**DESOLDERING PUMP**

This desoldering pump made with best material, strong spring, hi-power suction, designed for one-hand operation and is durable and ideal for circuit boards and other solder clearing work.

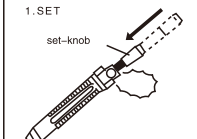

### SUPERIOR QUALITY

1. Large capacity, powerful spring, simple operation, powerful solder sucker.
2. One - touched cylinder and holder, which are easy to clean
3. The protector can make you safe to operate it.
4. Cleaned shaft can help the nozzle to remove the solder.
5. Protector - styled load mechanism is convenient to take along.

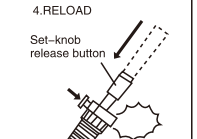

### OPERATION PROCEDURE

1. Push the set - knob for loading the cleaned shaft until the knob stops.
2. Melt the solder where it is intended to remove.
3. Aim the nozzle to the melted solder and then push the release button. Thus the solder can be sucked.
4. Press the release button while pushing the set knob without reloading the cylinder.
5. Push the set - knob and then pull the protector, the load mechanism is released.

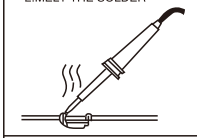

1. SET

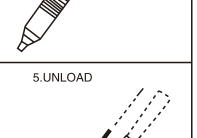

4. RELOAD

2. MELT THE SOLDER

5. UNLOAD

3. REMOVE THE SOLDER

1. TAKE DOWN THE NOZZLE

3. TAKE DOWN THE CYLINDER

2. STUFF THE NOZZLE

4. CLEANING
