Low-Profile VGA High-Resolution RGB Coaxial Cable (HD15 M/M), 50 ft. (15.24 m)

MODEL NUMBER: **P502-050-SM**

Allows a high-resolution connection between your VGA-enabled computer and monitor up to 50 ft. apart with no ghosting.

Description

The P502-050-SM VGA Coaxial High-Resolution Monitor Cable (M/M) allows you to connect your VGA-enabled computer and monitor up to 50-ft. (15.24 m) apart. Constructed from mini-coaxial (RGB) and paired video wire, it supports video resolutions up to 2048 x 1536, including 1080p, with no ghosting. It's more than 40% smaller in diameter than standard VGA cables, which increases airflow in tight spaces and makes it easier to install around corners.
Foil and braid shielding delivers reliable, error-free signal quality and protection from EMI/RFI line noise that can distort or destroy data. Molded HD15 male connectors with gold-plated contacts provide maximum conductivity and minimize data loss. Integral strain relief gives the cable extra flexibility, reduces stress, and helps the cable and connectors move freely without cracking.
