

## DATA SHEET

# SKY66188-11: 758 to 803 MHz Linear Power Amplifier

## Applications

- 3G/4G LTE Band 28 small cell
- Active distributed antenna system
- Cellular repeaters
- Driver amplifier

## Features

- High gain: 37 dB (unconditionally stable)
- High linearity: +23 dBm with -50 dBc ACLR @ 85°C (WCDMA Test Model 1 with 64 DPCH)
- RF input and output internally matched to 50 ohms
- Excellent output return loss: <-15 dB
- Integrated active bias: performance compensated over temp
- PA On/Off function: 4.0  $\mu$ s switching time
- Integrated coupler for output power monitoring
- Single supply voltage: 3.3 V
- Minimal external components
- Pin-to-pin compatible PA family supporting all 3GPP bands
- Small 5 x 5 mm, 28-pin package (MSL3, 260 °C per JEDEC J-STD-020)

Skyworks Green™ products are compliant with all applicable legislation and are halogen-free. For additional information, refer to *Skyworks Definition of Green™*, document number SQ04-0074.

**Figure 1. SKY66188-11 Linear PA Block Diagram**

## Description

The SKY66188-11 is a high-linearity power amplifier (PA) with fully matched input/output and high gain. The compact 5 x 5 mm PA is designed for FDD 3G/4G LTE small cell base stations operating from 758 to 803 MHz. The active biasing circuitry is integrated to compensate PA performance over temperature, voltage, and process variation as well as an internal coupler for power monitoring.

The SKY66188-11 requires minimal external components and is part of a high-linearity, pin-to-pin compatible PA family supporting all 3GPP bands.

A block diagram of the SKY66188-11 is shown in Figure 1. The device package and pinout for the 28-pin device are shown in Figure 2. Table 1 lists the pin-to-pin compatible parts in the PA family.

**Table 1. Pin-to-Pin Compatible PA Family**

| Part Number | Frequency (MHz) | LTE Band                 |
|-------------|-----------------|--------------------------|
| SKY66181-11 | 1805 to 1880    | 3                        |
| SKY66184-11 | 2110 to 2170    | 1, 4, and 10             |
| SKY66185-11 | 851 to 894      | 5, 6, 18, 19, 26, and 27 |
| SKY66186-11 | 728 to 768      | 12, 13, 14, and 17       |
| SKY66187-11 | 2620 to 2690    | 7                        |
| SKY66188-11 | 758 to 803      | 28                       |
| SKY66189-11 | 1930 to 1995    | 2 and 25                 |

## Technical Description

The SKY66188-11 PA contains all of the needed RF matching and DC biasing circuits. This two-stage device is optimized for high linearity and power efficiency. These features make the device suitable for wideband applications where PA linearity and power consumption are of critical importance (e.g., small cell and infrastructure applications).

The device is designed for standard WCDMA and LTE modulated signals. Under these stringent test conditions, the device exhibits excellent spectral purity and power efficiency.

## Electrical and Mechanical Specifications

The absolute maximum ratings of the SKY66188-11 are provided in Table 3. The recommended operating conditions are specified in Table 4, and electrical specifications are provided in Table 5.

Typical performance characteristics are shown in Figures 3 through 12.

**Table 3. SKY66188-11 Absolute Maximum Ratings<sup>1</sup>**

| Parameter                               | Symbol | Minimum | Maximum | Units |
|-----------------------------------------|--------|---------|---------|-------|
| Supply voltage (VCC)                    | VCC    | 0       | +4.0    | V     |
| Total supply current                    | ICC    |         | 700     | mA    |
| Logic control input voltage (VEN)       | VEN    | -0.5    | 3.6     | V     |
| Case operating temperature <sup>2</sup> | Tc     | -40     | +101    | °C    |
| Storage temperature                     | TSTG   | -55     | +150    | °C    |
| Junction temperature                    | TJ     |         | +150    | °C    |
| Thermal resistance                      | θJC    |         | 21      | °C/W  |
| Power dissipation                       | PDISS  |         | 2.3     | W     |
| Electrostatic discharge:                | ESD    |         |         |       |
| Charged Device Model (CDM)              |        |         | 500     | V     |
| Human Body Model (HBM)                  |        |         | 150     | V     |

<sup>1</sup> Exposure to maximum rating conditions for extended periods may reduce device reliability. There is no damage to device with only one parameter set at the limit and all other parameters set at or below their nominal value. Exceeding any of the limits listed here may result in permanent damage to the device.

<sup>2</sup> Case operating temperature (Tc) refers to the temperature of the bottom ground pad.

**ESD HANDLING:** Although this device is designed to be as robust as possible, electrostatic discharge (ESD) can damage this device. This device must be protected at all times from ESD when handling or transporting. Static charges may easily produce potentials of several kilovolts on the human body or equipment, which can discharge without detection. Industry-standard ESD handling precautions should be used at all times.

**Table 4. SKY66188-11 Recommended Operating Conditions**

| Parameter                                      | Symbol | Min | Typ | Max | Units |
|------------------------------------------------|--------|-----|-----|-----|-------|
| Frequency range                                | f      | 758 |     | 803 | MHz   |
| Supply voltage (VCC1, VCC2, VCC3) <sup>1</sup> | VCC    | 3.0 | 3.3 | 3.6 | V     |
| PA enable control voltage (active low):        |        |     |     |     |       |
| Disable                                        | VENH   | 1.8 |     | 3.6 | V     |
| Enable                                         | VENL   | 0   |     | 0.6 | V     |
| PA enable current (@ PAEN = 3.6 V)             | IEN    |     |     | <1  | mA    |
| Case operating temperature                     | Tc     | -40 |     | +85 | °C    |

<sup>1</sup> Voltage levels measured at the pads of the package. The Evaluation Board supply voltage levels may be different.

**Table 5. SKY66188-11 Electrical Specifications<sup>1</sup>****(V<sub>CC</sub> = +3.3 V, T<sub>c</sub> = +25 °C, f = 780.5 MHz, Characteristic Impedance [Z<sub>0</sub>] = 50 ohms, V<sub>en</sub> = 0 V, Unless Otherwise Noted)**

| Parameter                      | Symbol             | Test Condition                                                                           | Min   | Typ   | Max   | Units |

## Evaluation Board Description

The SKY66188-11 Evaluation Board is used to test the performance of the SKY66188-11 PA. A typical application schematic diagram is shown in Figure 13. A Bill of Materials for the SKY66188-11 Evaluation Board is listed in Table 6. An assembly drawing for the Evaluation Board is shown in Figure 14. The board layer detail is shown in Figure 15. The layer detail physical characteristics are shown in Figure 16.

## Application Circuit Notes

**Center Ground.** It is extremely important to sufficiently ground the bottom ground pad of the device for both thermal and stability reasons. Multiple small vias are acceptable and work well under the device if solder migration is an issue.

**GND (pins 1, 2, 6, 11, 13, 15, 16, 20, 21, 25, and 27).** Attach all ground pins to the RF ground plane with the largest diameter and lowest inductance via that the layout allows. Multiple small vias are acceptable and work well under the device if solder migration is an issue.

**VBIAS (pin 10).** The bias supply voltage for each stage, nominally set to +3.3 V.

**RFOUT (pin 19).** Amplifier RF output pin ( $Z_0 = 50$  ohms). The module includes an onboard internal DC blocking capacitor. All impedance matching is provided internal to the module.

**VCC1 and VCC3 (pins 28 and 23, respectively).** Supply voltage for each stage collector bias is nominally set to 3.3 V. Bypass and decoupling capacitors C1, C2, C5, and C6 should be placed in the approximate location shown on the evaluation board assembly drawing, although exact placement is not critical.

**RFIN (pin 4).** Amplifier RF input pin ( $Z_0 = 50$  ohms). The module includes an onboard internal DC blocking capacitor. All impedance matching is provided internal to the module.

## Package Dimensions

The typical part marking is shown in Figure 17. Figure 18 shows the PCB layout footprint. Figure 19 shows the package dimensions, and Figure 20 provides the tape and reel dimensions.

## Package and Handling Information

Since the device package is sensitive to moisture absorption, it is baked and vacuum packed before shipping. Instructions on the shipping container label regarding exposure to moisture after the container seal is broken must be followed. Otherwise, problems related to moisture absorption may occur when the part is subjected to high temperature during solder assembly.

The SKY66188-11 is rated to Moisture Sensitivity Level 3 (MSL3) at 260 °C. It can be used for lead or lead-free soldering. For additional information, refer to the Skyworks Application Note, *PCB Design and SMT Assembly/Rework Guidelines for MCM-L Packages*, document number 101752.

Care must be taken when attaching this product, whether it is done manually or in a production solder reflow environment. Production quantities of this product are shipped in a standard tape and reel format.

**Figure 17. Typical Part Marking**

**Notes:**

1. Thermal vias should be resin filled and capped in accordance with IPC-4761 type VII vias.
2. Recommended Cu thickness is 30 to 35  $\mu$ m.

203727-018

**Figure 18. SKY66188-11 PCB Layout Footprint**

203727-019

**Figure 19. SKY66188-11 Package Dimensions**

**Notes:**

1. Carrier tapes must meet all requirements of Skyworks GP01-D232 procurement spec for tape and reel shipping.
2. Carrier tape shall be black conductive polycarbonate.
3. Cover tape shall be transparent conductive material.
4. ESD-surface resistivity shall be  $\leq 1 \times 10^{10} \Omega/\text{square}$  per EJA, JEDEC TNR specification.
5. All measurements are in millimeters.

203727-020

No license, whether express, implied, by estoppel or otherwise, is granted to any intellectual property rights by this document. Skyworks assumes no liability for any materials, products or information provided hereunder, including the sale, distribution, reproduction or use of Skyworks products, information or materials, except as may be provided in Skyworks Terms and Conditions of Sale.

THE MATERIALS, PRODUCTS AND INFORMATION ARE PROVIDED "AS IS" WITHOUT WARRANTY OF ANY KIND, WHETHER EXPRESS, IMPLIED, STATUTORY, OR OTHERWISE, INCLUDING FITNESS FOR A PARTICULAR PURPOSE OR USE, MERCHANTABILITY, PERFORMANCE, QUALITY OR NON-INFRINGEMENT OF ANY INTELLECTUAL PROPERTY RIGHT; ALL SUCH WARRANTIES ARE HEREBY EXPRESSLY DISCLAIMED. SKYWORKS DOES NOT WARRANT THE ACCURACY OR COMPLETENESS OF THE INFORMATION, TEXT, GRAPHICS OR OTHER ITEMS CONTAINED WITHIN THESE MATERIALS. SKYWORKS SHALL NOT BE LIABLE FOR ANY DAMAGES, INCLUDING BUT NOT LIMITED TO ANY SPECIAL, INDIRECT, INCIDENTAL, STATUTORY, OR CONSEQUENTIAL DAMAGES, INCLUDING WITHOUT LIMITATION, LOST REVENUES OR LOST PROFITS THAT MAY RESULT FROM THE USE OF THE MATERIALS OR INFORMATION, WHETHER OR NOT THE RECIPIENT OF MATERIALS HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGE.

Skyworks products are not intended for use in medical, lifesaving or life-sustaining applications, or other equipment in which the failure of the Skyworks products could lead to personal injury, death, physical or environmental damage. Skyworks customers using or selling Skyworks products for use in such applications do so at their own risk and agree to fully indemnify Skyworks for any damages resulting from such improper use or sale.

Customers are responsible for their products and applications using Skyworks products, which may deviate from published specifications as a result of design defects, errors, or operation of products outside of published parameters or design specifications. Customers should include design and operating safeguards to minimize these and other risks. Skyworks assumes no liability for applications assistance, customer product design, or damage to any equipment resulting from the use of Skyworks products outside of stated published specifications or parameters.
