

DATA SHEET

SKY67180-306LF: 1.5 to 3.8 GHz Two-Stage, High-Gain Low-Noise Amplifier

Applications

- LTE, GSM, WCDMA, HSDPA macro-base and micro-base stations
- S and C band ultra-low-noise receivers
- Cellular repeaters, small-cell, macro-cell, DAS, and RRH/RRUs
- High-temperature applications to +105 °C

Features

- Ultra-low reference design NF: 0.8 dB @ 3.5 GHz
- High gain: 31 dB (typical) @ 3.5 GHz
- Low quiescent current: 125 mA
- Stage 1 and 2 adjustable current
- Small QFN (16-pin, 4 x 4 mm) Pb-free package (MSL1, 260 °C per JEDEC J-STD-020)

Skyworks Green™ products are compliant with all applicable legislation and are halogen-free. For additional information, refer to *Skyworks Definition of Green™*, document number SQ04-0074.

Figure 1. SKY67180-306LF Block Diagram

Description

The SKY67180-306LF is a two-stage, low-noise amplifier (LNA) with active bias and high-linearity performance. The front end of the device provides an ultra-low noise figure (NF) while the output stage provides high gain, linearity, and efficiency.

With excellent thermal performance, the SKY67180-306LF is rated for operation up to +105 °C.

The SKY67180-306LF is provided in a 4 x 4 mm, 16-pin Quad Flat No-Lead (QFN) package. A functional block diagram is shown in Figure 1. The pin configuration and package are shown in Figure 2. Signal pin assignments and functional pin descriptions are provided in Table 1.

Pin	Name	Description	Pin	Name	Description
1	N/C	No connection. May be grounded with no change in performance.	10	RF_OUT2	RF output of second stage amplifier
2	RF_IN1	RF input to first stage LNA	11	RF_OUT2	RF output of second stage amplifier
3	RF_GND/VBIAS1	AC ground for first stage bias circuit and bias voltage input that sets the first stage bias current.	12	N/C	No connection. May be grounded with no change in performance.
4	FEEDBACK	Feedback pin. Leave open when not used. This feedback option is typically not used since it reduces gain.	13	N/C	No connection. May be grounded with no change in performance.
5	ENABLE1	First stage LNA Enable pin.	14	RF_GND2	AC ground for second stage bias circuit
6	RF _{OUT1}	RF output of first stage LNA	15	VBIAS2	Bias voltage input that sets the second stage bias current
7	GND	Ground	16	N/C	No connection. May be grounded with no change in performance.
8	RF_IN2	RF input to second stage amplifier	17	GND	Center ground
9	ENABLE2	Second stage LNA Enable pin.			

Electrical and Mechanical Specifications

The absolute maximum ratings of the SKY67180-306LF are provided in Table 2.

Electrical specifications are provided in Tables 3 and 4. Typical performance characteristics are shown in Figures 3 through 10.

Table 2. SKY67180-306LF Absolute Maximum Ratings¹

Parameter	Symbol	Minimum	Maximum	Units
Supply voltage	V _{DD}		6.0	V
RF input power	P _{IN}		+20	dBm
Operating temperature	T _{OP}	-40	+105	°C
Storage temperature	T _{STG}	-65	+125	°C
Junction temperature	T _J		+150	°C
Thermal resistance: Stage 1	Θ _{JC}		50	°C/W
Stage 2			65	°C/W
Electrostatic discharge:	ESD			
Charged Device Model (CDM), Class 3			1000	V
Human Body Model (HBM), Class 1A			250	V

¹ Exposure to maximum rating conditions for extended periods may reduce device reliability. There is no damage to device with only one parameter set at the limit and all other parameters set at or below their nominal value. Exceeding any of the limits listed here may result in permanent damage to the device.

ESD HANDLING: *Although this device is designed to be as robust as possible, electrostatic discharge (ESD) can damage this device. This device must be protected at all times from ESD when handling or transporting. Static charges may easily produce potentials of several kilovolts on the human body or equipment, which can discharge without detection. Industry-standard ESD handling precautions should be used at all times.*

Table 3. SKY67180-306LF Electrical Specifications¹**(V_{DD} = +5 V, T_{OP} = +25 °C, P_{IN} = -30 dBm, Optimized for 3.4 to 3.6 GHz Operation, Unless Otherwise Noted)**

Parameter	Symbol	Test Condition	Min	Typ	Max	Units

Evaluation Board Description

The SKY67180-306LF Evaluation Board is used to test the performance of the SKY67180-306LF two-stage LNA. An Evaluation Board schematic diagram is provided in Figure 11 and represents device performance in a matched environment.

Actual values used in application may vary particular to layout parasitics. Table 5 provides the Evaluation Board Bill of Materials for 3.4 to 3.6 GHz operation. Table 6 provides the Evaluation Board Bill of Materials for 2.6 GHz operation.

The Evaluation Board assembly drawing is shown in Figure 12.

Note 1:
M40 and M41 are general noise immunity bypass capacitors and are optional.
These capacitors are not recommended for applications with series resistance on control lines.

Package Dimensions

The PCB layout footprint for the SKY67180-306LF is shown in Figure 13. Typical part markings are noted in Figure 14. Package dimensions are shown in Figure 15, and tape and reel dimensions are provided in Figure 16.

Package and Handling Information

Instructions on the shipping container label regarding exposure to moisture after the container seal is broken must be followed. Otherwise, problems related to moisture absorption may occur when the part is subjected to high temperature during solder assembly.

The SKY67180-306LF is rated to Moisture Sensitivity Level 1 (MSL1) at 260 °C. It can be used for lead or lead-free soldering. For additional information, refer to the Skyworks Application Note, *Solder Reflow Information*, document number 200164.

Care must be taken when attaching this product, whether it is done manually or in a production solder reflow environment. Production quantities of this product are shipped in a standard tape and reel format.

All measurements in millimeters
