## EP Cores (6595100121)

Part Number: 6595100121

95 EP CORE SET

**EP designs reduce the effect of residual air gap upon the effective permeability of the core, hence they minimize coil volume for a given inductance. EP cores also provide a high degree of isolation from adjacent components and are advantageously used in low power devices, matching and broadband transformers.**

EP cores can be supplied with the center post gapped to a mechanical dimension or an  $A_L$  value.
