timing and standard precision positioning. It is designed and manufactured according to the IATF 16949: 2016 standard.

Designed for navigation applications, L26-T can receive and track GPS, GLONASS, Galileo, BDS, and QZSS signals, output multi-GNSS raw data, and use SBAS to enhance accuracy and reliability. The built-in LNA ensures better performance even in harsh environments such as dense urban canyons.

For high-precision timing applications, the module can synchronize with the Coordinated Universal Time (UTC) at a nanosecond resolution. This outstanding timing performance is crucial to a variety of applications demanding high-accuracy time and frequency stability.

L26-T also leverages AGNSS data, resulting in a significantly reduced Time to First Fix (TTFF). The AGNSS feature enables high sensitivity acquisition even on the module's first start-up, when precise location, time, and frequency are still unknown.

For battery-powered applications, the module offers power saving modes to reduce power consumption.

The superb performance of L26-T makes it an ideal solution for base stations, as well as for automotive and industrial applications.

Key Features

- ✓ Ultra-compact size: 12.2 mm × 16.0 mm × 2.3 mm
- ✓ Multi-GNSS engine for GPS, GLONASS, Galileo, BDS, and QZSS
- ✓ Integrated LNA for better sensitivity
- ✓ Timing function
- ✓ Multi-GNSS raw data output
- ✓ Integrated AGNSS function
- ✓ Reception of SBAS broadcast signals
