

DDRH-15-xxP

DDRH-15-xxST

DDRH-15-xxDR

Features

- 150~1500Vdc 10:1 ultra-wide input range
- 4KVac I/O high isolation(Reinforced isolation)
- Protections: Short circuit / Overload / Over voltage /
 DC input under voltage / DC input reverse Polarity
- · Fanless design, fully encapsulated, cooling by free air convection
- Can be installed on DIN rail TS-35/7.5 or 15 (DR-Type)
- -40~+80°C ultra-wide operating temperature (>+50°C derating)
- · Operating altitude up to 5000 meters
- 3 years warranty

Applications

- · Photovoltaic power generation
- Renewable Energy System
- High voltage frequency conversion
- · Industrial control system
- Semiconductor fabrication equipment
- · Electro-mechanical apparatus
- DC bus centralized application
- Energy storage system(ESS)
- Charging pile
- Third rail

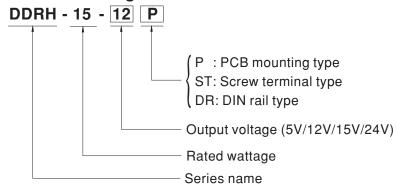

■ GTIN CODE

Description

DDRH-15 series is a 150 $^{\sim}$ 1500Vdc high reliable ultra-high input DC-DC converter which can supply stable working voltage for the load. Main features are as following: compact size, -40 $^{\sim}$ +80 $^{\circ}$ C wide range operating temperature, 4KVac high isolation voltage, operation at 5000m altitude, low ripple & noise, complete protections and so on. Futhermore, this series also has DIN Rail type, it is suitable to be mounted on TS-35/7.5 or TS-35/15 rails. DDRH-15 is designed to meet UL1741(By requested) and IEC62109-1 standard. It is suitable for industrial automation, surveillance, telecommunication and can be widely deployed in the applications of new energy generation such as solar power, and windmill power generation, for instances, photovoltaic power systems, high voltage inverting, DC bus centralized application, ESS, charging pile, railway and so forth.

■ Model Encoding

MODEL SELECTION TABLE							
ORDER NO.	INPUT			OUTPUT			
	INPUT VOLTAGE	INPUT CURRENT		OUTPUT	OUTPUT	EFFICIENCY (Typ.)	CAPACITOR LOAD (MAX.)

1. All parameters NOT specially mentioned are measured at 800Vdc input, rated load and 25°C of ambient temperature. 2. Ripple & noise are measured at 20MHz of bandwidth by using a 12" twisted pair-wire terminated with a 0.1µf & 47µf parallel capacitor. 3. The ambient temperature derating of 3.5°C/1000m with fanless models and of 5°C/1000m with fan models for operating altitude higher than 2000m(6500ft). 4. The power supply is considered a component which will be installed into a final equipment. The final equipment must be re-confirmed that it still meets EMC directives. For guidance on how to perform these EMC tests, please refer to "EMI testing of component power supplies." (as available on http://www.meanwell.com) 3. The ambient temperature. 4.
