*Amphenol Aerospace, Amphenol Commercial Air,
and Amphenol Industrial Operations Main Facility in Sidney, NY USA*

About Amphenol Aerospace:

Amphenol Aerospace, a Division of Amphenol Corporation, is one of the largest manufacturers of interconnect products in the world for the Military, Commercial Aerospace and Industrial markets. Amphenol designs, manufactures and markets circular and rectangular, electronic, fiber optic, EMI/EMP filter, and a variety of special applications connectors and interconnect systems.

Our state-of-the-art facility is nestled at the foothills of the Catskill Mountains in Sidney, NY. The Amphenol complex houses many technologies including CNC machining, die-casting, molding, impact and extruding, plating, screw machining and process controls. Our fully equipped material evaluation lab and engineering organization utilize the latest in computer aided design software and analysis tools, allowing us to design, test, and qualify advanced interconnect systems. Amphenol's interconnect products are supplied to thousands of OEMs worldwide and are supported by our worldwide sales and engineering force, including the largest global network of electronic distributors.

Customer-Centric:

Our **#1 priority** is our customers who deserve quality product on time.

Accountable:

Clear owners, clear actions, clear results.

Reliable:

What we build matters and quality is imperative.

Enthusiastic:

Challenges create rewarding opportunities. Enthusiasm is contagious and we will spread it.

Quality Assurance:

Amphenol Aerospace has been awarded both AS9100 - Revision C and ISO9001:2008 Quality Assurance Certifications.

INFINITE OPTIONS

Amphenol Aerospace is the industry leader in the design and development of D38999 Series III connectors. While the qualified Mil-Spec versions offer plenty of features, the customization and design options outside of the Mil-Spec are virtually endless. This catalog collects many of these customized options while offering additional ways to take advantage of the most popular circular connector in the military and aerospace industries.

Shell Style Quick Reference

Shell Styles:

Amphenol's standard and derivative 38999 Plus products are intermateable with all industry standard D38999 solutions. Amphenol offers a vast array of 38999 style options which can be found in the table below. If your design requires a custom solution contact Amphenol Aerospace for further options.

TVP00 - Pg 11 Wall Mount Receptacle		TVP40 - Pg 13 Double Flange Wall Mount	
TV01 Line Receptacle		TV47 - Pg 17 Double Flange Jam Nut	
TVP02 Box Mount Receptacle		TV97 - Pg 18 Reduced Flange Jam Nut	
TV06 Straight Plug		TV98 - Pg 18 Reduced Flange Jam Nut with Standoff	
TV07 Jam Nut Receptacle		TVP10 - Pg 12 Wall Mount with Clinch Nuts (self-locking)	
TV56 - Pg 33 Dualok Plug		TVP12 - Pg 15 Box Mount with Clinch Nuts (self-locking)	
TV09 Flange Mounting Plug		TV06 - Pg 36 Plug with Winged Coupling Nut	
Deep Reach Receptacle		TV96 - Pg 30 Plug with Integral Banding Platform	
Solder Mount Hermetic Receptacle		TV87 - Pg 30 Jam Nut with Integral Banding Platform	
Lanyard - Pg 37 Release Plug		TVP80 - Pg 32 Wall Mount with Integral Banding Platform	
		TV76 - Pg 31 Plug with Integral Strain Relief	

Amphenol RoHS Compliant Platings

Alternative to Cadmium

The Defense Logistics Agency (DLA) has added the following cadmium alternative finishes to MIL-DTL-38999, Rev L (and other connector specs):

- Nickel Fluorocarbon Polymer
- Zinc-Nickel

DURMALON™

Amphenol's Answer to EU RoHS/ELV/Cadmium Free Restrictions. Commercial, Industrial & Military markets are rapidly moving away from restricted materials such as Cadmium (Cd) & Hexavalent Chromium (Cr(VI)). Both of these restricted materials are toxic and are known carcinogens. Amphenol is offering alternative finishes that comply with all customer requirements tied to these specifications.

Amphenol has qualified Durmalon, with internal part number coding "DT" finish, which meets or exceeds the 38999 designated class "T" finish, Nickel Fluorocarbon Polymer. Durmalon is also EU RoHS and Reach compliant and is Cadmium free, Lead free, and Hexavalent Chromium free.

Durmalon, like Olive-Drab Cadmium plating (Class W), meets 500 hours of dynamic salt spray, combined with 500 mating cycles and meets specified millivolt drop shell-to-shell conductivity. Durmalon has been proven to meet Potassium Formate-Deicer fluid testing performed by Boeing.

BLACK ZINC NICKEL

Black Zinc Nickel is a non-reflective, conductive black finish approved for 500 hrs salt spray making it an excellent choice for harsh environments. Black Zinc Nickel has been qualified by the DLA, with internal part number coding "DZ" finish, which meets or exceeds the 38999 designated class "Z" finish. Black Zinc Nickel is RoHS & Reach compliant.

DURMALON™
Alternative to Cadmium

Requirements	Cadmium	Durmalon™	Black Zinc Nickel
Coupling Torque Post 500 hr. salt	■	■	■
Shell to Shell Conductivity <2.5 millivolts	■	■	■
Cycles of Durability 500 mates	■	■	■
Salt Spray Dynamic 500 hours	■	■	■
Temperature Rating 175° C	■	■	■
Non-Reflective	■	■	■
EU RoHS/ELV Compliant*		■	■
Non-Magnetic	■	■	■
De-icing Fluid**		■	■

* Meets EU RoHS/ELV maximum concentration values (MCV) of 1000 ppm (0.1% w/w) or (0.01% w/w) per homogenous material.

** Potassium Formate/Acetate based de-icing fluids.

Note: Specifications are subject to change without notice.

MIL-DTL-38999 Connectors with PCB Contacts

Amphenol has simplified the process of ordering a D38999 Series III connector with PC tails with the new 38999 Plus catalog. Currently all Series III arrangements (mil-spec or proprietary) with size 23, 22D, 20, 16 or 12 gauge contacts (including mixed arrangements) are available for order using the following How To Order pages (contact AAO for size 8 and larger contacts).

PCB Connectors are available in a number of shell styles and PCB lengths. Contact our factory for customized solutions.

38999 PCB Connector with Ground Pins

- Available in box mount and jam nut style shells
- Intermateable with any MIL-DTL-38999 Series III plugs and Accessories
- Allows for PCB to be grounded directly to board
- Multiple ground pin positions available
- Available in aluminum with all Amphenol standard plating options

Example: TV07DZ-15-35P(P25B)
Only available is shell style 02 and 07. See page 10 for complete How to Order options.

High Density Interconnects

HD38999
High Density

The HD38999 family of connectors has 30% more contact density than the highest density Mil Spec 38999 connectors of comparable size. This series of connectors was designed to utilize Military Specified 38999 components with the exception of the contacts and inserts arrangement. Utilizing existing qualified M39029 size 23 contacts and 38999 insert materials, these connectors are essentially a drop-in replacement for a standard 38999 connector.

HD38999 is tested and meets the requirements of MIL-DTL-38999 Series III. If you need a customized version please contact us with your requirement.

HD38999 for Gigabit Ethernet Applications

The HD38999 is available for high speed (Gigabit Ethernet) data transmission in the size 9-9 insert pattern. Data transmission performance of this connector insert:

- 10 Base T, 100 Base TX, and 1000 Base T networks using Cat 5e per TIA/EIA568B and Class D per ISO/IEC 11801.
(Test report available - consult Amphenol Aerospace for more information)

Filtered HD38999 Connectors - for EMI/EMP Protection

High density patterns are available in filter 38999 connectors - consult Amphenol Aerospace for ordering.

High Density Interconnects

How to Order

1.	2.	3.	4.	5.	6.	7.

Tri-Power with RADSOK® Technology

Amphenol has combined the reliability of D38999 connectors with the high-current RADSOK® contact design.

The Amphenol Power Connectors incorporate the proven design of the MIL-DTL-38999 Series III Tri-Start connectors with the evolving technology of the High Power RADSOK® contacts. This newly designed product enables customers to choose contacts ranging from 70 to 120 amps (240 to 620 amps per connector) allowing more power in a smaller connector.

Using standard shell sizes for 38999 connectors will allow the Power Connectors to mate to existing mounting holes without changing the customer's original design. In addition, Amphenol offers oversized 38999-style shells which are able to provide more power and amperage, while maintaining the proven, trusted MIL-DTL-38999 style design.

Low Contact Resistance:

The large interface area between the socket lamella and pin surface result in very low contact resistance, enabling the RADSOK® contacts' high current ratings compared to traditional power contact designs.

High Mating Cycle Durability:

Even with continuous exposure to harsh environmental abuse (salt, sand, and high humidity), RADSOK® contacts have been tested to maintain low contact resistance beyond 10,000 mating cycles.

High Reliability:

Unique RADSOK® design and construction technology create an electrical contact interface that exceeds typical interconnect requirements. Applications in aerospace, medical, industrial, automotive, mining, offshore, and other harsh environments depend on high reliability of the Amphenol RADSOK® technology.

Low Contact Engagement/ Separation Forces:

The hyperbolic lamella socket contact construction distributes normal forces over a high percentage of the mating pin surface. This creates a smooth, even engagement effort.

Tri-Power with Radsok Contacts

Bulkhead Feed-Throughs, Connector Savers & Plug Adapters

Bulkhead Feed-Through Connectors remove the need for discrete wire termination when assembling the connector

Amphenol Aerospace's Bulkhead Feed-Through connectors are double-ended receptacles with feed through contacts that mate to standard MIL-DTL-D38999 plugs. Available in multiple shell and contact gender configurations, they are designed to meet applicable requirements for 38999 series III and allow for usage in new applications where standard connectors won't suffice.

Connector Savers:

Amphenol's Connector Savers protect connectors subjected to repeated mating cycles and prevent costly repairs associated with replacement of connectors and/or cables. These connectors can also be used when mating plugs to alternate plated receptacle in efforts to avoid corrosion. Fully compatible with standard MIL-DTL-38999 connectors and protection caps.

Options:

- Fully tooled in all Standard D38999 insert patterns
- Contact Amphenol for Firewall Capability
- Amphenol standard platings available for both aluminum and stainless steel shells
- Also available: thermocouple, filtering, custom, mixed keying arrangements, and high speed. Contact Amphenol for more information.

Features & Benefits:

- **Corrosion Resistance:**
Several Shell Finishes capable of withstanding 500 hours of salt spray.
- **Environmentally Sealed:**
Environmentally sealed when mated with Mil-Spec plug.
- **Gender Availability:**
Available in a variety of gender options tailored to your application needs.
- **Contact Protection:**
Recessed pins in this 100% scoop-proof connector minimize potential contact damage.
- **Versatile:**
Mates to standard D38999 plug connectors (D38999/26).
- **Temperature:**
Performs in ranges from -65°C through 200°C.

38999 Connectors with Integral Accessories

The 38999 Series III style connectors feature integral accessories that eliminate the need for an additional backshell

The backshell feature is incorporated into the rear of the connector shell, allowing the user to attach the shield of their cable directly to the connector, or provide strain relief for their wire bundle. This provides superior EMI shielding, enhanced sealing and ease for overmold applications. These are available in aluminum and stainless steel shells with most Amphenol platings.

Features & Benefits:

- Eliminates need for additional accessory
- Time savings during order and installation
- Cost effective
- Space and weight savings
- EMI protection
- Compatible with overmolding processes (Integral banding platform)
- Integral strain relief eliminates accessory backoff concern
- Eliminates industry problem of misaligned accessory teeth

High Vibration Dualok

Testing on D38999 Series III aluminum plugs with Dualok showed 75% less millivolt drop than Mil-Spec requirements.

Dualok is an enhanced anti-decoupling mechanism designed to perform under severe vibration environments – far exceeding the performance of MIL-DTL-38999 Series III plugs.

The Dualok represents the latest in high performance connector designs from Amphenol. Featuring a newly developed locking mechanism, the Dualok plug ensures rock-solid coupling and metal-to-metal bottoming in the most severe vibration environments.

The Dualok system is proven to mitigate the negative effects of high vibration operation by eliminating connector back-off and reducing conditions that can cause fretting corrosion. Dualok is compatible with all D38999 Series III receptacle interfaces and has been qualified to Boeing Specification BACC63EK.

Features and Benefits:

- Mates with standard D38999 receptacles and utilizes standard D38999 inserts.
- Designed to withstand and stay mated under vibration levels that exceed MIL-DTL-38999 levels
- Dualok stainless steel provides a weight savings of up to 42% compared to standard D38999 stainless steel designs
- Stainless steel, aluminum, composite, or aluminum bronze materials of construction
- Dualok aluminum provides ~ 10% weight reduction over D38999 Aluminum
- Coupling mechanism that does not “settle” under vibration levels exceeding MIL-DTL-38999
- Metal-to-metal bottoming for maximum EMI shielding under extreme vibration
- Improved performance under lightning strikes

Minimized Contact Fretting:

The pin-socket interface remains tight under mated conditions. Dualok yields more consistent integrity across the contacts and reduces friction-induced oxides formation.

RotoLok High Vibration Plug Solutions

Add the (474) suffix to the end of TV06 or TVS06 Part Number

PART NUMBER BUILDER Page 33

Amphenol extends its high vibration family of products with the RotoLok plugs. These plugs have been tried and tested for years in the field and remain a trusted product for high vibration requirements in the most demanding of environments.

Please refer to page 33 How-to-order. Add suffix (474) to modification code to order RotoLok high vibration plug

TV06 - add suffix (474)
TVS06 - add suffix (474)

- All Aluminum shell sizes available in most finishes
- Intermateable with any MIL-DTL-38999 Series III receptacle and accessory
- Improves electrical performance by minimizing contact fretting
- EMI/RFI shielding advantages of D38999 Series III plugs

Wing Nut Plug

Add the (734) suffix to the end of TV06 or TVS06 Part Number

TV06 - add suffix (734)
TVS06 - add suffix (734)

TV Breakaway Fail-Safe Lanyard Release

Commercial version of D38999/31, Type 6 & others

Features and Benefits:

- 25 lanyard lengths
- Available in all size 25 arrangements
- Low force separation capabilities
- Compatible with all mil-spec backshells and accessories
- Mates to existing D38999 receptacles

Amphenol offers a commercial version of D38999/31 Series III, Type 6 connectors. Built from the same time-tested and quality components used in its Mil-Spec counterpart, Amphenol's commercial variant is designed to accept a wider variety of insert arrangements the Mil-Spec does not include. Available in shell size 25, these fail-safe connectors adopt an incredible amount of versatility without sacrificing performance or durability. Consult Amphenol Aerospace for more information.

Backshells are offered for use with Breakaway Fail-Safe Connectors in three heights

Low Profile Backshells in shell size 25 with the following features:

- 90 degree termination
- Low profile design with three heights ranging from 1.010 to 1.660
- Rear access covers to help ease harness assembly and repairability
- Amphenol part numbers: 10-640000-XXX

Other Advantages Include:

- Lower profile compared to full metal breakaway Fail-Safe connectors
- Less weight
- Meets MIL-DTL-38999/31
- Random & sine vibration
- Ice resistance
- Fluid immersion and hydrolytic stability test.
- Available in shell sizes 25 and 17

Metal shells with Composite Operating Sleeve

New Hybrid Lanyard Breakaway Fail-Safe connector with a composite thermoplastic outer operating sleeve for greater durability.

Amphenol's hybrid lanyard design offers greater durability over D38999 aluminum and composite designs because of its ability to handle abuse taken after weapons release.

TV Breakaway Fail-Safe Lanyard Release

Commercial (725010, 725014, 725041) Version of D38999/31 Type 6

PCB Hermetic Series III

Tri-Start, MIL-DTL-38999, Series III with Stainless Steel shells

Amphenol Tri-Start 38999 Series III hermetic connectors offer the highest performance capabilities for severe environment applications; meeting or exceeding MIL-DTL-38999 Series III requirements.

Features:

- **Hermetic**
Air leakage limited to 1×10^{-7} cm³ per second
- **Fused Glass**
Fused glass in stainless or carbon steel shell
- **Tail Lengths**
Three standard stickout lengths available

**Stainless Steel with
Nickel Plating**

**Passivated
Stainless Steel and
Carbon Stainless Steel**

AmpheSEAL

38999 High Pressure Solution

The AmpheSEAL connectors provide sealing between the plug and receptacle interfaces and have been tested to withstand pressure to at least 300 PSI. Not intermateable with standard products. Must use AmpheSEAL on both sides of mated pair.

Features:

- Internal O-ring seals to at least 300 PSI
- Rear connector sealing method customized to meet the specific application
- Any D38999 size and insert arrangement is available
- All Aluminum shell sizes available in most finishes
- EMI/RFI shielding advantages of D38999 Series III plugs
- Contact Amphenol for how to order information

Ground Plane Connectors

Coax/Triax/Twinax

For High Speed Data Bus, LAN and Coax, Triax and Twinax Data Transmission:

MIL-DTL-38999 type connectors are available with metal inserts to maintain a common ground plane with the connector shell for all the shielded contacts contained in the connector.

These electrical connectors are available for all MIL-DTL-38999 insert patterns using size 16, 10, 12 or 8 contacts. This data sheet contains some of the popular insert patterns that are commonly used for ground plane connector applications. Options include crimp termination and printed circuit tail contacts in either solder or compliant pin configurations. Composite shells are also available. To order contact Amphenol Aerospace.

Applications:

Applications for ground plane connectors include MIL-STD 1553B data bus as well as video, signal and multiplex transmission.

OCS (Oval Contact System)

Newest 38999 Style Connector

Plug

Receptacle

The OCS (Oval Contact System) is the newest 38999 Interconnect Product offering that provides many advantages for high speed data transmission.

OCS Mechanical/Physical Properties

- Mating Cycles 500 (min.)
- Operating temperature -65C to 175C
- Contact materials and platings consistent w/AS39029
- IR 500 VDC
- DWV 500 VAC rms

Max Current Rating:

- 1.5 amps inner contacts
- 3.0 amps outer contacts

Applications:

High Speed Applications-for use with, but not limited to, the following electrical protocols (Cable selection may limit data rate of protocols).

- 10G Base T
- HDMI
- Fibre Channel (AI)
- 40G Base-T
- SATA 2.0
- SATA 3.0 (limited to 3 meters max)
- Serial RapidIO
- PCI Express 3.0

Features and Benefits:

- A wide variety of insert arrangements available
- Patterns range from (1) to (21), 100 Ohm differential pairs capable of delivering data transfer speeds of 10Gbps per pair
- MIL-DTL-38999 shell styles available from size 9 to 25
- Front-release, rear-removable contact system for easy repair
- Meets environmental requirements of MIL-DTL-38999
- Uses off-the-shelf Mil Spec backshells
- PCB Tails contacts available, sockets only, epoxy backfilled.

OCS (Oval Contact System) Connectors

BTVContact Eye Pattern at 10 Gbps

OCS Signal Integrity Performance

Data rate: 10Gbps per pair
Insertion loss: <0.3 dB up to 5 GHz
Return loss: >20 dB up to 5 GHz
NEXT and FEXT: >40 dB up to 5 GHz
Differential to common mode conversion: >50 dB up to 5 GHz

Eye diagram (Real Part)

Individually Shielded Twinax cable is recommended for use with the OCS connectors. Other type of wires can be used, but will not be compatible with the rear accessory supplied with the connectors. Below is a list of recommended cables. Additional cables can be used if they meet specifications.

The provided grommet assembly will accommodate cable diameters ranging from Ø.124 to Ø.175. Larger diameters may work based on cable construction.

Impedance (Ohms)	Conductor (AWG)	Pairs	Cable Part Number
100	24	1	Tensolite 24463/9P025X-2(LD)
			Thermax MX100-24
			PIC E10224
			Gore GSC-05-82559-00 (space rated)
			Gore DXN2602
	24	4	Gore RCN 9034-24 (CAT6A Ethernet)*
	26	4	Gore RCN 9034-26 (CAT6A Ethernet)*
		1	Spectra Strip 160-2699-952

*Optimized for 13-53 insert pattern.
OCS cable assemblies available, please consult Amphenol Aerospace for details.

CTV07	Jam Nut composite shells

3. Shell Size -Insert Arrangement
Shell Size & Insert Arrangements are on pages 52. First number represents Shell Size, second number is the Insert Arrangement.

4. Contact Type
P Pin contacts 21-033585-001
S Socket contacts 21-033586-001

Inner contacts accept 28, 26, and 24 awg cable.

5. Alternate Keying Position
A, B, C, D , and omit for Normal Position. See page 84 for more information.

A plug with a given rotation letter will mate with a receptacle with the same rotation letter.

2. Service Class		
(Z) Threaded Backshell Style	(W) Integral Backshell Style*	Description
RZF	RWF	Electroless nickel plated
RGZF	RGWF	Electroless nickel plated ground plane
RZW	RWW	Olive drab cadmium plate
RGZW	RGWW	Olive drab cadmium plated ground plane
RZB	RWB	NiAlBronze
RGZB	RGWB	NiAlBronze ground plane
RZK	RWK	Corrosion resistance stainless steel
RGZK	RGWK	Stainless steel ground plane
ZDT	WDT	Durmalon plated, Nickel-PTFE alternative to cadmium
GZDT	GWDT	Groundplane Durmalon
ZDZ	WDZ	Black Zinc

6. Suffix code
595 Space Grade
591 Space Grade with critical dimensions verified at 100%

10-6460C1-001

* Integral Backshell - an integral backshell style eliminates the need for costly backshell accessories, and allows the user to attach the shield of their cable directly to the backshell. The integral shell style also provides superior EMI shielding and ease for overmold applications.

For unused OCS connector cavities:

- Leave the contact insert cavity empty in the connector.
- Size 12 MS27488-12-2 (orange color) sealing plug can be installed into the grommet of the backshell large end first.

Quadrax Contacts

Typical Quadrax Socket Contacts

Has socket outer contact with a socket inner contact

Amphenol Quadrax Contacts

Offers several advantages for high data transfer rates, low power consumption, and excellent EMI compatibility. Four strategically spaced inner contacts form two 100 or 150 Ohm matched impedance differential pairs. The Outer contact has a rugged wall section for durability. Available in size 8 crimp termination style. Also available in size 8 with PC tails see online High-Speed Contact Product Guide. Requires modification of MIL-DTL-38999 connector to accommodate keyed contacts.

Cable Illustration - Quadrax Contact

Quadrax Contacts are Gold Plated, Crimp Termination

Finish of mating contact parts: supplied with 0.000050 min. gold over nickel on mating interface.

Quadrax Size 8 Contact Performance:

Bandwidth: Up to 1.25 GHz
Data Rate: Exceeding 2.5 Gbps.
Voltage Rating: 500 Vrms max. @ sea level

Dielectric Withstanding Voltage:
1000 VAC rms between all inner contacts
@ sea level, 500 VAC rms between inner
and outer contacts @ sea level

Typical Quadrax Pin Contact:

Has pin outer contact with a pin inner contact

How to Order D38999, Series III Connectors with Standard 100 Ohm Quadrax Contacts

21-033385-051 Socket, 21-033384-051 Pin Contacts*

For all other quadrax contacts or differential twinax contacts, please consult Amphenol Aerospace for part numbers.

Suggested Numbering for Quadrax Contacts

Differential Pairs, contacts 1-3, 2-4.

Quadrax differential pairs are 1 and 3, 2 and 4.

Octonet Contacts

Superior Ethernet Contact System for MIL-DTL-38999, Series III

Eight strategically spaced inner contacts form four 100 Ohm matched impedance differential pairs.

Pin for 24 awg

Socket for 24 awg

Pin PCB Tail

Socket PCB Tail

Specs:

Environmental Sealing:	IAW connector specification
Corrosion Resistance:	500 hours salt spray
EMI Shielding:	360 degree shielding on each pair
Mating Cycles:	500 cycles
Voltage Rating:	500 Vrms max @ sea level
Dielectric Withstanding Voltage:	500 VAC RMS sea level

Features:

- Available in size 8 crimp termination style
- Can be installed in existing size 8 Quadrx cavities
- Meets performance specifications of CAT-6A cable
- 10G Ethernet compliant
- Overall higher bandwidth than standard CAT5E Quadrx-supports up to 4.0 Gbps per pair
- Enhanced crosstalk performance (compared to standard Quadrx)
- Supports wire ranges 26 to 24 gauge
- Requires modification of MIL-DTL-38999 connector to accommodate keyed contacts
- Operating Temp -65°C to 175°C
- Requires special backshell.
- Easy drop-in replacement to installed connectors
- Self removing contact feature - no extra contact extraction tool needed (24 Gauge only) no need to redesign

Tri-Start, Series III Fiber Optic Connectors

38999 Style

Our 38999 Fiber Optic connectors meets or exceeds MIL-DTL-38999 Series III requirements EMI Shielding-solid metal to metal coupling, grounding fingers, electroless nickel plating, and thicker wall sections provide superior EMI shielding capability of 65dB min. at 10 GHz. Termini Protection-recessed pins in this 100% scoop-proof connector minimize potential termini damage. Corrosion Resistance-shells of stainless steel or cadmium over nickel plating withstand 500 hr. salt spray exposure. Vibration/Shock-operates under severe high temperature vibration. Threaded coupling quickly and completely mates in one 360° turn of the coupling nut Amphenol.

Mechanical/Environmental:

Parameter	Performance
Maintenance Aging	MIL-STD-1344 Method 2002
Mating Durability	500 mating cycles
Insert Retention	100 PSI/25 lbs minimum
Sine Vibration	60 G (140-2000 Hz), 4 hours each at ambient, -55 deg C, and +175 deg C
Standard Shock	300 G half-sine, 3 ms duration
High Impact Shock	MIL-S-901 grade A with lightweight fixture
Temperature Life	1000 hours @ high temp rating
Thermal Shock	-55° C to +165° C - 5 cycles

This illustration shows the key features of the MIL-DTL-38999 CF-50- The highest optical performance connector.

1. Beryllium-copper retention clip for improved termini stability
2. Precision-aligned inserts
3. Modified master key
4. Integrated wave washer for improved performance in high vibration environments

Multi Channel Fiber Optic Tri-Start

How to Order

Amphenol® Multi-Channel fiber optic connectors for use with multi-mode and single mode termini can be ordered by coded part number. Ordering procedure is illustrated by part number CF-509017-8P as shown below:

Fiber optic termini can be accommodated in any size 16 or size 20 contact cavity of MIL-DTL-38999 Series III type connector insert patterns, as listed in the following chart. See pages 73-80 for more information.

MT38999 Connectors and Fiber Optic Cable Assemblies

MT38999 Connectors

Amphenol MT 38999 Connectors are designed for high density fiber optic interconnect solutions.

Features:

- High fiber density in a relatively small circular connector package with all the advantages of the MIL-DTL-38999 series III connector
- Three levels of alignment provide for precision fiber to fiber interface:
 - Shell to shell with keying to allow for alternate positions
 - Insert plug to insert receptacle
 - MT contact guide pins
- Compatible with 12-fiber, 24-fiber, or 48-fiber MT ferrules in multi-mode PC single mode PC, and single mode APC configurations
- Two arrangements are available, shell size 11 with one ferrule, and shell size 21 with four ferrules
- Up to 48 fiber channels in a size 11 shell
- Up to 192 fiber channels in a size 11 shell

MT38999 Fiber Optic Cable Assemblies:

Amphenol Aerospace offers the High Performance Interconnect Solution for your High Speed Needs.

Features and Benefits:

- Maneuverability
- Very high density in cylindrical connectors:
- Up to 48 fiber channels in size 11 shell
- Up to 192 fiber channels in size 21 shell

Round MT Cable Assemblies:

- From simple to complex
- Ruggedization with full testing (temperature, shock, vibration)
- Insertion loss and return loss testing capabilities
- Industry leading polish and termination capabilities
- Using COTS cable from across the country

38999 Filter Section

Being the original inventor of filter interconnects, Amphenol manufactures MIL-DTL 38999 Series III Filter Connectors, and are available in multiple versions, including many environmental-classes, with high and medium density insert arrangements. The “Tri-Start” mating thread makes them well suited to high-vibration and high-shock applications.

Amphenol’s Filter Connectors are available in several termination configurations, including PC tails, solder cups, and crimp contacts. They are also available with various plating and keying options, and are all intermateable with standard MIL-DTL-38999 Series III connectors.

Specifications Environmental

- Temperature Range: -55°C to 125°C
- Physical Shock: Typical to EIA-364-27
- Vibration: Typical to EIA-364-28
- Fungus Resistance: Based on MIL-STD-810
- Fluid Immersion: Typically tested to EIA-364-10
- Salt Spray: Typically based on EIA/ECA-364-26
- Humidity: Typically EIA-364-31 test method IV
- Durability: 1500 cycles for Classes J and M and 500 cycles for all other connectors as per 38999 spec

Electrical

- Grounded Line Resistance (Typ.): 30 mΩ max
- Insulation Resistance (Typ.): >10 GΩ
- Dielectric Withstand Voltage (Typ): 500 VDC
- Working Voltage (Typ): 200 VDC max
- Typical Test Specifications Used:
- Mil-STD-810: Test Method Standard
- Mil-STD-202: Electrical & Electrical Components Parts
- RTCA DO-160: Test Procedures for Airborne Equipment
- EIA-364: Electrical Connector & Socket Test Procedures

Reliable

- Triple-start, self-locking threaded coupling mechanism
- 100% scoop proof design
- Shell-to-Shell Continuity (ground strap between shells)

Filtering Capabilities

- Capacitance Range: 50 pF to 1.6 μF
- Capacitance Tolerance: Typically +/-20%
- Filtering Types Available: C, PI, LC, CL, T

Features Versatility:

- Wide range of connector shell configurations
- Configurable filter topologies

Designed for Harsh Environments:

- Vibration and shock
- Temperature extremes
- High humidity
- Altitude
- Salt spray

Mating Compatibility:

- MIL-DTL-38999 Series III connectors
- DEUTSCH DTS Series connectors
- DEUTSCH ACT Series composite connectors

How to Order - Standard

Filter Connectors

1.	2.	3.	4.	5.	6.	7.
Filter Connector Designator	Connector and Filter Type	Shell Finish	Shell Styles	Shell Size – Insert Arrg.	Type of Contact and Keyway Position	Printed Circuit Board Tail Length

1. Connector Type	
21-	Filter Connector

3. Shell Finish	
0	Chromate
1	Bright cadmium
2	Stainless steel (electrolytic nickel plated)
4	Electroless nickel, MS (F)
7	Cadmium plate over nickel, MS(A)
8	Bright nickel
9	Cadmium plate, nickel base, OD, MS(B), (500 hr. salt spray test)
D	Durmalon™ Nickel-PTFE (cadmium alternative) - 38999 Class T refer to page 7
Z	Black Zinc

5. Shell Size and Insert Arrangement	
9 through 25	Shell sizes available for TV, Series III

Shell Size & Insert Arrangements are together in one chart. First number represents Shell Size, second number is the Insert Arrangement. See pages 75-83.

7. (Optional) This will change Connector to PCB Termination from default Solder Cup

Code	± .030	Pre-Tinned?
1	0.120	NO
2		YES
3	0.185	NO
4		YES
5	0.270	NO
6		YES

2. Connector/Filter Type	
50	FTV (UTS-crimp) with VHF-1 filter
51	FTV (UTS-crimp) with HF-1 filter (long shell)
52	FTV with VHF-1 filter
53	FTV with HF-1 filter (long shell)
76	FCTV with VHF-1 filter with composite shell
77	FTV with VHF-1 filter and standard series III shells
78	FCTV PCB mount with standard flange and VHF-1 filter
79	Same as 77 with no filter - Epoxy sealed
80	FTV PCB mount with standard flange, standard nut and VHF-1 filter
81	Same as 80 with no Filter - Epoxy sealed
82	FTV with ±8 volt diode/VHF-1 filter combination
84	FTV (UTS-crimp) with ±8 volt diode only
85	Same as 76 with no filter - Epoxy sealed

4. Shell Style	
0	Wall mount receptacle
2	Box mount receptacle
4	Minimum penetration jam nut receptacle
7	Jam nut receptacle

6. Type of Contact	
P	Pins in a normal rotation
S	Socket in a normal rotation

Alternate Rotation Suffix Letters

FTV FCTV		
Alternate Position	Suffix Letter	
	Pins	Sockets
Normal	P	S
A	G	H
B	I	J
C	K	L
D	M	N
E	R	T

Note:

-2XX Suffix

Any combination of filters, non-filters, grounds, and non-standard contact terminations will require -2XX suffix. Please consult Amphenol Aerospace for assistance in setting up these part numbers.

- Standard voltage for diode is ±8 volts. Any deviation requires a -2XX suffix.
- Standard voltage for a MOV is 47 volts. Any deviation requires a -2XX suffix.
- Standard diode/filter combination is ±8 volt/VHF-1 filter. Any deviation requires a -2XX suffix.
- Standard MOV/filter combination is 47 volt/VHF-1 filter. Any deviation requires a -2XX suffix.

Connector Accessories

Amphenol offers a full range of accessories that are designed to enhance the performance of Amphenol 38999 connectors, both military and non-military.

Backshells are an integral part of any circular connector when it comes to reliable cable connections. Amphenol divisions team up globally to provide a very large assortment of backshells for use with 38999 Series of connectors, as well as other circular series.

The variety of types of backshells and adapters covered in the Backshells section of this catalog include:

- Non-environmental backshells
- Environmental backshells
- Non-environmental EMI/RFI backshells
- Environmental EMI/RFI backshells
- Shrink boot adapters
- Crimp ring adapters
- Band lock adapters
- Pre-shield adapters

MIL-DTL-38999, Series III TV

Universal “Header Assembly” for Flex Print or PC Board

Mounts to all MIL-DTL-38999

The universal header assembly from Amphenol provides for easy separation of the connector from the board.

The header assembly is comprised of a short pin/socket contact. The tail end of the contact is soldered to the through hole of the flex or printed circuit board. The socket is embedded in the insulator, making electrical contact with the printed circuit tail of the connector.

Headers provide easy separation of the connector from the PC board.

Features and Benefits:

- Circular and square header assemblies available
- Cost and time savings in the manufacturing process
- Assemblies can be vapor phase or wave soldered to flex/printed circuit board
- Allows electrical testing when installed properly.
- Connector assemblies can be easily removed from and reattached to the header assembly.

Mounting Applications

- Amphenol **square** universal headers are slotted to allow mounting to all series of MIL-DTL-38999 connectors without special alterations.
- Amphenol **circular** universal headers are designed to accommodate the rear flange of PCB Board Mount shells, series MIL-DTL-38999 connectors without special alterations.
- The header assembly can be attached to connectors with standard flange placement or directly to the circuit board.
- Connectors with dual flange mounting hardware can be provided to allow easy mounting to the panel or the header assembly.
 - Forward flange would mount the connector to the panel
 - Rear flange would be used to mount to the header assembly.
- Various types of captivated or loose attaching screws can be utilized for unique applications.

Mounting to Rectangular ARINC Connectors

- Headers for ARINC connector arrangements accommodate up to 150 pins
- Consult Amphenol Canada, Ontario for ARINC configurations.

Materials

- Body is molded or machined from FR-4.
- Electrical engagement areas of the header contact are plated with .00003 inches minimum of gold over .00005 inches minimum of nickel.

See drawing of standard header on next page.

- X Completely tooled.
- ◆ Not tooled for 02-R.
- P Available with Pin contacts only
- S Available with Socket contacts only
- P/S Available with Pin contacts or Socket contacts
- ★ Ground plane proprietary option available. Arrg. 9-5 is exclusively ground plane type.
- Not Mil-Qualified.
- ◇ 21-75 is Mil-Qualified with twinax contacts only.
Note: MS connector 21-75 is supplied with size 8 twinax.
Commercial connector 21-75 is supplied with size 8 coax.

- HD** designates High Density 38999 Series III insert patterns which use size 23 contacts only. Not rated over 175°C.
- * Hermetic inserts - solder termination standard. (Contact Amphenol Aerospace for optional PCB or eyelet termination).
- ** Two size 16 contacts dedicated to fiber optics. See the Fiber Optic section for more information.
- *** For use in MIL-STD-1760 applications (see pages 75 and 76).
- † For RG 180/U and RG 195/U cables only.
- †† Size 8 Coax and Twinax are interchangeable.
- (2) Not Tooled for RP or 02RE
- (3) Pin inserts only, not tooled for RP or 02RE (Consult Amphenol Aerospace for avail.)
- (5) MS Connector 21-79 has provision for two size 8 coax contacts. Coax contacts are not supplied unless specified by customer.

* An "N" designation is used on D38999 military part number but not on the commercial versions

Key/Keyway Position

A plug with a given rotation letter will mate with a receptacle with the same rotation letter. The angles for a given connector are the same whether it contains pins or sockets. Master key stays fixed, minor keys rotate. Inserts are not rotated in conjunction with the master key/keyway.

RECEPTACLE (front face shown)

PLUG (front face shown)

A plug with a given rotation letter will mate with a receptacle with the same rotation letter. The angles for a given connector are the same whether it contains pins or sockets. Inserts are not rotated in conjunction with the master key/keyway.

Above part numbers include standard 500 cycle finish designation - gold plating over suitable underplate in accordance with SAE AS39029. For other finish variations, consult Amphenol Aerospace.

*For use with RG180B/U and RG195A/U cable. For other size 8 coax or optional sizes 12 and 16 coax contacts available for use in Tri-Start connectors, see High Speed catalog or consult Amphenol Aerospace.
