## Radial SMR

# SFH 4543

High Power Infrared Emitter (940nm) in SMR® Package

## Applications

- Access Control & Security
- Appliances & Tools
- Home & Building Automation

## Features

- Package: black epoxy
- ESD: 2 kV acc. to ANSI/ESDA/JEDEC JS-001 (HBM, Class 2)
- High Power Infrared LED
- SMR® (Surface Mount Radial) package
- Same package as photodiode SFH 2500
- Short switching times

Ordering Information

| CW    | 280 mW/sr                                                                                                      | 450 mW/sr                                                                                                      |

Only one group in one packing unit.

## Relative Spectral Emission 7), 8)

$$I_{e,rel} = f(\lambda); I_F = 100 \text{ mA}; t_p = 20 \text{ ms}$$

## Radiation Characteristics 7), 8)

$$I_{e,rel} = f(\varphi)$$

## Forward current 7), 8)

$I_F = f(V_F)$ ; single pulse ;  $t_p = 100 \mu s$

## Radiant Intensity 7), 8)

$I_e/I_e(100mA) = f(I_F)$ ; single pulse ;  $t_p = 25 \mu s$

## Max. Permissible Forward Current

$I_F = f(T_A)$ ;  $R_{th_{ja}} = 300 K/W$

## Permissible Pulse Handling Capability

$I_F = f(t_p)$ ; duty cycle  $D = \text{parameter}$ ;  $T_A = 25^\circ C$

## Permissible Pulse Handling Capability

$I_F = f(t_p)$ ; duty cycle  $D =$  parameter;  $T_A = 85^\circ\text{C}$

## Dimensional Drawing <sup>9)</sup>

GEOY6961

## Further Information:

**Approximate Weight:** 237.0 mg

**Package marking:** Cathode

## Recommended Solder Pad <sup>9)</sup>

Padgeometrie für

All temperatures refer to the center of the package, measured on the top of the component

\* slope calculation  $DT/Dt$ :  $Dt$  max. 5 s; fulfillment for the whole T-range

---

## Notes

The evaluation of eye safety occurs according to the standard IEC 62471:2006 (photo biological safety of lamps and lamp systems). Within the risk grouping system of this IEC standard, the device specified in this data sheet falls into **exempt risk group - Exempt**.

Subcomponents of this device contain, in addition to other substances, metal filled materials including silver. Metal filled materials can be affected by environments that contain traces of aggressive substances. Therefore, we recommend that customers minimize device exposure to aggressive substances during storage, production, and use. Devices that showed visible discoloration when tested using the described tests above did show no performance deviations within failure limits during the stated test duration. Respective failure limits are described in the IEC60810.

Packing information is available on the internet (online product catalog).

For further application related information please visit <https://ams-osram.com/support/application-notes>

## Disclaimer

### Attention please!

The information describes the type of component and shall not be considered as assured characteristics. Terms of delivery and rights to change design reserved. Due to technical requirements components may contain dangerous substances.

For information on the types in question please contact our Sales Organization.

If printed or downloaded, please find the latest version on our website.

### Packing

Please use the recycling operators known to you. We can also help you – get in touch with your nearest sales office. By agreement we will take packing material back, if it is sorted. You must bear the costs of transport. For packing material that is returned to us unsorted or which we are not obliged to accept, we shall have to invoice you for any costs incurred.

### Product and functional safety devices/applications or medical devices/applications

Our components are not developed, constructed or tested for the application as safety relevant component or for the application in medical devices.

Our products are not qualified at module and system level for such application.

In case buyer – or customer supplied by buyer – considers using our components in product safety devices/ applications or medical devices/applications, buyer and/or customer has to inform our local sales partner immediately and we and buyer and /or customer will analyze and coordinate the customer-specific request between us and buyer and/or customer.

---

## Glossary

- 1) **Radiant intensity:** Measured at a solid angle of  $\Omega = 0.01$  sr
- 2) **Brightness:** The brightness values are measured with a tolerance of  $\pm 11\%$ .
- 3) **Reverse Operation:** This product is intended to be operated applying a forward current within the specified range. Applying any continuous reverse bias or forward bias below the voltage range of light emission shall be avoided because it may cause migration which can change the electro-optical characteristics or damage the LED.
- 4) **Forward Voltage:** The forward voltages are measured with a tolerance of  $\pm 0.1$  V.
- 5) **Total radiant flux:** Measured with integrating sphere.
- 6) **Thermal resistance:** junction - ambient, mounted on PC-board (FR4), padsize 20 mm<sup>2</sup> each
- 7) **Typical Values:** Due to the special conditions of the manufacturing processes of semiconductor devices, the typical data or calculated correlations of technical parameters can only reflect statistical figures. These do not necessarily correspond to the actual parameters of each single product, which could differ from the typical data and calculated correlations or the typical characteristic line. If requested, e.g. because of technical improvements, these typ. data will be changed without any further notice.
- 8) **Testing temperature:** TA = 25°C (unless otherwise specified)
- 9) **Tolerance of Measure:** Unless otherwise noted in drawing, tolerances are specified with  $\pm 0.1$  and dimensions are specified in mm.
