

1. Description

UMW TC4424AVOA713 is power switch driver. It has a matching rise and fall time when charging and discharging the gate of the power switch. UMW TC4424AVOA713 has high latch resistance under all conditions in its rated power and voltage range. When noise spikes of up to 5V (either polarity) occur on the ground pin, the UMW TC4424AVOA713 is not damaged. UMW TC4424AVOA713 can accept reverse currents up to 500mA to force back its output without damage or logic confusion. All ports are fully protected by up to 2.0 kV electrostatic discharge (ESD).

3. Features

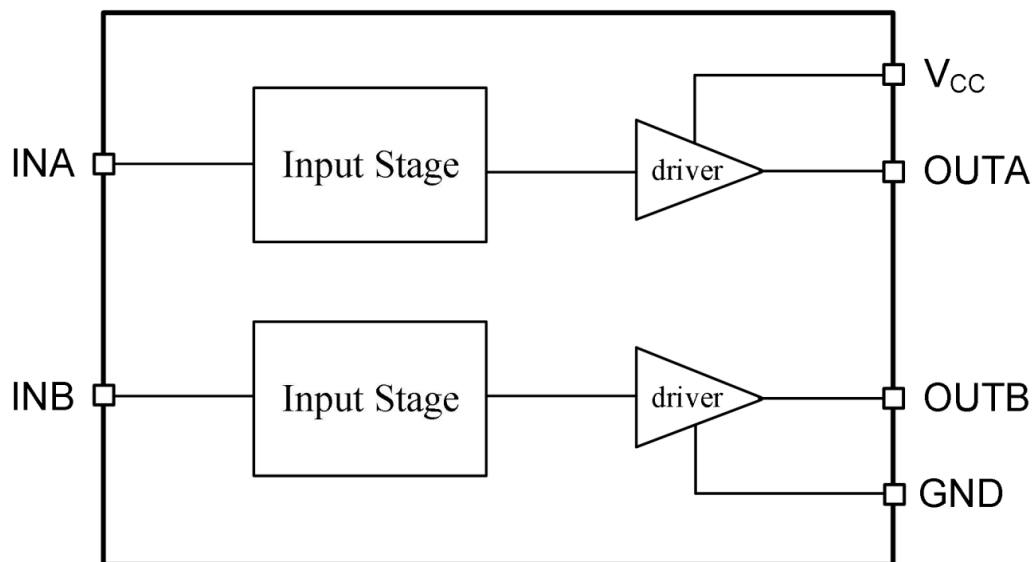

- Latch Protection: withstand 0.5 A reverse current
- Ability to Handle Negative Voltages (-10 V) at Inputs
- Low Output Impedance
- Two Independent Gate-Drive Channel
