

specifications

Category 6A/Class E_A, 8-position keyed UTP jack modules shall terminate unshielded twisted 4-pair, 22-24 AWG, 100 ohm cable without the use of a punchdown tool. The jack module shall be mechanically keyed with color-specific positive and negative keying features to prevent unintentional mating with unlike keyed or non-keyed modular plugs. The forward motion termination method shall optimize performance by maintaining cable pair geometry and eliminating conductor untwist. The blue termination cap shall be color-coded for T568A and T568B wiring schemes.

technical information

Category 6A/ Class E_A channel and component performance:	Certified channel performance in a 4-connector configuration up to 100 meters and exceeds the requirements of ANSI/TIA/EIA-568-B.2-10 Category 6A and ISO 11801 Class E _A standards for supporting 10GBASE-T transmission over twisted-pair cabling systems as part of the PANDUIT® TX6A™ 10Gig™ UTP Copper Cabling System Certified component performance to the ANSI/TIA/EIA-568-B.2-10 Category 6A and ISO 11801 Class E _A standards for supporting 10GBASE-T transmission over twisted-pair cabling systems
FCC compliance:	Meets ANSI/TIA-968-A; contacts plated with 50 microinches of gold for superior performance
IEC compliance:	Meets IEC 60603-7
PoE compliance:	Meets IEEE 802.3af and draft requirements of IEEE 802.3at for PoE Plus
UL rated:	No. 1863
Conductor termination range:	Accepts primary conductor O.D. between 0.037 in. to 0.062 in.

key features and benefits

Color-specific keys with positive and negative keying features	Mechanically and visually distinguish connections to prevent unintentional insertion into unlike keyed or non-keyed ports, all network design flexibility and versatility, and accommodate more discrete networks
100% performance tested	Confidence that each jack module will deliver the critical electrical performance requirements
Utilizes Flex technology	Shortens the tuning length of the jack module enabling higher performance
Utilizes enhanced GIGA-TX™ Technology	Wire cap optimizes performance by eliminating conductor untwist and reduces installation time and expense; simplifies termination and maintains conductor twists for reliable and consistent terminations
True strain relief	Controls cable bend radius for long term installed performance
Modular	Jack modules snap in and out of MINI-COM® Faceplates, Modular Patch Panels, and Surface Mount Boxes for easy moves, adds, and changes
Individually serialized	Marked with quality control number for future traceability
Integrated block out feature	Prevents standard RJ11 modular plugs from mating with keyed jack modules

applications

The TX6A™ 10Gig™ Keyed UTP Jack Modules are a component of the PANDUIT® TX6A™ 10Gig™ UTP Copper Cabling System. Keyed connectivity enables a level of visual and mechanical differentiation, and physical layer security that conventional cabling systems cannot provide. This end-to-end system provides a cost-effective medium for ensuring that network bandwidth needs are easily met today and tomorrow. Usage of the TX6A™ 10Gig™ UTP Copper Cabling System includes high bandwidth applications within data centers and connections to high-end workstations. Key applications include:

- 10GBASE-T Ethernet
- Data center server virtualization
- Backbone aggregation
- Data center I/O consolidation
- Consolidation of network interconnects
- Parallel processing and high speed computing
