## Description

TT0535TJX is a low capacitance Transient Voltage Suppressor (TVS) designed to provide electrostatic discharge (ESD) protection for high-speed data interfaces. With typical capacitance of 0.6pF only, TT0535TJX is designed to protect parasitic-sensitive systems against over-voltage and over-current transient events. It complies with IEC 61000-4-2 (ESD), Level 4 (±15kV air, ±8kV contact discharge), IEC 61000-4-4 (electrical fast transient - EFT) (40A, 5/50 ns), very fast charged device model (CDM) ESD and cable discharge event (CDE), etc.

TT0535TJX uses small SOT363 package. Each TT0535TJX device can protect four high-speed data lines. The combined features of low capacitance, small size and high ESD robustness make ideal for TT0535TJX high-speed data ports and high-frequency lines (e.g., HDMI & DVI) applications. The low clamping voltage of the guarantees TT0535TJX a minimum stress on the protected IC.
