R1RP0416DI Series

Wide Temperature Version
4M High Speed SRAM (256-kword × 16-bit)

Description

The R1RP0416DI Series is a 4-Mbit high speed static RAM organized 256-k word $\times$ 16-bit. It has realized high speed access time by employing CMOS process (6-transistor memory cell) and high speed circuit designing technology. It is most appropriate for the application which requires high speed, high density memory and wide bit width configuration, such as cache and buffer memory in system. It is packaged in 400-mil 44-pin plastic SOJ and 400-mil 44-pin plastic TSOPII.

Features

- Single 5.0V supply: 5.0V ± 10%
- Access time: 10ns /12ns (max)
- Completely static memory
  — No clock or timing strobe required
- Equal access and cycle times
- Directly TTL compatible
  — All inputs and outputs
- Operating current: 170mA / 160mA (max)
- TTL standby current: 40mA (max)
- CMOS standby current : 5mA (max)
- Center V_{CC} and V_{SS} type pin out
- Temperature range: −40 to +85°C

Absolute Maximum Ratings

Parameter	Symbol	Value	Unit
Supply voltage relative to V_{SS}	V_{CC}	−0.5 to +7.0	V
Voltage on any pin relative to V_{SS}	V_T	−0.5[*1] to V_{CC} + 0.5[*2]	V
Power dissipation	P_T	1.0	W
Operating temperature	Topr	−40 to +85	°C
Storage temperature	Tstg	−55 to +125	°C
Storage temperature under bias	Tbias	−40 to +85	°C

Notes: 1. V_T (min) = −2.0 V for pulse width (under shoot) ≤ 6 ns.
2. V_T (max) = V_{CC} + 2.0 V for pulse width (over shoot) ≤ 6 ns.

Recommended DC Operating Conditions

(Ta = −40 to +85°C)

Parameter	Symbol	Min	Typ	Max	Unit
Supply voltage	V_{CC}[*3]	4.5	5.0	5.5	V
	V_{SS}[*4]	0	0	0	V
Input voltage	V_{IH}	2.2	—	V_{CC} + 0.5[*2]	V
	V_{IL}	−0.5[*1]	—	0.8	V

Notes: 1. V_{IL} (min) = −2.0V for pulse width (under shoot) ≤ 6ns.
2. V_{IH} (max) = V_{CC} + 2.0V for pulse width (over shoot) ≤ 6ns.
3. The supply voltage with all V_{CC} pins must be on the same level.
4. The supply voltage with all V_{SS} pins must be on the same level.

DC Characteristics

(Ta = −40 to +85°C, V_{CC} = 5.0V ± 10%, V_{SS} = 0V)

Parameter		Symbol	Min	Max	Unit	Test conditions
Input leakage current		$|I_{LI}|$	—	2	μA	V_{IN} = V_{SS} to V_{CC}
Output leakage current		$|I_{LO}|$	—	2	μA	V_{IN} = V_{SS} to V_{CC}
Operating power supply current	10ns cycle	I_{CC}	—	170	mA	Min cycle CS# = V_{IL}, I_{OUT} = 0mA Other inputs = V_{IH}/V_{IL}
	12ns cycle	I_{CC}	—	160	mA	
Standby power supply current		I_{SB}	—	40	mA	Min cycle, CS# = V_{IH}, Other inputs = V_{IH}/V_{IL}
		I_{SB1}	—	5	mA	f = 0MHz V_{CC} ≥ CS# ≥ V_{CC} − 0.2V, (1) 0V ≤ V_{IN} ≤ 0.2V or (2) V_{CC} ≥ V_{IN} ≥ V_{CC} − 0.2V
Output voltage		V_{OL}	—	0.4	V	I_{OL} = 8mA
		V_{OH}	2.4	—	V	I_{OH} = −4mA

Capacitance

(Ta = +25°C, f = 1.0MHz)

Parameter	Symbol	Min	Max	Unit	Test conditions
Input capacitance[1]	C_{IN}	—	6	pF	V_{IN} = 0V
Input/output capacitance[1]	$C_{I/O}$	—	8	pF	$V_{I/O}$ = 0V

Note: 1. This parameter is sampled and not 100% tested.

Notes: 1. Transition is measured ±200mV from steady voltage with output load (B). This parameter is sampled and not 100% tested.

2. If the CS# or LB# or UB# low transition occurs simultaneously with the WE# low transition or after the WE# transition, output remains a high impedance state.

3. WE# and/or CS# must be high during address transition time.

4. If CS#, OE#, LB# and UB# are low during this period, I/O pins are in the output state. Then the data input signals of opposite phase to the outputs must not be applied to them.

5. t_{AS} is measured from the latest address transition to the latest of CS#, WE#, LB# or UB# going low.

6. t_{WR} is measured from the earliest of CS#, WE#, LB# or UB# going high to the first address transition.

7. A write occurs during the overlap of a low CS#, a low WE# and a low LB# or a low UB# (t_{WP}). A write begins at the latest transition among CS# going low, WE# going low and LB# going low or UB# going low. A write ends at the earliest transition among CS# going high, WE# going high and LB# going high or UB# going high.

8. t_{CW} is measured from the later of CS# going low to the end of write.

Notice

1. Descriptions of circuits, software and other related information in this document are provided only to illustrate the operation of semiconductor products and application examples. You are fully responsible for the incorporation or any other use of the circuits, software, and information in the design of your product or system. Renesas Electronics disclaims any and all liability for any losses and damages incurred by you or third parties arising from the use of these circuits, software, or information.

2. Renesas Electronics hereby expressly disclaims any warranties against and liability for infringement or any other claims involving patents, copyrights, or other intellectual property rights of third parties, by or arising from the use of Renesas Electronics products or technical information described in this document, including but not limited to, the product data, drawings, charts, programs, algorithms, and application examples.

3. No license, express, implied or otherwise, is granted hereby under any patents, copyrights or other intellectual property rights of Renesas Electronics or others.

4. You shall not alter, modify, copy, or reverse engineer any Renesas Electronics product, whether in whole or in part. Renesas Electronics disclaims any and all liability for any losses or damages incurred by you or third parties arising from such alteration, modification, copying or reverse engineering.

5. Renesas Electronics products are classified according to the following two quality grades: "Standard" and "High Quality". The intended applications for each Renesas Electronics product depends on the product's quality grade, as indicated below.

    "Standard": Computers; office equipment; communications equipment; test and measurement equipment; audio and visual equipment; home electronic appliances; machine tools; personal electronic equipment; industrial robots; etc.

    "High Quality": Transportation equipment (automobiles, trains, ships, etc.); traffic control (traffic lights); large-scale communication equipment; key financial terminal systems; safety control equipment; etc.

    Unless expressly designated as a high reliability product or a product for harsh environments in a Renesas Electronics data sheet or other Renesas Electronics document, Renesas Electronics products are not intended or authorized for use in products or systems that may pose a direct threat to human life or bodily injury (artificial life support devices or systems; surgical implantations; etc.), or may cause serious property damage (space system; undersea repeaters; nuclear power control systems; aircraft control systems; key plant systems; military equipment; etc.). Renesas Electronics disclaims any and all liability for any damages or losses incurred by you or any third parties arising from the use of any Renesas Electronics product that is inconsistent with any Renesas Electronics data sheet, user's manual or other Renesas Electronics document.

6. When using Renesas Electronics products, refer to the latest product information (data sheets, user's manuals, application notes, "General Notes for Handling and Using Semiconductor Devices" in the reliability handbook, etc.), and ensure that usage conditions are within the ranges specified by Renesas Electronics with respect to maximum ratings, operating power supply voltage range, heat dissipation characteristics, installation, etc. Renesas Electronics disclaims any and all liability for any malfunctions, failure or accident arising out of the use of Renesas Electronics products outside of such specified ranges.

7. Although Renesas Electronics endeavors to improve the quality and reliability of Renesas Electronics products, semiconductor products have specific characteristics, such as the occurrence of failure at a certain rate and malfunctions under certain use conditions. Unless designated as a high reliability product or a product for harsh environments in a Renesas Electronics data sheet or other Renesas Electronics document, Renesas Electronics products are not subject to radiation resistance design. You are responsible for implementing safety measures to guard against the possibility of bodily injury, injury or damage caused by fire, and/or danger to the public in the event of a failure or malfunction of Renesas Electronics products, such as safety design for hardware and software, including but not limited to redundancy, fire control and malfunction prevention, appropriate treatment for aging degradation or any other appropriate measures. Because the evaluation of microcomputer software alone is very difficult and impractical, you are responsible for evaluating the safety of the final products or systems manufactured by you.

8. Please contact a Renesas Electronics sales office for details as to environmental matters such as the environmental compatibility of each Renesas Electronics product. You are responsible for carefully and sufficiently investigating applicable laws and regulations that regulate the inclusion or use of controlled substances, including without limitation, the EU RoHS Directive, and using Renesas Electronics products in compliance with all these applicable laws and regulations. Renesas Electronics disclaims any and all liability for damages or losses occurring as a result of your noncompliance with applicable laws and regulations.

9. Renesas Electronics products and technologies shall not be used for or incorporated into any products or systems whose manufacture, use, or sale is prohibited under any applicable domestic or foreign laws or regulations. You shall comply with any applicable export control laws and regulations promulgated and administered by the governments of any countries asserting jurisdiction over the parties or transactions.

10. It is the responsibility of the buyer or distributor of Renesas Electronics products, or any other party who distributes, disposes of, or otherwise sells or transfers the product to a third party, to notify such third party in advance of the contents and conditions set forth in this document.

11. This document shall not be reprinted, reproduced or duplicated in any form, in whole or in part, without prior written consent of Renesas Electronics.

12. Please contact a Renesas Electronics sales office if you have any questions regarding the information contained in this document or Renesas Electronics products.

(Note1) "Renesas Electronics" as used in this document means Renesas Electronics Corporation and also includes its directly or indirectly controlled subsidiaries.

(Note2) "Renesas Electronics product(s)" means any product developed or manufactured by or for Renesas Electronics.
