

## EP Cores (6598130121)

Part Number: 6598130121

98 EP CORE SET

EP designs reduce the effect of residual air gap upon the effective permeability of the core, hence they minimize coil volume for a given inductance. EP cores also provide a high degree of isolation from adjacent components and are advantageously used in low power devices, matching and broadband transformers.

□ EP cores can be supplied with the center post gapped to a mechanical dimension or an A₁ value.
