Ultrafast Soft Recovery Diode, 200V, 10A×2

Description:

These diodes are optimized to less losses and EMI/RFI in high frequency power conditioning system. The soft recovery character of the diodes offers buffer in most applications. These devices are suited for power converters and other applications where the switching losses are not significant portion of the total losses.

Features:

- Ultrafast Recovery
- 175℃ operating junction temperature
- High frequency operation
- Low IR value
- High surge capacity
- Epitaxial chip construction
