

VC101A Function introduction

1. Built-in rechargeable battery, directly charged by the input jack
2. Self-recovery electronic protection, no need to change fuse
3. Any range, any input end is resistant to 250V voltage shock
4. Can detect power capacitance, self-discharge protection
5. Over 1000V instantaneous surge pulse absorption function
6. Voltage measurement one key switching frequency
7. Relative value / maximum value recording function
8. Automatic shutdown and no shutdown during use
9. With splash-proof, dust-proof and anti-drop function

220V

AC/DC voltage, DC/AC current
