

500nA I_Q , 300mA Low-Dropout Linear Regulator

Description

The FLD0503A ultra-low quiescent current regulator features low dropout voltage and low current in the standby mode. With less than 500nA quiescent current at no load, the FLD0503A is ideally suited for standby micro-control-unit systems, especially for always-on applications like portable, and other battery operated systems. The FLD0503A retains all of the features that are common to low dropout regulators including a low dropout PMOS pass device, short circuit protection, and thermal shutdown.

The FLD0503A has a 6V maximum operating voltage limit, a 0 °C to 100 °C operating temperature range, and $\pm 2\%$ output voltage tolerance over the entire output current, input voltage, and temperature range. The FLD0503A is available in SOT23 surface mount packages.

Features

- V_{IN} Range up to 6V
- Output Voltage Tolerances of $\pm 2\%$ Over the Temperature Range
