

## HCD SERIES

### Hermetically Sealed DC LVDT

#### SPECIFICATIONS

- ♦ Hermetically sealed, all welded
- ♦ Stainless steel housing
- ♦ High level  $\pm 10$ VDC output
- ♦ Stroke ranges from  $\pm 0.05$  to  $\pm 10$  inches
- ♦ Shock and vibration tolerant
- ♦ MS style connector
- ♦ IEC IP68 rating to 1,000 PSI [70 bars]
- ♦ Captive core option

The HCD Series hermetically sealed DC operated LVDTs are the perfect choice for high performance measurements in environments containing moisture, dirt, and fluid contaminants. Operating on a nominal  $\pm 15$ VDC supply, these heavy-duty LVDTs deliver an extremely linear, low noise, yet high frequency response  $\pm 10$ VDC output.

The integral electrical connector (welded, glass-sealed MS type) provides for easy installation and allows replacing a damaged cable without sacrificing the sensor.

The HCD is available in stroke ranges of  $\pm 0.05$  inch [ $\pm 1.27$ mm] up to  $\pm 10$  inches [ $\pm 254$ mm], and with a number of standard options including imperial or metric threaded core, guided core and captive core.

Like in most of our LVDTs, the HCD windings are vacuum impregnated with a specially formulated, high temperature, flexible resin, and the coil assembly is potted inside its housing with a two-component epoxy. This provides excellent protection against hostile environments such as high vibration and shock.

**Captive core option:** The HCD features an optional captive core design (available for most models) that greatly simplifies installation. The core rod and bearing assembly includes a Bronze bearing on the front end for self-alignment, while a PTFE sleeve allows low-friction travel through the stainless steel boreliner (spool tube).

#### FEATURES

- ♦ All-welded stainless steel construction
- ♦ Shock and vibration tolerant
- ♦ Low noise,  $\pm 10$ VDC output
- ♦ Double magnetic shielding
- ♦ MS type connector (MIL-C-5015)
- ♦ Calibration certificate supplied with each unit

#### APPLICATIONS

- ♦ Harsh industrial environments
- ♦ Pressurized installations up to 1,000 psi
- ♦ Paper processing mills
- ♦ Roller gap position feedback
- ♦ Automated test systems
- ♦ X-Y Positional Feedback
