

General Description

The ESD56151W04 is designed to protect voltage sensitive components from damage or latch-up due to surge current. Excellent clamping capability, low leakage, and fast response time provide best in class protection on designs that are exposed to surge current protection for board level. Because of its small size and bi-directional design, it is ideal for use in cellular phones and portable applications that require audio line protection.

Specification Features

- Miniaturized packaging size suitable for high-density applications: nom 0.066" x 0.049" (1.7x1.25mm)
- Low Clamping Voltage: $V_C=18V@I_{PP}=160A$
- Reverse Working (Stand-off) Voltage: 4.5 V
- Low Leakage
- Response Time is Typically < 1 ns
- IEC61000-4-2 Level 4 ESD Protection

Application

- Smartphones, tablet computers, Mobile Internet Devices (MID) and portable devices
