

LHA-series

Feature

EN62477-1 (OVC III)

Low-profile

Small and compact PCB construction

High efficiency

Low noise

Harmonic attenuator (Complies with IEC61000-3-2)

Power factor correction (LHA75F-300F)

Universal input (85-264VAC)

Built-in inrush current, overcurrent and overvoltage protection circuits

Safety agency approvals

UL62368-1, C-UL (equivalent to CAN/CSA-C22.2 No.62368-1),

EN62368-1

EN62477-1 (OVC III): LHA150F, 300F

Complies with DEN-AN

5-year warranty (refer to Instruction Manual)

CE marking

Low Voltage Directive RoHS Directive

UKCA marking

Electrical Equipment Safety Regulations RoHS Regulations

EMI

Complies with FCC-B, CISPR11-B, CISPR32-B, EN55011-B, EN55032-B, VCCI-B

EMS Compliance : EN61204-3, EN61000-6-2

EN61000-4-2

EN61000-4-3

EN61000-4-4

EN61000-4-5

EN61000-4-6

EN61000-4-8

EN61000-4-11

A 10 (4)

High voltage pulse noise type : EAP series Low leakage current type : EAM series

*A higher current rating EMI/EMC filter may be recommended in view of the other devices that could be connected in parallel with the power supply. Series name
 Single output
 Output wattage

4)Universal input

⑤Output voltage

Optional *1
 C: with Coating
 J4: EP (TE Connectivity) connector type

S: with Chassis

SN: with Chassis & cover Y: with Potentiometer

For option details, refer to Instruction Manual 6.

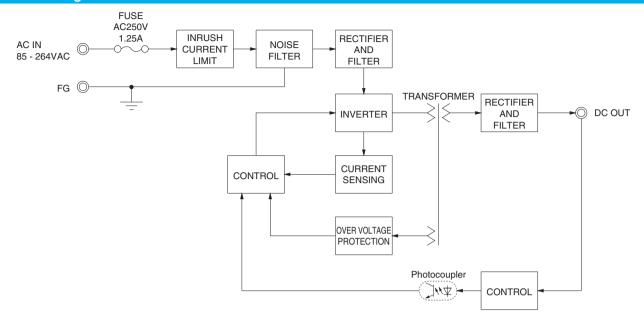

This power supply is manufactured by SMD technology. The stress to PCB like twisting or bending causes the defect of the unit, so handle the unit with care. *Make sure necessary tests will be carried out on your end equipment with the power supply installed in accordance with any required EMC/EMI regulations.

OTHERS	COOLING METHOD	*2	Convection/Forced air	r (Requires external	fan) (Refer to "Derating	")			

- The listed options may affect the published standard specifications. Please contact us for detailed product specifications.
- Derating is required.
- At low load conditions, the burst mode operation will start. To check load regulation, you will need to measure the characteristics at average mode with instruments. This is the value that measured on measuring board with capacitor of 22 μ F and 0.1 μ F
- at 150mm from output terminal. Measured by 20MHz oscilloscope or Ripple-Noise meter (Equivalent to KEISOKU-GIKEN:RM104).
 - Ripple and ripple noise spec is change at lo=0 to 25% by burst operation. Audible noise may be generated.
- Drift is the change in DC output for an eight hour period after a half-hour warm-up at 25°C, with the input voltage held constant at the rated input/output.
- Please contact us about another class. When two or more units are operating it may not comply with the IEC61000-3-2. Please contact us for details.
- 3.3V, 5V, 12V output product, the maximum temperature of 55°C.
- To meet the specification, do not operate overload condition.
- Parallel operation is not possible
- Sound noise may be generated by power supply in case of pulse load.

External view

* External size of option is different from standard type.

- % The back side of PCB of the power supply is assembled some
- Be careful not to bump against the attached area by vibration. W Use the spacer of 8mm [0.31] length or more for isolation.
- And do not use press-fitting bush.
- % Point ①, Point ② are thermometry points. Please refer to Instruction Manual 3.

This power supply is manufactured by SMD technology. The stress to PCB like twisting or bending causes the defect of the unit, so handle the unit with care. *Make sure necessary tests will be carried out on your end equipment with the power supply installed in accordance with any required EMC/EMI regulations.

- 12V output product, the maximum temperature of 35℃.
- Applicable when Remote ON/OFF (optional) is added.

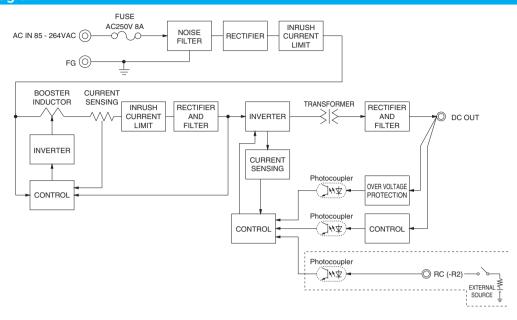

- Applicable When Hendrie Ordon (Optional) is added.

 To meet the specification, do not operate overload condition.

 Parallel operation is not possible.

 Sound noise may be generated by power supply in case of pulse

External view

* External size of option is different from standard type.

- $\ensuremath{\,\times\,}$ The back side of PCB of the power supply is assembled some SMDs.
- Be careful not to bump against the attached area by vibration.
- W Use the spacer of 8mm [0.31] length or more for isolation. And do not use press-fitting bush.
- ※ Point ①, Point ② are thermometry points. Please refer to Instruction Manual 3.

I/O	Connector	Mating connector	r Terminal	
ONIA	DODE VIII	VIID EN	Chain	SVH-21T-P1.1
CNT	B3P5-VH	VHR-5N	Loose	BVH-21T-P1.1
ONIO	D40D \//	VHR-10N	Chain	SVH-21T-P1.1
CNZ	B10P-VH	VHR-10N	Loose	BVH-21T-P1.1

(Mfr: J.S.T.)

- * I/O Connector is Mfr.J.S.T.
- ※ Option:-J4:EP (TE Connectivity) connector type.
- * Option:-J5:Output connector as 8 pin type.

- ※ Dimensions in mm, []=inches
- % Tolerance : ±1 [±0.04]
- Weight: 580g max (with chassis and cover: 890g max)
- ※ PCB Material / thickness : FR-4 / 1.6mm [0.06]
- ※ Optional chassis and cover material : Galvanizing steel board
- Mounting torque (Mounting hole of chassis): 1.5N·m max

Assembling and Installation Method

Installation method

- ■This power supply is manufactured by SMD technology. Do not touch any SMD components on the unit. Be especially careful when handling.
- ■If using a metal chassis, keep proper insulation between the component and metal chassis, use the spacer of 8mm or more between bottom of power supply and metal chassis.

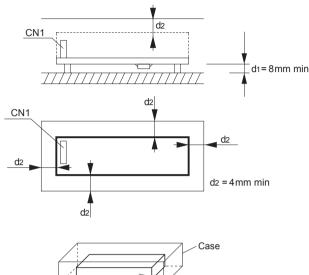

If d1 and/or d2 are less than the value mentioned in right figure, insert an insulating sheet with reinforced insulation between the power supply unit and metal chassis.

The following distance is not satisfactory for cooling condition. Please refer to "Derating" and Instruction Manual 3 for cooling method.

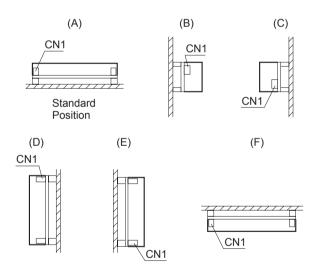

Please use it after confirming the temperature of points ① and points ② of Instraction Manual 3.

- ■Installation method shown right is possible.
- ■In optional -SN, Method (F) is not available with convection cooling. If method (F) is used, use with forced air cooling or derate temperature / load. For more details, please contact us.

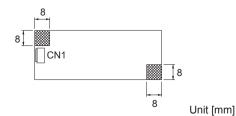

Power supply

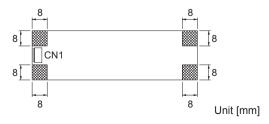

Mounting screw

- \blacksquare The mounting screw should be ϕ 3mm. The hatched area shows the allowance of metal parts for mounting.
- LHA10F, LHA15F, LHA30F

 LHA50F, LHA75F, LHA100F, LHA150F, LHA300F

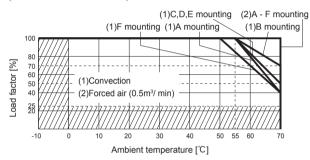

- ■If mounting metallic fittings on the board surface, ensure there is no contact with components.
- ■This product uses SMD technology. Please avoid the PCB installation method which includes the twisting stress or the bending stress.

- ■The operating ambient temperature is different by with / without chassis cover or mounting position.
- ■In the hatched area, the specification of Ripple, Ripple Noise is different from other area.
- The ambient temperature should be measured 5 to 10 cm away from the power supply so that it won't be influenced by the heat from the power supply.
- ■Please make sure the maximum component temperature rise given in Instruction manual 3 is not exceeded.
- ■Please contact us for more information about operating ambient temperature.

Instruction Manuals

Please see catalog and instructionmanual before you use.

Instruction Manuals https://www.cosel.co.jp/redirect/catalog/en/LHA/ Before using our product https://en.cosel.co.jp/technical/caution/index.html

Basic Characteristics Data

Model	Circuit method	Switching frequency [kHz] *1 *2	Input current *3 [A]	Inrush current protection	PCB/Pattern			Series/Parallel operation availability	
					Material	Single sided	Double sided	Series operation	Parallel operation
LHA10F	Flyback converter	20 to 125	0.26	Resistance *4	CEM-3	Yes	-	Yes	No
LHA15F	Flyback converter	20 to 125	0.35	Thermistor	CEM-3	Yes	-	Yes	No
LHA30F	Flyback converter	30 to 130	0.62	Thermistor	FR-4	-	Yes	Yes	No
LHA50F	Flyback converter	30 to 130	1.05	Thermistor	FR-4	-	Yes	Yes	No
LHA75F	Active filter	15 to 300	0.9	Thermistor	FR-4	-	Yes	Yes	No
	Flyback converter	50 to 140							
LHA100F	Active filter	15 to 300	1.2	Thermistor	FR-4	-	Yes	Yes	No
	Flyback converter	35 to 130							
LHA150F	Active filter	15 to 300	1.8	Thermistor	FR-4	-	Yes	Yes	No
	LLC resonant converter	90 to 280							
LHA300F	Active filter	15 to 300	3.5	Thermistor	FR-4	-	Yes	Yes	No
	LLC resonant converter	65 to 200							

^{*1} The value changes depending on input and load.

^{*2} At light load, burst operation is performed to reduce input power. The switching frequency is changed by using condition. Please contact us for more details.

^{*3} The value of input current is at ACIN 100V and rated load.

^{*4} Resistance of the line filter.
