

PwrBlade ULTRA® Connector System

ULTRA-HIGH CONDUCTIVITY CONNECTOR FOR HIGH DENSITY POWER SUPPLIES

PwrBlade® ULTRA's design offers an overall height reduction of 24% to reduce airflow impedance in high-density power supplies. Three contact choices are available; High Power, Low Power, and Signal.

Ultra-high conductivity materials and new highly conductive plating, combine to produce an ultra-low resistance of just 0.4mΩ at end-of-life conditions. The result is the lowest profile power distribution connector capable of delivering more than 200A per linear inch.

PwrBlade® ULTRA's high-density beam design further increases its linear current density making it an ideal interconnect solution for next-generation 1U/2U servers, storage enclosures, telecommunications equipment, EV charging stations, and datacom/networking equipment applications.
