Introduction

INTRODUCTION

Radiall is recognized in the aerospace and defense industries for offering one of the broadest innovative product portfolios for connector interconnect solutions. The benefit of our experience with ARINC connectors permits Radiall to provide customers with a strong and global solution.

The EPX® series offers a wide range of solutions based on two insert sizes with a large variety of shells and contacts. This product range provides an excellent trade-off between the number of available contacts and the space used. The EPX® series is completely modular and expandable.

EPX® connectors are standardized by the EN4644 European standard.

A **high-density solution** compared to circular connectors:

- Slim shell design with high contact density
- Stackable shells do not require additional space for locking and unlocking the connectors

**EPXB**

5 shells #2 with 2*48 Cts

- **Total Cts:** 480
- **Total surface:** $96.90 * 91.80 = 8895.42 \text{ mm}^2$
- **Gives** $18.53 \text{ mm}^2/\text{contact}$

38999

4 shells #23 with 100 Cts

- **Total Cts:** 400
- **Total surface:** $96.00 * 96.00 = 9216 \text{ mm}^2$
- **Gives** $23.04 \text{ mm}^2/\text{contact}$

A **cost saving** and **user-friendly** solution:

- Inserts can be wired in the workshop and later installed in the shells
- A common panel cut-out simplifies the connector installation
- Inserts can be easily installed and removed from the shell
- Inserts and shells are keyed to prevent mis-mating
- Standard Mil spec tools for contact crimping and contact insertion/extraction
- Field replaceable sub-assemblies
- Vibration resistant self-locking threads

A **modular concept** with a large variety of options:

- Shell can accommodate a wide variety of inserts for signal, power, coax, data bus, fiber optic and high-frequency BMA contacts
- Optional ground blocks (to meet the FAA HIRF requirements)
- Pin and socket inserts can be installed in either plug or receptacle shells (pin contacts are always fitted in the pin insert)

EPX® is a **versatile solution** available in two different versions:

- Aluminium
- Composite

Introduction

**DISCONNECT APPLICATIONS**

Specially designed for panel integration on EWIS applications, EPX® disconnect connectors cover cable-to-cable and PCB-to-cable links in major commercial and business jet aircrafts.

The connector can be easily identified by the locking device located directly on the connector (quarter turn device for A1 and B1 and central screws for EPXB2). This disconnect solution offers secure mating while answering OEM's most stringent requirements, and provides:

- Modularity with three shell sizes: EPXA1, EPXB1 and EPXB2 - available as lightweight shells and compatible with several options such as ground block functionality. EPX® connectors also feature a large variety of inserts and a unique range of contacts covering any technology. EPX® connectors answer all connecting needs with the use of a limited number of components.
- Space savings with the combination of a slim shell design and high density inserts. In addition, EPX® disconnect stackable shells do not require additional space to lock and unlock the connectors.
- Time savings and cost effectiveness with modular parts that enable pre-wiring. Connectors are easy to assemble as the receptacle can be pre-installed. Inserts will be wired in the shop and plugged later, which saves integration time.

**EPXA1****EPXB1****EPXB2**

**EPXB2 FOR LRU****EPX RACK & PANEL FOR LRM**

RACK & PANEL APPLICATIONS

In response to the need of system miniaturization and new equipment design, Radiall offers EPX® connector solutions for Line Replaceable Unit (LRU) and Line Replaceable Module (LRM). Discover more about these blind mate connectors:

EPXB2 FOR LRU

Largely used in distributed architecture, small Line Replaceable Units in an aircraft need compact, lightweight and cost-effective connectors.

EPXB2 connectors equipped with centering guide will combine high density, low efforts and lightweight features. Discover the whole range of EPXB inserts offering from signal to power or quadrax contacts (available in straight or right angle PC tails and crimp contacts).

EPX RACK & PANEL FOR LRM

Today, equipment manufacturers look for more cost-effective and easy to maintain solutions such as Line Replaceable Module (LRM). As a result, Radiall has developed a new generation of Rack & Panel connectors. EPX® Rack & Panel connectors feature a modular, lightweight and high density shell that can be used on standalone PCB architecture.

EPX® Rack & Panel connectors are the perfect solution when equipment needs to combine compactness, weight savings and very high density. They offer:

- A modular range: From size 1 to size 4 using the complete range of EPX® inserts.
- Low mating force contacts from EPX® range that can reach very high density.
- A comprehensive range of contacts: Right angle or straight PC tails for signal, coax, quadrax, or power contacts.

DISCONNECT CONNECTORS

ELECTRICAL CHARACTERISTICS

EMI Shielding Effectiveness EN2591-213

FREQUENCY (MHz)	LEAKAGE ATTENUATION (dB)
100	65
200 or 300	63
400	62
500 and 600	60

OTHER CHARACTERISTICS

- **Shell-to-Shell Conductivity:** < 2.5 mΩ
- **Operating Voltage:** 400 VRMS or 500 VDC at sea level, according to EN2591-205
- **Voltage Stability (Ground Block):** Maximum variation 4 mV according to SAE AS 81714 (MIL-T-81714)
- **Lightning Strike:**
 - 5 kA - 1,600 V for EPX® connectors in aluminium version
 - 3 kA - 1,600 V for EPX® connectors in composite version

MECHANICAL CHARACTERISTICS

MATING/UNMATING

SHELL TYPE	MATERIAL	MATING/UNMATING
EPXA1/EPXB1/EPXB2	Aluminium	100 Cycles
EPXB1/EPXB2	Composite	100 Cycles

- EPXB2 mating torque: 1.2N.m +/- 0.1

VARIATION & SHOCK

SHELL TYPE	MATERIAL	VIBRATION <i>For 8 hrs on Each of the 3 Axis/Interruption < 1 µs EN2591-403 EIA 364-28</i>	SHOCK <i>3 Shocks on Each Axis EN2591-402 EIA 364-27</i>
EPXA1 / EPXB1	Aluminium	Acceleration 27.8 g (Test Condition 6 Letter G)	Shock Amplitude 50 g/Duration 11 ms
EPXB1 / EPXB2	Composite		100 Shock Amplitude 300 g/Duration 3 ms
EPXB2	Aluminium		
Disconnect EPX® with Quadrax Contacts	-	Acceleration 16.9 g (Test Condition 5 Letter E)	100 Shock Amplitude 50 g/Duration 11 ms

ENVIRONMENTAL CHARACTERISTICS

- **Temperature Range:** according to EIA364-32 and EN2591-305
 - For EPXB2 aluminium, EPXB1 and EPXA1 shells: -65 °C/+175 °C (-85 °F/+347 °F)
 - For EPXB2 composite shell: -65 °C/+125 °C (-85 °F/+257 °F)
- **Temperature Life:** 1,000 hours at maximum temperature
- **Salt Spray:** 96 hours (nickel-plated aluminium and composite) EN2591-307 EIA 364-26 test condition A
- **Humidity:** 10 days with temperature variation from -10 °C to +65 °C EIA 364-31 Method 4, test condition B
- **Altitude Immersion:** EN2591-314 EIA 364-03:
 - EPXB insert: 3 cycles at 50,000 ft
 - EPXB Bulkhead class insert: 3 cycles at 55,000 ft
- **Air Leakage for EPXB2 Bulkhead Receptacle:** Level from EN3645; test according EN2591-312 method B:
 - $4.4 \times 10^{-3} \text{ cm}^3/\text{s}$ (= $16 \times 10^{-6} \text{ m}^3/\text{h}$)

RACK & PANEL CONNECTORS

ELECTRICAL CHARACTERISTICS

EMI Shielding Effectiveness EN2591-213

FREQUENCY (MHz)	LEAKAGE ATTENUATION (dB)
100	65
200 and 300	63
400	62
500 and 600	60

OTHER CHARACTERISTICS

- **Shell-to-Shell Conductivity:** < 2.5 mΩ according to EN2591-205
- **Lightning Strike:** 5 kA - 1,600 V

MECHANICAL CHARACTERISTICS

MATING/UNMATING

SHELL TYPE	MATERIAL	MATING/UNMATING
EPXB1/EPXB2/EPXB3/EPXB4	Aluminium	500 Cycles

The minimum mating forces are described in the EN4644 standard and depends on the connector size and insert arrangement. Consult Radiall for more information.

VARIATION & SHOCK

SHELL TYPE	MATERIAL	VIBRATION <i>For 8 hrs on Each of the 3 Axis/Interruption < 1 μs EN2591-403 EIA 364-28</i>	SHOCK <i>3 Shocks on Each Axis EN2591-402 EIA 364-27</i>
EPXB1/EPXB2/EPXB3/EPXB4	Aluminium	Acceleration 16.9 g (Test Condition 5 Letter E)	Shock Amplitude 50 g/Duration 11 ms

Notes

1. Only contacts marked with an asterisk (*) are included with EPX® insert kit. All other contacts must be ordered separately (i.e. coax, twinax, quadrax and fiber optic contacts).

Inserts

HOW TO ORDER EPX® INSERTS

Only crimp contacts can be delivered with insert.

EPX

SERIES PREFIX

INSERT SIZE ^[1]

A: Insert for EPXA

B: Insert for EPXB1, EPXB2, EPXB3 or EPXB4

CLASS ^[2]

E: Environmental

N: Non-environmental (no rear grommet, no interfacial seal)

H: Non-environmental with a rear grommet, available for pin insert only (recommended for crimp contacts)

T: Non-environmental with an interfacial seal, available for pin insert only (recommended for PC tail contacts)

B: Bulkhead insert with interfacial seal and a Bulkhead rear grommet, available for pin insert only

INSERT NAME

Refer to table on page 1-10 for insert arrangements

INSERT TYPE

P: Pin

S: Socket

INSERT KEYING ^[3]

A: Keying A

B: Keying B

CONTACT

Without Code: Insert delivered without contacts

S: Signal and power contacts are delivered with inserts but are uninstalled (refer to page 1-10)

Inserts 00, 1C1, 1P1, C3, P3, 3Q3, 12F6, F12C and 3T3 are not available in S contact version

ENVIRONMENTAL INSERT

BULKHEAD INSERT

INSERT KEYING DETAIL

Notes

1. Inserts are designed for rear-release and rear-removable contacts.

2. Pin and socket inserts can be installed in either plug or receptacle shell. F6, F12C and 12F6 are only available in E class. Insert 00 is only available in N class.

3. For EPXA1, EPXB1, EPXB3 and EPXB4 shells, use only insert keyed A. For EPXB2 shells, use one insert keyed A and one insert keyed B.

Contacts

SIGNAL & POWER CRIMP CONTACTS

EPX® series offers a wide range of contacts compliant with EN3155 and SAE AS 39029. The available contacts cover aerospace applications for terminating to both cables and printed circuit boards.

- Signal and power contacts
- Ethernet links with Quadrax contacts
- High frequency with coax, twinax and triax contacts
- Optical links with LuxCis® contacts

Notes

1. Electrical contacts for optical inserts are always pin contacts (hermaphrodite).
2. In order to make these contacts environmental, it is necessary to add a sealing boot. Please contact us for additional information.
3. These power contacts can be used in power inserts only (25P1).
4. These power contacts can be used in power inserts only (P3, 13P1 and 20P1).

SIGNAL PC TAIL CONTACTS*Selection Table for Straight PC Tail Contacts*

Contact termination designations are a combination of 2 letters:

- The first letter characterizes the contact plating
R = Pure-tin (RoHS); Z = Tin lead; Y = Gold
- The second letter characterizes the length of the PC tail: A to D
The exact lengths can be found on the assembly kit sections

SHELL CLASS

M: Nickel-plated composite for EPXB1**K:** Nickel-plated aluminium for EPXB1 (mateable with version M composite shell)**N:** Nickel-plated aluminium for EPXA1

GROUND BLOCK

Radiall provides a unique patented feature by integrating a ground block directly on the shell. This option permits very short ground terminations.

Notes

1. Recommended locking torque: 1.6 Nm (14.16 in.-lb) for metallic shell and 1.1 Nm (9.73 in.-lb) max for composite shell.
2. Self-locking mounting holes are designed for rear panel mounting.
3. Please see page 1-28 on how to use the polarization device.

Disconnect Application

HOW TO ORDER EPXA & EPXB1 ASSEMBLY KIT

Assembly kit is delivered fully assembled including shell with insert mounted, with or without contacts, according to the selection.

Tips to help you in your selection:

- You are free to use either pin or socket inserts in EPXA and EPXB1 plug or receptacles.
- Crimp contacts can be delivered with a kit; check which contacts would be included on page 1-10.
- If PC tail are selected, then all cavities including signal, power and quadax are populated. Size 5 coax cavities are not populated.
- If PC tail contacts are needed, remember that they are available as pin straight PC tail contacts in receptacles only.

*Disconnect Application***EPXB2 CONNECTORS**

Radiall's EPXB2 disconnect connectors have been widely used in the aerospace industry for more than 10 years. Meant to be used in cable-to-cable and PCB-to-cable applications, EPXB2 connectors exceed civil aerospace market expectations in terms of high density, quick installation, and cost and weight savings.

Standardized by EN4644 European standard, Radiall's EPX® has been recognized as the leading rectangular modular connector and used in major commercial and business jet aircrafts. EPXB2 connectors are designed to cover any applications including:

**EWIS**

EPXB2 provides easy maintenance and high reliability, which are key characteristics of EWIS environments.

**CABIN INTERIOR**

EPXB2 combines high speed data with space savings to serve the latest generations of cabin systems.

**COCKPIT**

EPXB2 offers simplified and intuitive installation for Fiber Optic and signal connections that are critical in cockpit design.

**AVIONICS**

EPXB2's compactness, weight and robust design efficiently support avionics systems needs.

**POWER DISTRIBUTION**

EPXB2's stackable and segregated features make it the perfect solution for power distribution.

EPXB2 PRODUCT OVERVIEW

*Disconnect Application***EPXB2 RANGE OVERVIEW**

Modular and flexible, EPXB2 answers all disconnect connecting needs with the use of a limited number of components. With a large variety of shells and one range of inserts, contacts and accessories, EPXB2 range is completely expandable and fits to your exact needs. You can mix and match solutions to build your connector with:

SHELL CLASSES - (ALL NICKEL-PLATED)**SHELL STYLES**

EPXB2 LATEST INNOVATIONS

iEPX

Radiall expands the EPX® series by offering iEPX, a new weight optimized EPXB2 shell designed to be used in disconnect panel applications. With an integrated strain relief and EMI backshell to press-in, iEPX provides EMI shielding while reducing cost and weight.

**FEATURES & BENEFITS:**

- Quick and easy to terminate
- Lightweight
- Prevents FOD
- Cable-to-cable connection
- Integrated strain relief

MIX & MATCH:

- Fully intermateable with all EPXB2 plugs and receptacles.
- Modular and comprehensive range: iEPX uses all contacts and inserts from EPX® range.

EPX® BULKHEAD

Radiall's EPXB2 Bulkhead receptacle is a perfect solution for disconnect panel sealing applications. Combining EPX® proven technology with Bulkhead functionality, EPXB2 Bulkhead modular connectors provide effective panel sealing with a user friendly and cost saving approach.

With EPXB Bulkhead pin insert range, Bulkhead receptacle provides permanent sealing between two zones with different environmental conditions.

**FEATURES & BENEFITS:**

- Modular
- Competitive offer
- Optimized and mature design
- Easy and economical integration in the BOM
- PCB-to-cable or cable-to-cable connection

MIX & MATCH:

- Fully intermateable with all EPXB2 plugs
- Uses EPX® broad range of accessories and contacts including signal, power, quadrax and fiber optics

Notes

1. Jackscrew/Jacknut can be mounted on either plug or receptacle shell. However, the standard options are:

- Jackscrew for plug shells
- Jacknut for receptacle shells

2. Please see page 1-40 for how to use the polarization coding.

HOW TO ORDER EPXB2 ASSEMBLY KIT

Assembly kits are delivered fully assembled including shell with inserts mounted, with or without contacts, according to the selection. When selecting your insert codes, do not forget to place them in the order you want them assembled. Locking and polarizing devices are delivered uninstalled.

Tips to help you in your selection:

- You are free to use either pin or socket inserts in EPXB plug or receptacle.
- Crimp contacts can be delivered with a kit. Check which contacts will be included on page 1-10.
- PC tail contacts can also be delivered with a kit. Remember that only straight pin PC tail contacts are available, and in receptacle only.
- If PC tail contacts are selected, then all cavities including signal, power and quadrax are populated. Size 5 coax cavities are not populated.

All connector inserts will use the same insert class and the same contact termination.

HOW TO ORDER EPXB1, EPXB2, B3 & B4 ASSEMBLY KIT FOR LRM

Assembly kit is delivered fully assembled including shell with inserts mounted, with or without contacts according to the selection. When selecting your insert codes, do not forget to place them in the order you want them assembled. Polarization hardware are always provided unassembled with assembly kits.

Tips to help you in your selection:

- You are free to use either pin or socket inserts in EPXB plug or receptacle.
- Crimp contacts can be delivered with a kit. Check which contacts will be included on page 1-10.
- If PC tail contacts are selected then all cavities including signal, power and quadrax are populated. Size 5 coax cavities are not populated.
- If PC tail contacts are needed, remember that only straight pin PC tail contacts are available, and in plug only.

All connector inserts will use the same insert class and the same contact termination.

Notes

1. This floating option is not available in EPXB4 version
2. These contacts are delivered uninstalled
3. Refer to page 1-53 to select PC tail contacts for plug

EPXB PANEL CUT-OUT CODING

When several connectors are used with the same equipment, coding is available on the shell to correlate the correct shell with the correct panel cut-out.

On the panel cut-out, four areas are coded: area 1, 2, 3 and 4 (see figure below). For each area, one of the two holes should be drilled (hole n°1 or hole n°2). Each hole on the panel cut-out corresponds to the use of a coding pin on the shell.

PANEL CUT-OUT CODING	PANEL HOLE NUMBER TO DRILL IN AREA 1	PANEL HOLE NUMBER TO DRILL IN AREA 2	PANEL HOLE NUMBER TO DRILL IN AREA 3	PANEL HOLE NUMBER TO DRILL IN AREA 4

Class M (Composite)	L	-	-	✓	-	✓
	P	-	✓	✓	-	✓

Notes

1. Pin/Socket centering guides can be mounted on either plug or receptacle shells. However, the standard options are:

- Pin centering guide for plug shells

- Socket centering guide for receptacle shells

HOW TO ORDER EPXB2 ASSEMBLY KIT FOR LRU

Assembly kits are delivered fully assembled including shell with inserts mounted, with or without contacts, according to the selection. When selecting your insert codes, do not forget to place them in the order you want them assembled. Locking and polarizing devices are delivered uninstalled.

Tips to help you in your selection:

- You are free to use either pin or socket inserts in EPXB plug or receptacle.
- Crimp contacts can be delivered with a kit. Check which contacts will be included on page 1-10.
- PC tail contacts can also delivered with a kit. Remember that only straight pin PC tail contacts are available, and in receptacle only.
- If PC tail contacts are selected, then all cavities including signal, power and quadrax are populated. Size 5 coax cavities are not populated.

All connector inserts will use the same insert class and the same contact termination.

2. Refer to pages 1-41 to select PC tail contacts for receptacle.
3. Not available with iEPX

EPX GALLEY ARINC 810 PRODUCT OVERVIEW

The new EPXB2 Galley connector was specially designed for the severe conditions required by galley equipment. A floating mechanism was developed to avoid any risk of jamming and to guarantee a fully sealed connection.

The EPXB2 is used on ovens, beverage makers, refrigerators, microwave ovens and other equipment that fits within the new standardized galley layouts.

The EPXB2 connector is modular and provides extra contact density to add new contacts such as the #8 Twinax CAN data bus contact. Backshell accessories are also available.

Detailed view of receptacle and plug with accessories for the EPXB2 galley connector:

HOW TO ORDER EPX® GALLEY EQUIPMENT CONNECTOR

RECEPTACLE AND PLUG ASSEMBLY KIT

PART NUMBER	DESCRIPTION
617610188 or 617610558	Receptacle Assembled Kit ⁽¹⁾
617610189	Plug Assembled Kit ⁽¹⁾

Each item included in the kit is indicated in the table below and can also be ordered separately.

RECEPTACLE KITS

SHELL WITH 2 SELF-LOCKING THREADED HOLES

617610188

PART NUMBER	DESCRIPTION	QUANTITY PER KIT
617610212	Receptacle Shell	1
EPXBE25Q1PA	Insert for Cavity A	1
EPXBE06PB	Insert for Cavity B	1
617200	Pin Crimp Contacts/Size 22	15
617250	Pin Crimp Contacts/Size 12	6
616910	Filler Plug	9
617954003	Dust Cap	2

SHELL WITH 2 THRU HOLES

617610558

PART NUMBER	DESCRIPTION	QUANTITY PER KIT
617610419	Receptacle Shell	1
EPXBE25Q1PA	Insert for Cavity A	1
EPXBE06PB	Insert for Cavity B	1
617200	Pin Crimp Contacts/Size 22	15
617250	Pin Crimp Contacts/Size 12	6
616910	Filler Plug	9
617954003	Dust Cap	2

PLUG KIT

617610189 contents

PART NUMBER	DESCRIPTION	QUANTITY PER KIT
617610213	Plug Shell	1
EPXBE25Q1SA	Insert for Cavity A	1
EPXBE06SB	Insert for Cavity B	1
617300	Socket Crimp Contacts/Size 22	15

MULTI-GANG EPX® CONNECTORS

A whole range of multigang connectors are available for disconnect and Rack & Panel applications.

Multigang connectors features and benefits:

- Weight-saving design
- Make installation easier and quicker
- Utilize EPX modularity and its whole range of inserts
- Take advantage of EPX connector functionalities and use EPXB2 standard plug shells with a multigang shell

SPECIFICATIONS

- Several cavities for EPXB inserts (4 to 20 cavities)
- Standard EPX strain reliefs and backshells available
- In accordance with EN4644 performances

Several options are available:

- Grounding block
- Grounding spring fingers
- Float mounting
- Spring-loaded mounting
