

DIY USB Cable Parts – Straight Type A Jack

PRODUCT ID: 4110

If you love DIY cable-rigging, then these USB adapters are right up your alley! Making custom USB cables has never been easier. Just grab one of our ribbon cables, then swap and switch any of our USB adapters on each end using the flex cable clips. There are options a-plenty!

This version is a Straight USB Type A Female Socket only.

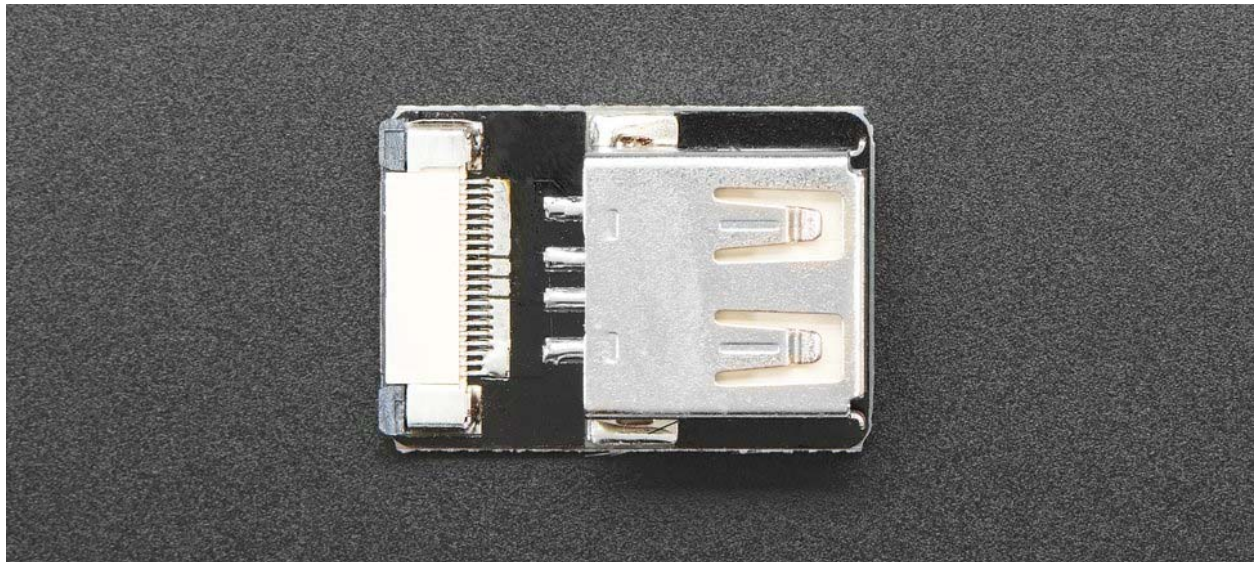

Ribbon cable and other adapter not included! Check out all of the options we have in the shop to craft your very own custom cable.

We tested out these DIY cable kits with a Circuit Playground and a computer USB port and they worked great, even at the longer ribbon lengths, but note that they are not going to be as durable or shielded as ready-made cables.

TECHNICAL DETAILS
