

| Parameter             | Symbol | Rating | Units |  |
|-----------------------|--------|--------|-------|--|
| Load Voltage          | VL     | 60     | V     |  |
| Load Current          | lL l   | 1.1    | Α     |  |
| On-Resistance         | Ron    | 0.27   | Ω     |  |
| I/O Isolation Voltage | V/ıo   | 5000   | Vrms  |  |

- Long life (No limit on mechanical and electrical
- lifetime)Bounce-free switching
- Higher speed and high frequency switching
- Higher sensitivity (less power consumption)
- Immunity to EMI or RFI

- No have voltaic arc, bounce, and noise More
- resistant to vibration and impact AC or DC load
- switching
- Small package size

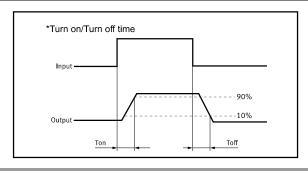

#### **Applications**

- Telecom/Datacom switching
- Multiplexers
- Meter reading systems
- Data acquisition
- Medical equipment
- Battery monitoring
- I/O Sub-Systems

- Robotics
- Aerospace
- Home/Safety security systems
- Process Control
- Energy Management
- Reed Relay EMR Replacement
- Programmable Controllers

Please obey the following conditions to ensure proper device operation and resetting. Input LED current (Recommended value): IF ≥5mA and ≤30mA

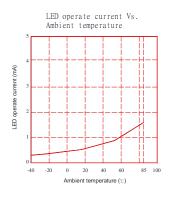

# **Engineering Data**

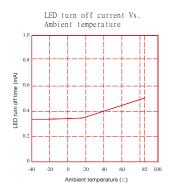

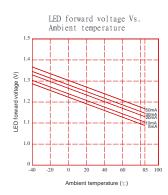

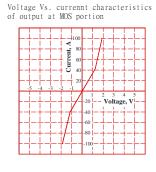

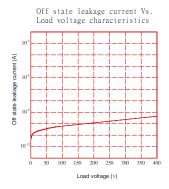

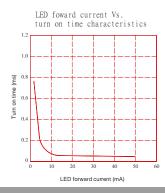

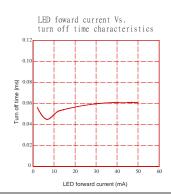

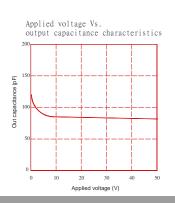

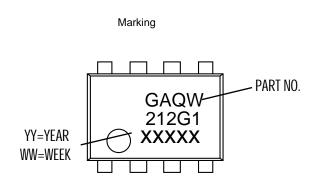

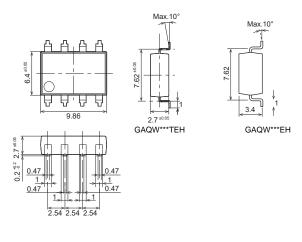

# Dimensions and SMD-8 Package Unit: mm

# Surface mount terminal type

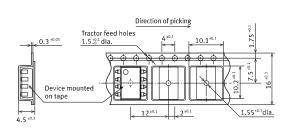

# Recommended mounting pad (Top view)

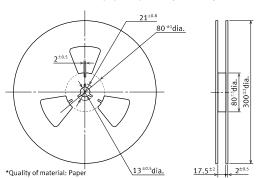

#### Tape dimensions (tape reel)

#### Tape dimensions (Unit: mm)

#### Dimensions of paper tape reel (Unit: mm)

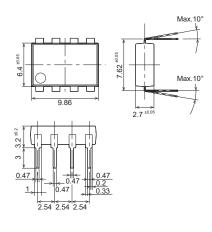

**Dimensions and DIP-8 Package** 

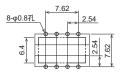

Unit: mm

# Marking GAQW PART NO. 212G1 XXXXX WW=WEEK

#### Through hole terminal type

PC board pattern (Bottom view)

DIP Tape dimensions Unit: mm

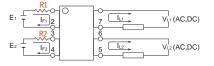

Devices are packaged in a tube so that pin No. 1 is on the stopper B side. Observe correct orientation when mounting them on PC boards.

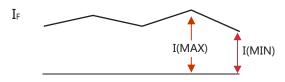

#### **Using Methods**

Examples of resistance value to control LED forward current (IF=5mA)

| E1 E2 | R1 R2(Approx) |  |  |  |
|-------|---------------|--|--|--|
| 3.3V  | 300 Ω         |  |  |  |
| 5.0V  | 600 Ω         |  |  |  |
| 12V   | 1.9KΩ         |  |  |  |
| 24V   | 4.1K Ω        |  |  |  |

LED forward current must be more than 5mA, at I(MIN), and less than 30mA, at I(MAX).

#### **Recommended Operating Conditions**

Please obey the following conditions to ensure proper device operation and resetting. Input LED current (Recommended value):

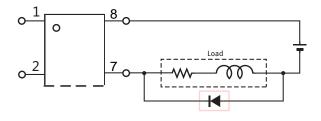

| Characteristic  | Symbol | Min | Тур. | Max | Unit |
|-----------------|--------|-----|------|-----|------|
| Forward current | lF     | 5.0 | 7.0  | 30  | mA   |

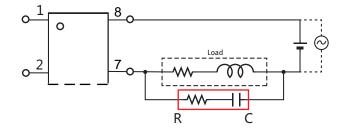

#### **Protection Circuit**

Output spike voltages:if an inductive load generates spike voltages which exceed heabsolute maximum rating, the spike voltage shall be limited.

Clamp diode is connected in parallel with the load. Absorb capacity with external diode.

CR Snubber is connected in parallel with the load. Absorb capacity with buffer capacity.

When adding diodes, buffer circuits (C-R), and other protections, they need to be installed near the MOS RELAY to be effective. Adding protection elements may result in a slow reset time, so adjust them according to the actual situation before use.

Note: When developing designs using this product, perform the expected performance of the equipment under the operating conditions recommended by the guidelines in this document. Continuous use under heavy loads (including, but not limited to, the application of high temperatures/current/voltage and significant changes in temperature, etc.) may result in deterioration of the reliability of this product.

#### **Recommended Soldering Conditions**

# (a) Infrared reflow soldering:

■ Peak reflow soldering : 260°C or below (package surface temperature)

■ Time of peak reflow temperature : 10 sec
 ■ Time of temperature higher than 230°C : 30-60 sec
 ■ Time to preheat temperature from 180~190°C : 60-120 sec

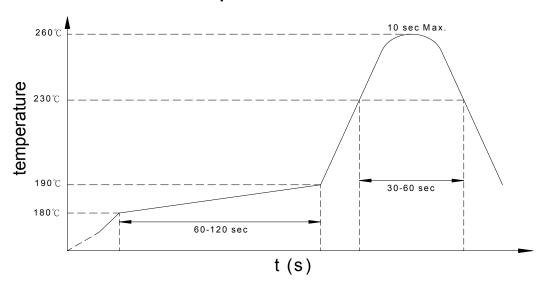

■ Time(s) of reflow: Two

■ Flux : Rosin flux containing small amount of chlorine (The

flux with a maximum chlorine content of 0.2 Wt% is

recommended.)

# Recommended Temperature Profile of Infrared Reflow

# (b) Wave soldering:

■ Temperature : 260°C or below (molten solder temperature)

■ Time : 10 seconds or less

■ Preheating conditions : 120°C or below (package surface temperature)

■ Time(s) of reflow : One

■ Flux: Rosin flux containing small amount of chlorine (The flux with a maximum

chlorine content of 0.2 Wt% is recommended.)

(c) Cautions:

■ Fluxes: Avoid removing the residual flux with freon-based and chlorine-based

cleaning solvent.

Avoid shorting between portion of frame and leads.
