## 3-Terminal Voltage Regulators

### Description

TO-252

The PJ78XXTE series of three-terminal positive regulators are available in TO-252 package. Each type employs internal current limiting, thermal shutdown and safe area protection, making it essentially indestructible. If adequate heat sinking is provided, it can deliver over 1.5A output current. Although designed as fixed voltage regulator, this device can be used with external components to obtain adjustable voltage and currents.

1. VIN 2. GND 3. VOUT

### Features

- Input voltage: up to 35V
- Output voltage: 5V, 6V, 8V, 9V, 10V, 12V, 15V
- Output current up to 1.5 A
- Thermal overload protection
- Short circuit current limiting

### Applications

- DC motor drivers
- Household electric appliances
- Industrial power supplies
- Test and measurement equipment
