

To our customers,

---

## Old Company Name in Catalogs and Other Documents

---

On April 1<sup>st</sup>, 2010, NEC Electronics Corporation merged with Renesas Technology Corporation, and Renesas Electronics Corporation took over all the business of both companies. Therefore, although the old company name remains in this document, it is a valid Renesas Electronics document. We appreciate your understanding.

Renesas Electronics website: <http://www.renesas.com>

Renesas Electronics Corporation

Issued by: Renesas Electronics Corporation (<http://www.renesas.com>)

Send any inquiries to <http://www.renesas.com/inquiry>.

## Notice

1. All information included in this document is current as of the date this document is issued. Such information, however, is subject to change without any prior notice. Before purchasing or using any Renesas Electronics products listed herein, please confirm the latest product information with a Renesas Electronics sales office. Also, please pay regular and careful attention to additional and different information to be disclosed by Renesas Electronics such as that disclosed through our website.
2. Renesas Electronics does not assume any liability for infringement of patents, copyrights, or other intellectual property rights of third parties by or arising from the use of Renesas Electronics products or technical information described in this document. No license, express, implied or otherwise, is granted hereby under any patents, copyrights or other intellectual property rights of Renesas Electronics or others.
3. You should not alter, modify, copy, or otherwise misappropriate any Renesas Electronics product, whether in whole or in part.
4. Descriptions of circuits, software and other related information in this document are provided only to illustrate the operation of semiconductor products and application examples. You are fully responsible for the incorporation of these circuits, software, and information in the design of your equipment. Renesas Electronics assumes no responsibility for any losses incurred by you or third parties arising from the use of these circuits, software, or information.
5. When exporting the products or technology described in this document, you should comply with the applicable export control laws and regulations and follow the procedures required by such laws and regulations. You should not use Renesas Electronics products or the technology described in this document for any purpose relating to military applications or use by the military, including but not limited to the development of weapons of mass destruction. Renesas Electronics products and technology may not be used for or incorporated into any products or systems whose manufacture, use, or sale is prohibited under any applicable domestic or foreign laws or regulations.
6. Renesas Electronics has used reasonable care in preparing the information included in this document, but Renesas Electronics does not warrant that such information is error free. Renesas Electronics assumes no liability whatsoever for any damages incurred by you resulting from errors in or omissions from the information included herein.
7. Renesas Electronics products are classified according to the following three quality grades: “Standard”, “High Quality”, and “Specific”. The recommended applications for each Renesas Electronics product depends on the product’s quality grade, as indicated below. You must check the quality grade of each Renesas Electronics product before using it in a particular application. You may not use any Renesas Electronics product for any application categorized as “Specific” without the prior written consent of Renesas Electronics. Further, you may not use any Renesas Electronics product for any application for which it is not intended without the prior written consent of Renesas Electronics. Renesas Electronics shall not be in any way liable for any damages or losses incurred by you or third parties arising from the use of any Renesas Electronics product for an application categorized as “Specific” or for which the product is not intended where you have failed to obtain the prior written consent of Renesas Electronics. The quality grade of each Renesas Electronics product is “Standard” unless otherwise expressly specified in a Renesas Electronics data sheets or data books, etc.
  - “Standard”: Computers; office equipment; communications equipment; test and measurement equipment; audio and visual equipment; home electronic appliances; machine tools; personal electronic equipment; and industrial robots.
  - “High Quality”: Transportation equipment (automobiles, trains, ships, etc.); traffic control systems; anti-disaster systems; anti-crime systems; safety equipment; and medical equipment not specifically designed for life support.
  - “Specific”: Aircraft; aerospace equipment; submersible repeaters; nuclear reactor control systems; medical equipment or systems for life support (e.g. artificial life support devices or systems), surgical implantations, or healthcare intervention (e.g. excision, etc.), and any other applications or purposes that pose a direct threat to human life.
8. You should use the Renesas Electronics products described in this document within the range specified by Renesas Electronics, especially with respect to the maximum rating, operating supply voltage range, movement power voltage range, heat radiation characteristics, installation and other product characteristics. Renesas Electronics shall have no liability for malfunctions or damages arising out of the use of Renesas Electronics products beyond such specified ranges.
9. Although Renesas Electronics endeavors to improve the quality and reliability of its products, semiconductor products have specific characteristics such as the occurrence of failure at a certain rate and malfunctions under certain use conditions. Further, Renesas Electronics products are not subject to radiation resistance design. Please be sure to implement safety measures to guard them against the possibility of physical injury, and injury or damage caused by fire in the event of the failure of a Renesas Electronics product, such as safety design for hardware and software including but not limited to redundancy, fire control and malfunction prevention, appropriate treatment for aging degradation or any other appropriate measures. Because the evaluation of microcomputer software alone is very difficult, please evaluate the safety of the final products or system manufactured by you.
10. Please contact a Renesas Electronics sales office for details as to environmental matters such as the environmental compatibility of each Renesas Electronics product. Please use Renesas Electronics products in compliance with all applicable laws and regulations that regulate the inclusion or use of controlled substances, including without limitation, the EU RoHS Directive. Renesas Electronics assumes no liability for damages or losses occurring as a result of your noncompliance with applicable laws and regulations.
11. This document may not be reproduced or duplicated, in any form, in whole or in part, without prior written consent of Renesas Electronics.
12. Please contact a Renesas Electronics sales office if you have any questions regarding the information contained in this document or Renesas Electronics products, or if you have any other inquiries.

(Note 1) “Renesas Electronics” as used in this document means Renesas Electronics Corporation and also includes its majority-owned subsidiaries.

(Note 2) “Renesas Electronics product(s)” means any product developed or manufactured by or for Renesas Electronics.

# M62303FP

## High Precision Double Integration Type A/D Converter

REJ03D0862-0201

Rev.2.01

Dec 27, 2007

### Description

M62303FP is a double integration type A/D converter support system, and is a semiconductor integrated circuit which can work as A/D converter of 14 bits or more by being used with MCU and by inputting SI, SCK1, CS, and CONTIN.

High precision A/D translation system can be realized without using high precision external parts by proofreading A/D acquired values with two or more known conversion values such as reference voltage, grounding (zero) voltage and so forth.

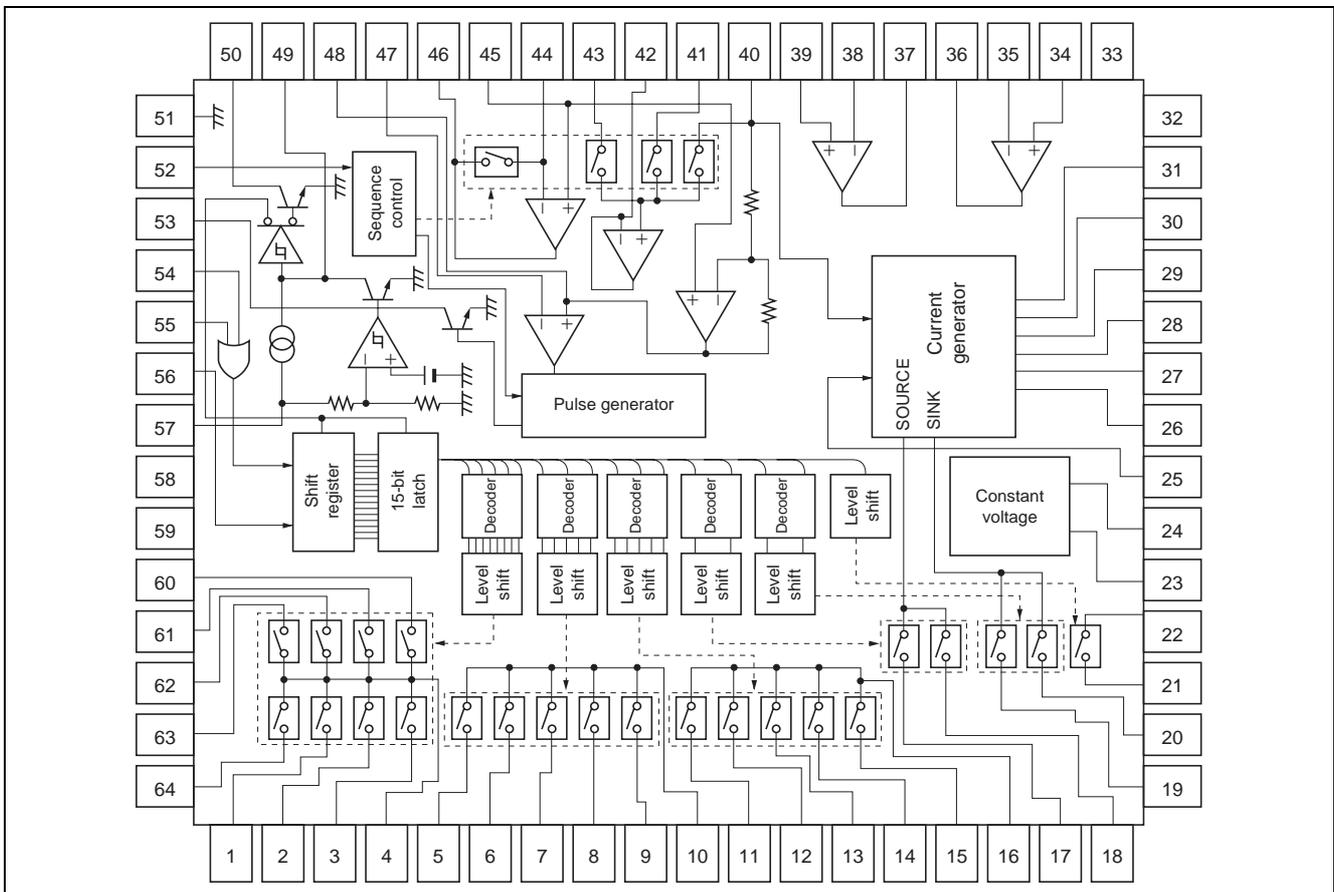

### Features

- High precision (14 bits or more) double integration type A/D converter
- Positive/negative constant voltage source built-in (+6.3 V, -6.0 V Typ)
- Positive/negative constant current source built-in (I<sub>source</sub> = 2 mA, I<sub>sink</sub> = 0.2 mA Max)
- Independent 2ch operational amplifier built-in
- System reset built-in (4.5 V Typ)

### Application

High precision control systems, such as temperature control and speed control

### Block Diagram

## Pin Description

Pin No.	Pin Name	Function
56	SI	Serial data input terminal. Serial data of 15 bits data length is input.
55	SCK1	Shift clock input terminal. Signal from SI terminal is input into 15-bit shift register at the rise of a clock.
54	CS	"L" level of this terminal enables shift clock, and "H" level makes shift register contents stored into multiplexer control register (analog switches) and unenables clock input.
52	CONT IN	 A pulse is input. Double integration type A/D converter is started synchronizing with this pulse. Moreover, the optimal full scale can be set up by setting up with C and R so that it may be set to $T_{CONT} \leq 2.14 CR$ .
57	VDD	Digital part power supply terminal
51	GD	Digital part GND terminal. This terminal is externally connected to analog ground terminal when IC is operative.
50	RESET OUT	Output terminal of reset circuit supervising the fall of a digital part power supply.
49	DERAY	Reset output rise is delayed by adding capacitor.
60, 61, 62, 63, 64, 1, 2, 3	MUX1 to 8	Input side terminal of multiplexer (analog switch group) MUX.
4	MUXCOM	Output side COMMON terminal of multiplexer MUX.
5, 6, 7, 8, 9	AS1-1 to 5	Input side terminal of multiplexer (analog switch group) AS1.
10	AS1COM	Output side COMMON terminal of multiplexer AS1.
11, 12, 13, 14, 15	AS2-1 to 5	Input side terminal of multiplexer (analog switch group) AS2
16	AS2COM	Output side COMMON terminal of multiplexer AS2
17, 18	AS3-1 to 2	Source type constant current source output terminal
19, 20	AS4-1 to 2	Sink type constant current source output terminal
21	AS5	Analog switch AS5 input side terminal
22	AS5COM	Analog switch AS5 output side terminal
23, 59	VC+	Positive power supply output terminal for analog switch drive
24, 58	VC-	Negative power supply output terminal for analog switch drive
25	GA	Analog part GND terminal
26, 27, 28, 29	R5, R3, R2L, R2H	Reference current setting terminal for constant current source
30	R1	Source type output current setting terminal for constant current source
31	R4	Sink type output current setting terminal for constant current source
32	VA+	Analog part positive power supply terminal
33	VA-	Analog part negative power supply terminal
34	OP1+	Operational amplifier 1 non-inverting input terminal
35	OP1-	Operational amplifier 1 inverting input terminal
36	OUT1	Operational amplifier 1 output terminal
37	OUT2	Operational amplifier 2 output terminal
38	OP2-	Operational amplifier 2 inverting input terminal
39	OP2+	Operational amplifier 2 non-inverting input terminal
40	VREF	Standard voltage input for standard integration, and constant standard voltage input terminal for source current source setup
41	ADIN	A/D conversion input terminal. Analog signal into ADIN terminal is converted into pulse width proportional to the input voltage.
42	BUFFER	Output terminal of buffer amplifier which receives VREF, ADIN, and GA input. Internal analog switch for A/D conversion is switched by the CONTIN signal, and the voltage of three types of VREF, ADIN, and GA is output to BUFFER terminal through buffer amplifier.
43, 45	GA	Analog part GND terminal
44	INTIN	Input terminal of integration amplifier
46	INTOUT	Output terminal of integration amplifier
47	COMPIN	Input terminal of the comparator part of a double integration type A/D converter
48	VADR	Power supply output terminal used for reference terminal of comparator
53	PULSEOUT	A/D translation output terminal. Input analog signal is changed into pulse to be output.

## Absolute Maximum Ratings

(Ta = 25°C, unless otherwise noted)

Item	Symbol	Ratings	Unit	Conditions
Analog power supply voltage	VA+ VA-	22	V	
Switch part power supply voltage	Vc+ Vc-	13.2	V	
Digital section supply voltage	V <sub>DD</sub>	-0.3 to +7	V	
A/D converter analog input voltage	V <sub>AIN</sub>	-4 to +4	V	
PULSE OUT output current	I <sub>sink</sub> (PO)	10	mA	
Reset output current	I <sub>sink</sub> (RE)	10	mA	
Switch input voltage	V <sub>SWIN</sub>	Vc- to Vc+	V	At the line of fault voltage impression
		VA- to VA+ *1		
Switch input current	I <sub>SWIN</sub>	±20*1	mA	(Per one pin)
		±100*1		(All the switch sum totals)
Digital input voltage	V <sub>DIN</sub>	-0.3 to V <sub>DD</sub> + 0.3	V	
Power dissipation	P <sub>d</sub>	740	mW	
Operating temperature	T <sub>opr</sub>	-20 to +75	°C	
Storage temperature	T <sub>stg</sub>	-40 to +125	°C	

Note: 1. Represents the protection level at the time of abnormalities.

## Operating Conditions

(Ta = 25°C)

Block	Item	Symbol	Min	Typ	Max	Unit	Test Conditions
Analog	Power supply voltage (positive side)	VA+	+8.1	+12	+13	V	
	Power supply voltage (negative side)	VA-	-9	-8	-7.2	V	
	Power supply current (positive side)	IA+	—	13	17	mA	
	Power supply current (negative side)	IA-	—	12	17	mA	
	A/D converter analog standard voltage	V <sub>REF</sub>	1.0	2.5	3.0	V	
	A/D converter analog input voltage	V <sub>AIN</sub>	-V <sub>REF</sub>	—	V <sub>REF</sub>	V	
	Switch input voltage	V <sub>SWIN</sub>	-6	—	+6	V	
	Input integration time	T <sub>CONT</sub>	2	—	20	ms	
Digital	Power supply voltage	V <sub>DD</sub>	4.80*2	5.0	5.5	V	
	Power supply current	I <sub>DD</sub>	—	1.8	3	mA	
	High-level input voltage	V <sub>IN</sub>	2.4	—	—	V	
	Low-level input voltage	V <sub>IL</sub>	—	—	0.8	V	
	Serial clock waiting time	t <sub>SCSK</sub>	250	—	—	ns	CS↓→SCKI↓
	Serial input setup time	t <sub>SIK</sub>	100	—	—	ns	SI→SCKI↑
	Serial input hold time	t <sub>HKI</sub>	50	—	—	ns	SCKI↑→SI
	Serial clock low level time	t <sub>WLK</sub>	200	—	—	ns	
	Serial clock high level time	t <sub>WHK</sub>	200	—	—	ns	
	Chip selection hold time	t <sub>HKCS</sub>	50	—	—	ns	SCKI↑→CS↑
External parts	Integration capacitance	C <sub>INT</sub> *3	—	0.015	—	μF	
	Voltage current conversion resistor	R <sub>INT</sub>	56	230	500	kΩ	

Notes: 2. Represents the reset release voltage.

3. Set up as in 2.14 R<sub>INT</sub> - C<sub>INT</sub> T<sub>CONT</sub>.

## Electrical Characteristics

(Ta = 25°C, unless otherwise noted)

VA+ = 12 V, VA- = -SV, VREF = 2.5 V, VDD = 5.0 V, TCONT = 7.3 ms

### About the Input Voltage VX

Given the applied voltage into 41 pin is VX in the diagram above,

$$VX = \frac{TGND - TX}{TGND - TR} \cdot VR \quad T = \text{Pulse width}$$

TGND, TR, and TX can be respectively expressed with nGND/f, nR/f, and nX/f, (f is clock frequency; nGND, nR, nX is count values for clock frequency f.)

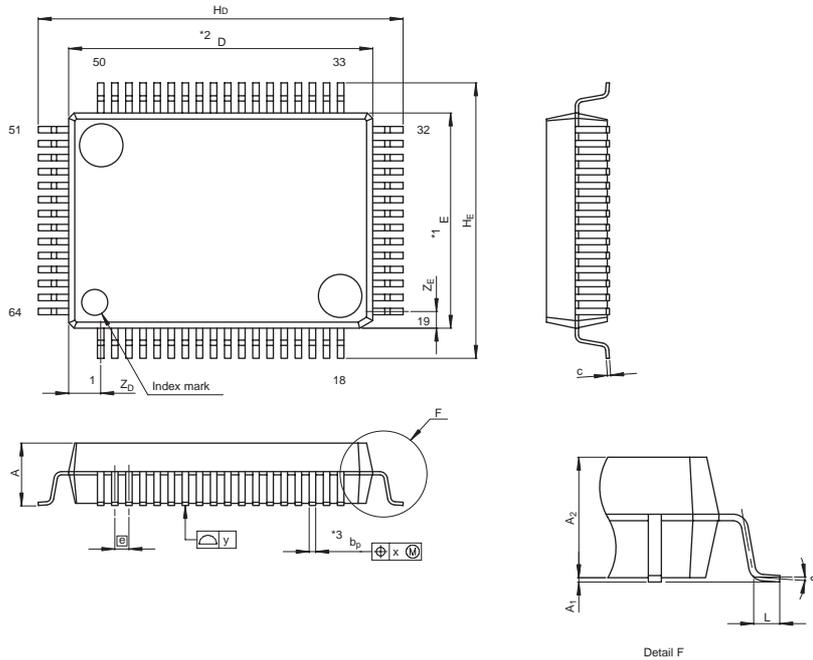

If these are substituted for an upper formula,

$$VX = \frac{nGND - nX}{nGND - nR} \cdot VR$$

VX can be expressed in this way for the number of counters.

Notes:

1. This document is provided for reference purposes only so that Renesas customers may select the appropriate Renesas products for their use. Renesas neither makes warranties or representations with respect to the accuracy or completeness of the information contained in this document nor grants any license to any intellectual property rights or any other rights of Renesas or any third party with respect to the information in this document.
2. Renesas shall have no liability for damages or infringement of any intellectual property or other rights arising out of the use of any information in this document, including, but not limited to, product data, diagrams, charts, programs, algorithms, and application circuit examples.
3. You should not use the products or the technology described in this document for the purpose of military applications such as the development of weapons of mass destruction or for the purpose of any other military use. When exporting the products or technology described herein, you should follow the applicable export control laws and regulations, and procedures required by such laws and regulations.
4. All information included in this document such as product data, diagrams, charts, programs, algorithms, and application circuit examples, is current as of the date this document is issued. Such information, however, is subject to change without any prior notice. Before purchasing or using any Renesas products listed in this document, please confirm the latest product information with a Renesas sales office. Also, please pay regular and careful attention to additional and different information to be disclosed by Renesas such as that disclosed through our website. (<http://www.renesas.com>)
5. Renesas has used reasonable care in compiling the information included in this document, but Renesas assumes no liability whatsoever for any damages incurred as a result of errors or omissions in the information included in this document.
6. When using or otherwise relying on the information in this document, you should evaluate the information in light of the total system before deciding about the applicability of such information to the intended application. Renesas makes no representations, warranties or guarantees regarding the suitability of its products for any particular application and specifically disclaims any liability arising out of the application and use of the information in this document or Renesas products.
7. With the exception of products specified by Renesas as suitable for automobile applications, Renesas products are not designed, manufactured or tested for applications or otherwise in systems the failure or malfunction of which may cause a direct threat to human life or create a risk of human injury or which require especially high quality and reliability such as safety systems, or equipment or systems for transportation and traffic, healthcare, combustion control, aerospace and aeronautics, nuclear power, or undersea communication transmission. If you are considering the use of our products for such purposes, please contact a Renesas sales office beforehand. Renesas shall have no liability for damages arising out of the uses set forth above.
8. Notwithstanding the preceding paragraph, you should not use Renesas products for the purposes listed below:
  - (1) artificial life support devices or systems
  - (2) surgical implantations
  - (3) healthcare intervention (e.g., excision, administration of medication, etc.)
  - (4) any other purposes that pose a direct threat to human lifeRenesas shall have no liability for damages arising out of the uses set forth in the above and purchasers who elect to use Renesas products in any of the foregoing applications shall indemnify and hold harmless Renesas Technology Corp., its affiliated companies and their officers, directors, and employees against any and all damages arising out of such applications.
9. You should use the products described herein within the range specified by Renesas, especially with respect to the maximum rating, operating supply voltage range, movement power voltage range, heat radiation characteristics, installation and other product characteristics. Renesas shall have no liability for malfunctions or damages arising out of the use of Renesas products beyond such specified ranges.
10. Although Renesas endeavors to improve the quality and reliability of its products, IC products have specific characteristics such as the occurrence of failure at a certain rate and malfunctions under certain use conditions. Please be sure to implement safety measures to guard against the possibility of physical injury, and injury or damage caused by fire in the event of the failure of a Renesas product, such as safety design for hardware and software including but not limited to redundancy, fire control and malfunction prevention, appropriate treatment for aging degradation or any other applicable measures. Among others, since the evaluation of microcomputer software alone is very difficult, please evaluate the safety of the final products or system manufactured by you.
11. In case Renesas products listed in this document are detached from the products to which the Renesas products are attached or affixed, the risk of accident such as swallowing by infants and small children is very high. You should implement safety measures so that Renesas products may not be easily detached from your products. Renesas shall have no liability for damages arising out of such detachment.
12. This document may not be reproduced or duplicated, in any form, in whole or in part, without prior written approval from Renesas.
13. Please contact a Renesas sales office if you have any questions regarding the information contained in this document, Renesas semiconductor products, or if you have any other inquiries.
