SLIM GASKETS & DUST COVERS

Our range of gaskets and dust covers fit most of our Slim feedthrough connectors. They function as dust seals and for colour identification. Useable on plastic and metal models, the range consists of a plain gasket and a gasket with a dust cover. (Models with dust caps are not used on fibre connectors as these have their own dust caps). They are all supplied with brass spacers. Using spacers can improve the sealing function and fit. Available in 4 colours.

GASKETS

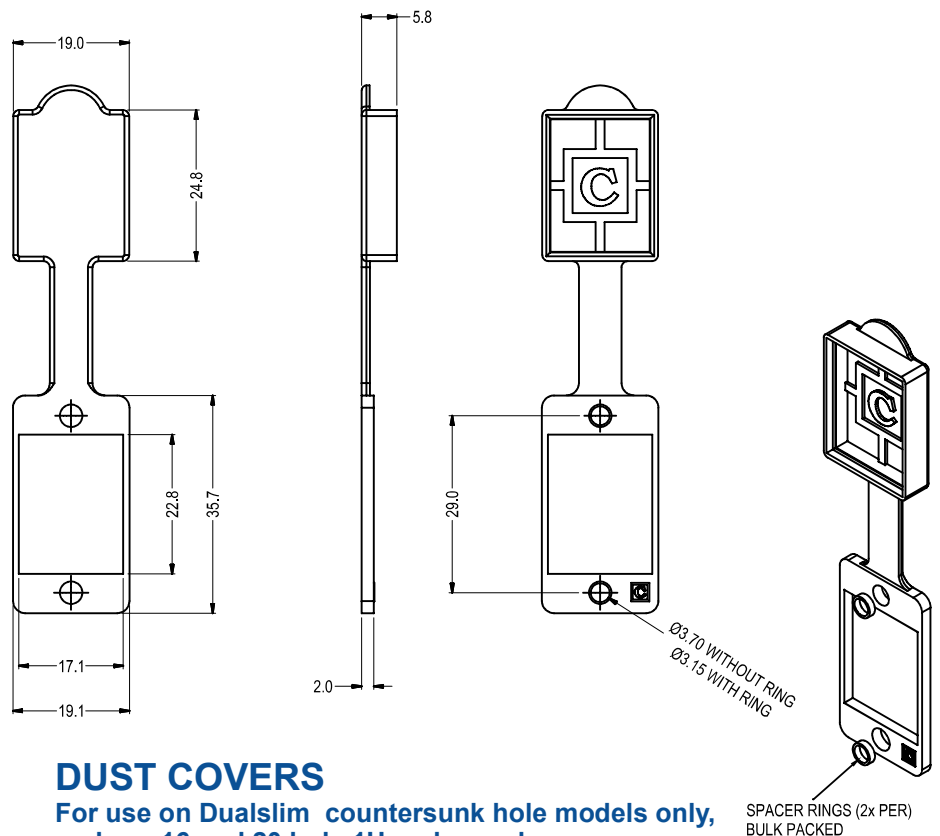

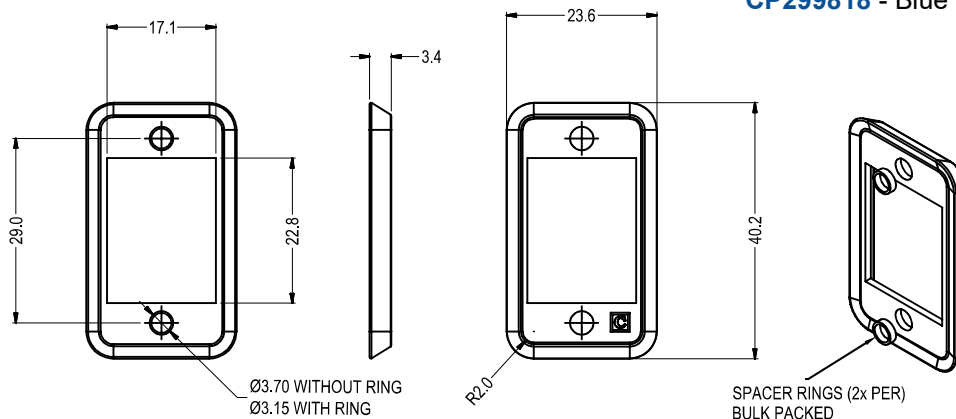

For use on Slim and Dualslim models and with our 16 hole 1U rack panel.

CP299812 - Black Gasket

CP299815 - Green Gasket

CP299817 - Red Gasket
