

■ Features

- 1. Space-saving (0.5 size terminal, 2mm pitch)**
Space-saving design that contributes to size reduction of end product
- 2. High Heat Resistance : up to 125°C**
Suitable for use in 125°C environments.
- 3. High Vibration Resistance**
Can be used in vehicle environments in which intense vibration is applied.
- 4. Rated Current : 5A (Mono-Pole Power Supply)/ 2A (All-Pole Power Supply)**
Suitable for use in 125°C environments.
- 5. Retainer Guarantees 40N Tensile Strength**
Durable against cable routing

● High Vibration Resistance Terminal Design

① Double-Layered Spring Design

Suppresses outer vibration by increasing the contact force

② 3-point contact design

Suppresses outer vibration by increasing the contact force
1 spring+ 2 beats= 3 contact points

*The terminal is flipped upside down so the beat is easier to see.

● High Tensile Strength due to Retainer

◆ Usage Precautions

1. Excessive pull force during unmating may damage the connector. If it is difficult to remove, push in lightly once and then release the lock.
2. Always make sure to turn off the power before reseating the connector.
3. Do not have direct contact on the terminal when electricity is flowing since it is extremely dangerous.
4. Contact a Hirose representative for harness procedures or handling manuals.
