CSM_XS2_DS_E_12_3

Water- and Environment-resistive FA Connectors Save Wiring and Maintenance Effort

- Compact FA connectors meet IP67 requirements and ensure a 94V-0 fire retardant rating.
- A wide array of connectors makes a wiring system more modular, simplifies maintenance, and reduces downtime.
- Connectors with Cables and Connector Assemblies are available.
- Three types of Connector Assembly: Crimping, soldering, and screw-on.
- Connectors with Cables are UL certified.
- Based on IEC61076-2-101 (IEC60947-5-2) and NECA 4202.

Refer to Safety Precautions on page 34.

^{*}For details, refer to the data sheet of the XS5 Round Water-resistant Connectors (M12 Smartclick).

Note 1. Only DC, straight, 4-core types, and common cable specifications are shown above. Refer to the relevant pages for other products.

XS2: M12 Screw Connection

XS5: One-touch Smartclick Connection* (compatible with M12 screws)

Note: Screw connections will be made if connecting with a screw type.

Turn approx. 1/8 of a turn to connect Connections can be checked using markings

Other than the M12 sizes introduced above, M8-sized (XS3) products are also available.
 For details, refer to the data sheet of the XS3 Round Water-resistant Connectors (M8/S8).

^{*}For details, refer to the data sheet of the XS5 Round Water-resistant Connectors (M12 Smartclick).

Ratings and Specifications

Rated current	4 A					
Rated voltage	250 VAC/VDC					
Contact resistance (Connector)	40 mΩ max. (20 m V max. and 100 mA max.)					
Insulation resistance	1,000 MΩ min. (at 500 VDC)					
Dielectric strength (Connector)	1,500 VAC for 1 min (leakage current: 1 mA max.)					
Degree of protection	IP67 (IEC60529)					
Insertion tolerance	200 times					
Cable holding strength	Cable diameter: 6 mm 98 N/15 s 4 to 5 mm 49 N/15 s 3 mm 29 N/15 s					
Ambient operating temperature range	-25 to 70°C *					
Ambient humidity range	20% to 85%					

^{*}Use the PVC robot cable within a temperature range between 0°C and 70°C to prevent the wires inside the cable from being broken when bending it.

XS2H Plugs on One Cable End

Model Number Structure

Model Number Legend

Use this model number legend to identify products from their model number. When ordering, use a model number from the table in Ordering Information.

1. Type

H: Connector with cables, plug on one cable end

2. AC/DC

A: For AC

D: For DC

3. Connector Poles

4: 4 poles

5: 5 poles

4. Contact Plating

2: Gold plating

5. Cable Connection Direction

1: Straight

6. Cable Length

A: 0.3 m

B: 0.5 m

C:1 m

D:2 m

G:5 m

7. Connections (Numbers inside circles are terminal numbers)

- 8: 1) Brown, 2) White, 3) Blue,
- 4 Black (for DC)
- 9 : (1) Brown, (2) White, (3) Blue,
- (4) Black (for AC)
- A: 1 Brown, 2 ---,
- (4) Blue (for DC) ③ ---,
- B: 1) ---, 2 ---,

- 3 Brown, 4 Blue (for AC)
- C: 1 Brown, 2 ---,
- 3 Blue, 4 Black (for DC)
- G: 1 Brown, 2 White, 3 Blue,
- (4) Black,

8. Connectors on One End/Both Ends

0: One end

9. Cable Specifications

:Standard cable

:Fire-retardant, PVC robot cable

SA :Spatter-resistant cable

Ratings and Specifications

Rated current	1.5 A
Rated voltage	36 VDC
Contact resistance	40 m $Ω$ max.
Contact resistance	(at 20 mVDC max. and 100 mA max.)
Insulation resistance	1,000 MΩ min. (at 500 VDC)
Dielectric strength	1,000 VAC for 1 min (leakage current: 1 mA max.)
Degree of protection	IP67
Insertion tolerance	200 times min.
Ambient operating temperature range	-25 to 70°C

Materials and Finish

Contacts		Brass, gold plating
Thread Bracket, body, M16 nuts		Brass/nickel plated
Pin block		PBT resin, light gray
Cover *1		Soft PBT resin
Seal rubb	er and O-ring *2	Rubber
Cable	Standard cable (8 core, shielded)	6 mm dia. AWG24

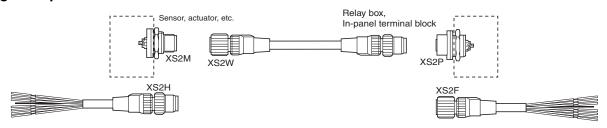

^{*1.} XS2F/XS2H/XS2W only. *2. O-rings are on sockets only.

XS2C/XS2G Safety Precautions

Assembly Procedure for XS2C/XS2G Connector Assemblies

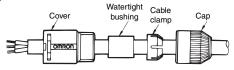

(1) Connector and Cable Diameters

- Connectors for 8, 7, 6, 4, and 3 mm diameter Cables (i.e., Cables that are 7 to 8, 6 to 7, 5 to 6, 4 to 5, and 3 to 4 mm in diameter respectively) are available.
- When assembling a Connector used with a cable, make sure that the external diameter of the Connector is suited to that of the cable.
- A waterproof bushing for 6/7 mm diameter Cable has no stripe, that for 8/4 mm diameter Cable has a single stripe, and that for 3 mm diameter Cable has two stripes.

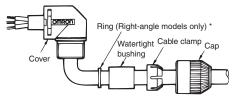

(2) Component Insertion

Crimping/Soldering Connectors

Straight Connectors

Right-angle Connectors

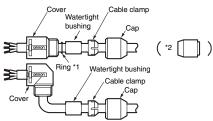

*A ring is not required for Screw-on Connectors.

 As shown in the above illustration, connect the above components to the Cable with its end processed.

Screw-on Connectors

Confirm that you have all of the required parts.

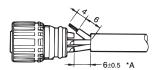

Insulation caps and insulation tubes are included with 5-pole Connectors (XS2C-D5S□ and XS2G-D5S□).

- *1. Rings are not required with 7-mm and 8-mm cables
- *2. Insert the waterproof bushing for 7-mm and 8-mm cables in the direction shown in the diagram.

(3) Wiring (Dressing the Cable Ends)

Soldering Connectors

- Strip 10 mm of the Cable sheath and 4 mm of each core.
- Before soldering cores and solder cup pins together, soldercoat each of them.
- The following conditions are recommended for soldering each solder cup pin.

Soldering temperature: 350±5°C

Soldering period: 3±1 s

 The length marked *A should be 6.5 mm max., otherwise the proper degree of protection of the connector will not be maintained.

Crimping Connectors

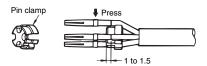

Crimping

- Strip 14 mm of the Cable sheath and 4 mm of each core.
- Make sure that each core is not damaged and its end strands are not spread out.
- Mount the XY2F-0003 Locator to XY2F-0002 Crimp Tool, both of which are sold separately, and set the selector dial of the Crimp Tool to 8.
- After mounting the crimping pins to the Locator, fully insert the cores to the crimping pins.
- Squeeze the handle of the Crimp Tool to press-fit the cores to the crimping pins.

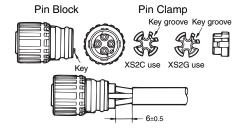

(Squeeze the handle firmly until the handle automatically returns to the release position.)

Wiring

 After press-fitting the cores to the pins, insert the pins into the pin clamp as shown in the illustration. Then make sure that the lead colors correspond to the pin clamp numbers that are identical to the connector pin numbers.

Insertion

 Tentatively insert the pins to the pin block holes so that the key on the pin block will coincide with the key groove on the pin clamp. Then insert the cable along with the pin clamp.

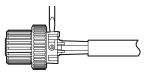

Screw-on Connectors

Dressing the Cable End

• Four-pole Connectors

 Loosen the screws on pins 1 to 4 and insert the cores according to the pin numbers.

 Use the dedicated Screwdriver (XW4Z-00B)* and tighten the screws securely so that the cores do not pull out. (0.15 to 0.2 N·m)

• Five-pole Connectors

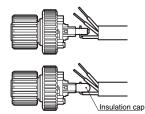

• Strip the cable sheath for a total of 15 mm and strip the core covering for 8 mm for the core to connect to pin 5.

- Connect the core to pin 5 (in the center) first.
- Insert the core from the side of the hold with the tab and tighten the screw securely (tightening torque: Pins 1 to 4: 0.15 to 0.2 N·m, Pin 5: 0.03 to 0.05 N·m), and then cut off the excess wire with wire cutters.

 Bend the cable as shown below, attached the enclosed insulation cap, and then strip the other cores.

• Connect the cores to pins 1 to 4.

Connecting Shielded Cables to Five-pole Connectors

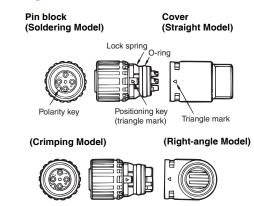

- Place the insulation tub on the drain line of the shield and connect it to the terminal.
- Tighten the screw and then check visually to see if there is insulation between the cores.

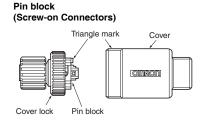

*When tightening the screws, use the dedicated XW4Z-00B Screwdriver that matches with the screw-slot dimensions.

(4) Inserting Pin Block

- Mount the cover to the pin block so that the triangle mark on the pin block will coincide with the triangle mark on the cover.
- If the cover is used for a Right-angle model, the relationship between the position of the polarity key on the engaged side and cable connection direction will be determined by the direction in which the positioning key is inserted into the cover, which can be rotated by 90°.
- Fully insert the positioning key until the positioning key is hidden by the casing.

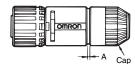

- Align the triangular marks on the pin block and cover and insert the pin block into the cover.
- Press them together firmly until the pin block does not come out of the cover. (0.39 to 0.49 N·m)

(5) Mounting Cap

 After mounting the cover to the pin block and the cover snaps into place, tighten the cap securely by hand (0.39 to 0.49 N·m)

Note: If the cap is not tighten securely enough, the degree of protection (IP67) may not be maintained or vibration may cause the cap to become loose. Do not tighten the cap with pliers or similar tools; they may damage the

 After fully tightening the cap, length A should be approximately one of the following according to the cable external diameter and the Connector model. (Use these as a guide.)

External diameter of	Cable external diameter (mm)				
applicable cable	6 mm	5 mm	4 mm	3 mm	
For 6-mm-dia. cable	1	0	_	_	
For 4-mm-dia. cable	_	2	1	_	
For 3-mm-dia. cable	_	_	2	1	

(6) After Assembly

 Confirm the insulation between cores after completing assembly.

Recommended Cables

When connecting a commercially available cable to a connector assembly, use a cable with an outside diameter of 3 to 6 mm and core conductor sizes of 0.18 to 0.75 mm² for crimping connectors and 0.5 mm² maximum for soldering connectors.

Connector Arrangement

For safety, when constructing a connection system between a Sensor and panel with a connector, make sure that the connector plug is on the Sensor side and the connector socket is on the panel side (i.e., the female pins are located on the power-supply side).

XS2R-D422-1 (Aggregate Model)

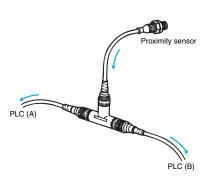

- A pair of Two-wire Sensors or Three-wire Sensors can be connected as shown in the illustration.
- The XS2R-D422-5 has feed through connections, thus working as a connector for the extension cable.

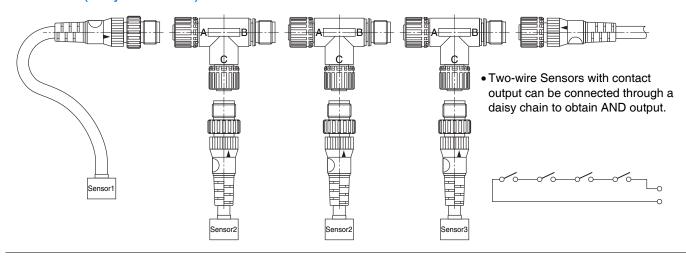

XS2R-D423-1 (Bifurcated Model)

• Two or Three-wire Sensor signals can be bifurcated.

XS2R-D424-1 (Daisy Chain Model)

Safety Precautions

Precautions for Correct Use

Do not use the product in atmospheres or environments that exceed product ratings.

• Before using the XS2R for Sensors, make sure that the wiring of the Sensors and the internal connections of the XS2R are correct.

Ordering Information

Connector Covers

Waterproof Covers

XS2Z-11

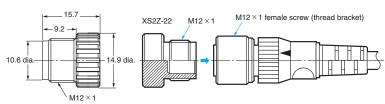

Application Example: XS2Z-11

You can use the Waterproof Cover when the connector is not connected to ensure an IP67 degree of protection. When mounting the Water-resistive Cover to a Connector, be sure to apply a torque range between 0.39 and 0.49 N·m to tighten the Water-resistive Cover.

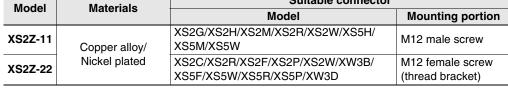

XS27-	22

Model	Materials	Suitable connector	
Model	Materiais	Model	Mounting portion
XS2Z-11	Copper alloy/	XS2G/XS2H/XS2M/XS2R/XS2W/XS5H/ XS5M/XS5W	M12 male screw
XS2Z-22	Nickel plated	XS2C/XS2R/XS2F/XS2P/XS2W/XW3B/ XS5F/XS5W/XS5R/XS5P/XW3D	M12 female screw (thread bracket)

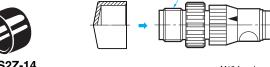

M12 male screw

Dust Covers

XS2Z-13

XS2Z-13

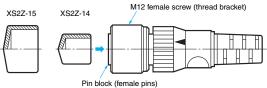

Application Example: XS2Z-13

XS2Z-15/XS2Z-14

The Dust Cover is for dust prevention and does not ensure IP67 degree of protection.

When mounting the Dust Cover to a Connector, be sure to press the Dust Cover onto the Connector until the Connector is fully inserted into the Dust Cover.

Model Mounting portion	Model	Materials	Suitable connector

Loosening-preventing C-ring

Application Example: XS2Z-18

XS2Z-18

Note: Attach C-rings to both the plug and socket.

This C-ring prevents the M12 connector from becoming loose.

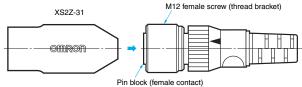

When you attach the C-ring, press it securely between the thread bracket and cover.

Model	Materials	Suitable connector
XS2Z-18	POM	XS2F/H/W

Sputter Protective Cover

XS2Z-31

Application Example: XS2Z-31

The Sputter Protective Cover protects the connector from weld sputter.

male contact)	Make sure it covers the entire connector.

Tools

Torque Wrench

XY2F-0004

Crimp Tool

XY2F-0002

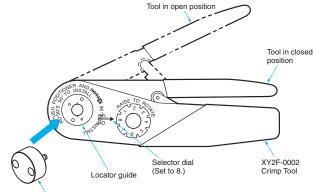

XY2F-0003

Use the Crimp Tool to crimp a cable core to the XS2U Crimping Pin used with the XS2C or XS2G Crimping Connector. Both the Crimp Tool and the optional Locator are required for use.

- The XY2F-0002 Crimp Tool is DMC's AFM8 (M22520/ 2-01).
- The XY2F-0003 Locator is a component for positioning crimp terminals. Use the screw provided to mount the Locator to the locator guide of the Crimp Tool.

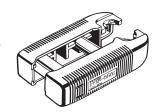

XY2F-0003 Locator Mount with the screw, and insert the contacts from the opposite side.

Pin-block Extraction Tool

XY2F-0001

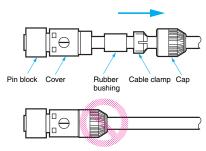

Use this tool to extract a Pin Block from the covers in order to make wiring changes or corrections after the cover has been mounted to the pin block for Connector Assemblies (XS2C/XS2G, soldering/crimping).

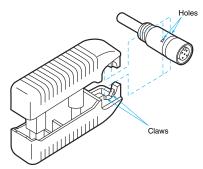

Safety Precautions

Extraction Procedure

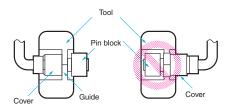

- (1) Disconnecting Components
- Disconnect all components on the cap side from the cover.

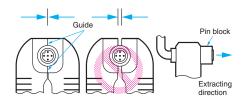

- (2) Extracting Pin Block
- Insert the claws of the Tool into the four holes of the cover.

• Make sure that the pin block is outside the Tool.

 Press the Tool so that the guides of the Tool are in close contact. Then pull the pin block straight.

Precautions for Correct Use

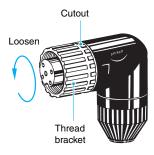

- The pin block must not be extracted from the same Connector more than 3 times, otherwise the proper degree of protection of the pin block or Connector will not be maintained.
- Do not use the product in atmospheres or environments that exceed product ratings.

Tightening Cap (Connector Assemblies)

- Do not use pliers to tighten caps, otherwise the caps may be damaged. Use your fingers to tighten the Connectors sufficiently. (0.39 to 0.49 N·m)
- If caps are not tightened securely, the Connectors may not maintain their proper degree of protection (i.e., IP67) or the caps may become loose due to vibration.

Connector Connection and Disconnection

- When connecting or disconnecting Connectors, be sure to hold the Connectors by hand.
- Do not hold the cable when disconnecting Connectors.
- Connectors mating with sockets must be fully inserted into the mating sections. Tighten the thread bracket carefully so that the threads will not be damaged.
- Fully tighten thread bracket within a torque range between 0.39 and 0.49 N·m and be sure that the threads of the opposite parts are hidden by the thread bracket.
- When disconnecting Connectors, be sure to loosen the thread brackets first. Do not loosen the caps.
- Thread brackets must be loosened in the cutout direction.

Degree of Protection

- Do not impose external force continuously on the joints of pin blocks and covers, otherwise the Connectors may not keep its proper degree of protection (i.e., IP67).
- The degree of protection of connectors (IP67) is not for a fully watertight structure. Do not use them underwater.
- Connectors are of resin mold construction. Do not impose excessive force on them.

Setup

- Do not make any cable bends near the base of the Unit.
- Any bends made must have a minimum radius of 40 mm.

Terms and Conditions Agreement

Read and understand this catalog.

Please read and understand this catalog before purchasing the products. Please consult your OMRON representative if you have any questions or comments.

Warranties.

- (a) Exclusive Warranty. Omron's exclusive warranty is that the Products will be free from defects in materials and workmanship for a period of twelve months from the date of sale by Omron (or such other period expressed in writing by Omron). Omron disclaims all other warranties, express or implied.
- (b) Limitations. OMRON MAKES NO WARRANTY OR REPRESENTATION, EXPRESS OR IMPLIED, ABOUT NON-INFRINGEMENT, MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE OF THE PRODUCTS. BUYER ACKNOWLEDGES THAT IT ALONE HAS DETERMINED THAT THE

PRODUCTS WILL SUITABLY MEET THE REQUIREMENTS OF THEIR INTENDED USE.

Omron further disclaims all warranties and responsibility of any type for claims or expenses based on infringement by the Products or otherwise of any intellectual property right. (c) Buyer Remedy. Omron's sole obligation hereunder shall be, at Omron's election, to (i) replace (in the form originally shipped with Buyer responsible for labor charges for removal or replacement thereof) the non-complying Product, (ii) repair the non-complying Product, or (iii) repay or credit Buyer an amount equal to the purchase price of the non-complying Product; provided that in no event shall Omron be responsible for warranty, repair, indemnity or any other claims or expenses regarding the Products unless Omron's analysis confirms that the Products were properly handled, stored, installed and maintained and not subject to contamination, abuse, misuse or inappropriate modification. Return of any Products by Buyer must be approved in writing by Omron before shipment. Omron Companies shall not be liable for the suitability or unsuitability or the results from the use of Products in combination with any electrical or electronic components, circuits, system assemblies or any other materials or substances or environments. Any advice, recommendations or information given orally or in writing, are not to be construed as an amendment or addition to the above warrantv.

See http://www.omron.com/global/ or contact your Omron representative for published information.

Limitation on Liability; Etc.

OMRON COMPANIES SHALL NOT BE LIABLE FOR SPECIAL, INDIRECT, INCIDENTAL, OR CONSEQUENTIAL DAMAGES, LOSS OF PROFITS OR PRODUCTION OR COMMERCIAL LOSS IN ANY WAY CONNECTED WITH THE PRODUCTS, WHETHER SUCH CLAIM IS BASED IN CONTRACT, WARRANTY, NEGLIGENCE OR STRICT LIABILITY.

Further, in no event shall liability of Omron Companies exceed the individual price of the Product on which liability is asserted.

Suitability of Use.

Omron Companies shall not be responsible for conformity with any standards, codes or regulations which apply to the combination of the Product in the Buyer's application or use of the Product. At Buyer's request, Omron will provide applicable third party certification documents identifying ratings and limitations of use which apply to the Product. This information by itself is not sufficient for a complete determination of the suitability of the Product in combination with the end product, machine, system, or other application or use. Buyer shall be solely responsible for determining appropriateness of the particular Product with respect to Buyer's application, product or system. Buyer shall take application responsibility in all cases.

NEVER USE THE PRODUCT FOR AN APPLICATION INVOLVING SERIOUS RISK TO LIFE OR PROPERTY OR IN LARGE QUANTITIES WITHOUT ENSURING THAT THE SYSTEM AS A WHOLE HAS BEEN DESIGNED TO ADDRESS THE RISKS, AND THAT THE OMRON PRODUCT(S) IS PROPERLY RATED AND INSTALLED FOR THE INTENDED USE WITHIN THE OVERALL EQUIPMENT OR SYSTEM.

Programmable Products.

Omron Companies shall not be responsible for the user's programming of a programmable Product, or any consequence thereof.

Performance Data.

Data presented in Omron Company websites, catalogs and other materials is provided as a guide for the user in determining suitability and does not constitute a warranty. It may represent the result of Omron's test conditions, and the user must correlate it to actual application requirements. Actual performance is subject to the Omron's Warranty and Limitations of Liability.

Change in Specifications.

Product specifications and accessories may be changed at any time based on improvements and other reasons. It is our practice to change part numbers when published ratings or features are changed, or when significant construction changes are made. However, some specifications of the Product may be changed without any notice. When in doubt, special part numbers may be assigned to fix or establish key specifications for your application. Please consult with your Omron's representative at any time to confirm actual specifications of purchased Product.

Errors and Omissions. Information presented by Omron Companies has been checked and is believed to be accurate; however, no responsibility is assumed for clerical, typographical or proofreading errors or omissions.

2021.5

In the interest of product improvement, specifications are subject to change without notice.
